BULK BAGGING MACHINE

TECHNICAL SPECIFICATION

This machine is suitable for all kind of Food & Non-food Granules and Powders for Bulk Bagging i.e. Up to 50 Kg Packaging.

The Bulk Bagging Machine is a manual bagging system equipped with electronic gross weighing system to meet international standards and provide high accuracy and reliability. The simple construction and sturdy design ensure safe and accurate operation. It is designed to operate in a wide range of industries such as food, feed, chemicals and building materials. The system can be equipped with a range of feeding devices (high-speed or standard gravity, belt, screw and vibratory feeder).

Features

- Clean and dust-controlled operation
- User-friendly weighing controller
- Upper part of the bagging spout suspended from the load cells
- Automatic zero correction, material-in-flight compensation, and selection of the desired time or weight in dribble flow rate
- Manual operation of the bag clamp by means of a pair of pneumatic push buttons with safety controls
- Rigid support structure in welded steel

Options

- Diverse range of feeding devices; high-speed or standard gravity, belt, screw and vibratory feeder
