

Product Sustainability Declaration

Rockfon® Artic™

Our sustainable commitment

Our commitment to sustainability is guided by our deep-rooted values. Rockfon® high-quality ceiling solutions provide excellent longevity and life-cycle value. Our ceiling solutions deliver acoustic comfort by reducing noise and sound reverberation, helping to improve working, learning and healing environments.

Our product sustainability declaration is set around major sustainability building schemes, detailing the sustainable characteristics of this product. The document helps provide a clear and quick overview to architects, specifiers and property owners alike.

The sustainability declaration

- Sourcing of raw materials
- Environmental product declarations
- Indoor health properties
- Material ingredients
- Corporate sustainability reporting

LEED® v4 Highlights

Materials and Resources (MR)

- Construction & Demolition Waste Management Planning
- Interiors Life Cycle Impact Reduction - Design for Flexibility
- Building Product Disclosure and Optimization - Environmental Product Declarations

Stone wool provides no sustenance to microorganisms

Environment

Sourcing of raw materials

Recycled content

The average recycled content of the mineral wool core in Rockfon products is >40%. Including facings (paint and glass fleeces) the recycled content of the full product is between 32 and 43% according to ISO 14021.

The recycled content is primarily post-industrial/pre-consumer.

The information provided under recycled content is self-declared.

Responsible sourcing

>90% of all suppliers identified as key suppliers to the ROCKWOOL Group have currently signed the ROCKWOOL Code of Conduct for Suppliers.

The ROCKWOOL Code of Conduct addresses laws and standards compliance, equal opportunities, trade union recognition, fair employment, safe and healthy working conditions, no child labour, sound environmental principles, purchasing ethics and bribery.

End-of-life recycling

This product is applicable for upcycling or end-of-life recycling at the nearest local ROCKWOOL recycling plant. All returned products will be upcycled to virgin fibres used for new stone wool products. Recycling construction and demolition waste reduces the amount of waste that is sent to landfills and incineration facilities.

Environmental product declarations

Self-declared EPDs are based on data generated by The Right Environment and verified against the EN15804 EPD standard by an independent third party.

Product health

Low emitting materials

This product is certified for low emissions. Laboratories employed by Rockfon are accredited under ISO/IEC 17025 for the applied test methods.

Please consult the emissions table on the following page for additional information.

Safe raw materials

Material ingredients

Rockfon materials are regularly screened against the REACH candidate list; biocides/pesticide, flame retardants, azo dyes, nitrosamines and aromatic amines, halogenated compounds, nanomaterials, plastic softeners, surfactants and classified substances, among others, by an independent third party (Alttox Ltd).

The general cut off concentrations is 1000 ppm for external raw material suppliers. But for the stone wool core material the inventory threshold is 100 ppm (0.01%).

Health and fibres

The Rockfon stone wool core is a non-hazardous material to work with. This fact is supported by the decision of the World Health Organisation's International Agency for Research on Cancer (IARC) to exempt stone wool from its list of "possibly cancer causing agents".

Rockfon stone wool core is certified to comply with the Note Q for safe mineral wool fibres of EU Regulations (EC) No 1272/2008 and Directive 97/69/EEC.

Corporate sustainability reporting

Sustainability reporting

The ROCKWOOL Group Sustainability report covers the calendar year and is informed by the Global Reporting Initiative (GRI) Standards.

The Groups performance on CO2 emissions is regularly disclosed through international reporting platforms such as the Carbon Disclosure Project (CDP).

Our Environmental Health & Safety performance was rated 'Prime' – the highest rating score – by leading sustainable investment rating agency ISS-oekom.

The report is available for download on www.rockwoolgroup.com/sustainability

Product summary table

The following table is categorised by edge type and provides all relevant information related to the products sustainability profile.

			Emission Labels						Environmental Management System	Fibre Chemistry		Substance Screening
