

SHIVANGANA STEELS

ISO 9001:2015 Certified Company

- Perforated Cable tray ● Ladder Cable tray ● Raceway / Solid Cable tray ● Powder Coated Cable Tray
- Slotted Angle Racks ● GI Flat / Angle ● Cable tray Assessment ● Earthing Copper Rod / Pipe
- Earthing Assessment ● PVC – Conduit Pipe ● "C" Type Channel

Company Profile

SHIVANGANA STEELS are leading and well recognized names in the field of providing complete range of Hot Dip Perforated Cable tray, G.I Perforated Cable tray, Ladder tray, Raceway Hot Dip Flat, GI Flat, Powder Coating cable tray, Hot Dip Horizontal Bend, Vertical Bend, Internal Cable tray, Vertical Support, Angle Ladder, Chemical earthing ,G.I Rod, Powder Coating Slotted Angle, Shelve, Gratings, Panel C channel G.I Slotted Angle, Heavy Duty Rack, Structure Rack and all type of Fabrication item as per required.

As market leaders in Cable Tray and Ladder Tray field in India, we "SHIVANGANA STEELS" well utilize our facilities so as to manufacture and market complete range of products including Slotted Angle Racks and Accessories, Rack Storage Systems and Industrial Storage Systems. Established in the year 2005, we have been successfully catering to diverse storage system demands of industries including Semi-Govt.Telecom and Government Agencies, Corporate organizations and different Industrial sectors.

Further, the fully equipped and latest fabrication machinery and sound process back-up also helps us to bring substantial reduction in terms of production lead-as well as assist us in meeting the competitive product pricing requisites among competitors. With our endeavor towards delivering best value for client's money, the team of technical design engineers also ensure tailor made solutions are offered as per the estimates of our client's requirements.

Infrastructure Support

We have with us excellent infrastructural support that is backed by team of well qualified engineers. The team allows us to well handle the production processes divided under separate divisions including –

- Product design
- Manufacturing
- Fabrication
- Quality control
- Post Production processes
- Some of the strengths of our infrastructure include
- Stage wise inspections during production process with calibrated instruments
- Manufacturing items using latest technology based CNC machinery to achieve high accuracy in outputs
- Final finished products provided is superior grade epoxy powder coated finish using manual equipment

Some of the production support equipment available at our end includes:

- Turret Punch Press (A type of punch press used for metal forming by punching.)
- Press Break (A machine pressing tool for bending sheet and plate material, most commonly sheet metal.)
- Shearing Machine
- Power presses
- Spot Welding Machine
- Mig Welding Machine
- Surface Grinder
- Quality Control equipment
- Perforation Machine
