

APEX TILE GUARD

Asian Paints Apex Tile Guard is a water-based, modified acrylic emulsion specially formulated for clay roof tiles.

Roof tiles face the direct impact of monsoons and UV sunrays, and therefore require special protection. Asian Paints offers Apex Tile Guard, a paint specifically designed for your exterior roof tiles.

It is a high performance water-based paint that forms a protective cover on roof tiles and acts as a shield even in the toughest of conditions. Its unique formulation repels water and provides resistance against algal and fungal growth. The product is available in a wide range of colours as well as a transparent coating, in a rich sheen finish, which offers you an excellent décor solution.

APEX TILE GUARD - DIRECTIONS FOR USE

- Clean the surface thoroughly using a wire brush and remove loose material from the surface. Growths of fungus, algae or moss should be removed by wire brushing and water.
- In case of dents and holes use Asian Paints TruCare Wall Putty or white cement and fine sand in the ratio 1:3
- Apply 2-3 coats of Asian Paints Apex Tile Guard, after diluting 1 litre of Tile Guard with a maximum of 300 ml of water.
- A gap of 4-6 hrs should be maintained between painting two successive coats.
- This product is not recommended for use on glazed, non-porous or very smooth tiles or masonry surfaces.

DIRECTIONS FOR USE

Surface Preparation

Ensure that the surface to be painted is free from loose paint, dust, grease and algae, by vigorous wire brushing and cleaning with water, followed by a coat of an effective bio-wash solution. Asian Paints TruCare BioBlock is recommended as it effectively kills algal and fungal formations and prevents recurrence.

Surface Smoothing /Crack Filling

Walls may have slight irregularities and imperfections such as holes, dents and cracks. Asian Paints TruCare Wall Putty is recommended to level minor undulations and smoothen the wall surface.

Asian Paints SmartCare Crack Seal is recommended for cracks up to 3mm in width. It is a fibre-glass reinforced, ready to use crack filling compound for both interior and exterior masonry surfaces. Larger cracks can be filled by a mixture of white cement and sand (in a ratio of 1:3).

Primer Coat

Before application of the topcoat, it is necessary to apply a coat of an exterior durable primer for better adhesion and to increase the durability of the paint. For fresh surfaces, we

recommend Asian Paints SmartCare Primero, an alkali resistant primer-cum-sealer, specially designed for application on fresh plaster and manufactured sand substrates.

On fully cured plaster surfaces and for re-painting, you can alternatively use Asian Paints TruCare Exterior Wall Primer.

Topcoat

Apply 2-3 coats of Asian Paints Ace/Apex by diluting 1 litre with a maximum of 400 ml of water. Ensure a gap of 4-6 hrs between the coats. Apply a third coat on horizontal surfaces for additional protection.

PAINT APPLICATION PROCESS

APPLICATION	THINNER	DILUTION % (BY VOLUME)	APPLICATION VISCOSITY (SEC)	RECOATING PERIOD (HOURS)
STEP 1 ASIAN PAINTS TRUCARE WALL PUTTY (OPTIONAL)	WATER	BASED ON REQUIREMENT TO FORM PASTE	PASTE FORM	4 HRS
STEP 2 TRUCARE EXTERIOR WALL PRIMER BRUSH / ROLLER / SPRAY	WATER	BRUSH 90 - 110 ROLLER 90 - 110 SPRAY 40 - 45	BRUSH 15 - 18 SPRAY 33	4 HRS
