Strong Foundations
Bright Solutions

INTRODUCTION

A S INFRA ENGINEERS AND CONTRACTORS is a registered firm providing infrastructure, engineering, and electrical solutions across India. We offer end-to-end services along with supply of high-quality industrial materials.

As a one-stop solution provider, we deal in Iron & Steel, Electricals, Hardware, Safety Products, Industrial Luminaires, and Engineering Spares. By sourcing directly from manufacturers, we ensure competitive pricing, timely delivery, and reliable quality.

We are committed to professionalism, safety, and customer satisfaction, delivering dependable services and branded materials for long-term client relationships.

MISSION

Our mission is to become a trusted and efficient service provider and supplier by :

- Delivering high-quality infrastructure and electrical solutions with safety and precision.
- Sourcing reliable and durable materials directly from manufacturers at competitive prices.
- Providing complete solutions including supply and installation under one roof.
- Ensuring timely project execution and on-time material delivery.
- Maintaining strong relationships with clients through commitment, transparency, and trust.
- We are committed to quality, integrity, and customer satisfaction, which helps us build long-term partnerships and grow consistently.

VISION

We envision becoming one of the leading infrastructure and electrical service providers across India by :

- We intend on becoming one of the mumbai's biggest supplier for all company needs.
- Delivering innovative and cost-effective solutions in infrastructure and electrical projects.
- Expanding our presence in both service execution and material supply sectors.
- Continuously improving quality standards through modern technology and skilled workforce.
- Building long-term partnerships by understanding and exceeding customer expectations.
- Establishing a strong reputation for reliability, trust, and excellence in every project.

Complete Pole Solutions for Every Need

We offer a complete range of pole solutions including Octagonal, Highmast, Decorative, Solar, CCTV, Petrol Pump, and Advertising Poles. Designed with high-quality materials, our poles ensure strength, durability, and reliable performance in all conditions. Suitable for infrastructure, lighting, and commercial applications, we also provide customized solutions as per project requirements.

Octagonal Pole

**Highmast
& Stadium Pole**

**Flag highmast
Pole**

Decorative Pole

Solar Pole

CCTV Pole

**Petrol Pump
Pole**

Advetising Pole

All Types of Light Pole Installation Services

We provide complete solutions for all types of light pole installations, including high mast poles, street light poles, decorative poles, camera poles, and solar lighting systems. Our services cover the entire process from site inspection, foundation work, and pole erection to wiring, testing, and commissioning. With a focus on safety, quality, and timely execution, we ensure reliable and efficient lighting solutions for highways, industrial areas, commercial spaces, and public infrastructure projects.

CONICAL POLES

A S Infra Engineers & Contractors offers a durable and versatile range of conical poles designed for applications such as street lighting, power distribution, solar systems, surveillance, and smart pole solutions. The tapered design ensures high strength, uniform load distribution, and excellent wind resistance, making them suitable for both urban and highway use.

Manufactured as per IS Standards and finished with hot dip galvanization, these poles provide superior corrosion resistance and long service life. Available from 3 meters onwards, our conical poles can be fully customized to meet specific project requirements and site conditions.

Product Code.	Height Mtr.	Top A/F(mm)	Bottom A/F(mm)	Thickness (mm)	Base Plate			Foundation Bolt
					Size	Thick.	PCD	
SLP3	3	65	110	3	200X200	12	200	M16 X 400 mm
SLP3	3	70	115	3	200X200	12	200	M16 X 400 mm
SLP4	4	65	125	3	200X200	12	200	M16 X 400 mm

HIGH MAST POLES

“Powerful Illumination for Large Spaces”

A S Infra Engineers & Contractors offers high-performance high mast lighting solutions designed for efficient illumination of large outdoor areas. These poles are ideal for applications such as highways, stadiums, airports, ports, industrial zones, and large parking areas, where uniform and high-intensity lighting is required.

Engineered using high tensile steel and manufactured as per relevant IS Standards, our high mast poles ensure superior strength, stability, and long service life. The system is equipped with a motorized lowering and raising mechanism, allowing easy maintenance of luminaires at ground level. Finished with hot dip galvanization, the poles provide excellent corrosion resistance and durability even in harsh environmental conditions.

We offer high mast poles ranging from 12 meters to 45 meters and above, with complete customization options including head frame, number of luminaires, winch system, and accessories as per project requirements.

Lighting Solutions & Electrical Products

- ▶ We deal in commercial and industrial luminaries.
- ▶ Railing Junction Boxes
- ▶ LED BULB, LED Street Lights, LED PANNEL LIGHT, LED DOWN LIGHT, LED STREET LIGHT, LED FLOOD LIGHT, LED LOW BAY/HIGH BAY LIGHT.
- ▶ Tunnel Lights, Aviation Lights, SURFACE LIGHT, BOLLARD LIGHT.
- ▶ High Bay Lighting Systems
- ▶ SIGN EDGE

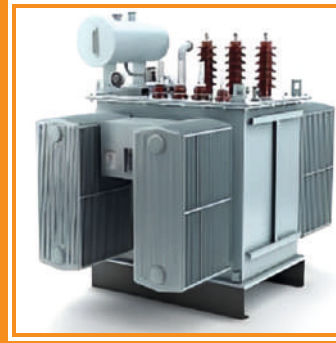

Electrical Consumables & Panel Accessories

- ▶ Polycab wires and cables, L&T make MCCB, ELCB, Starter etc, Selec Timers, Temp. controler, Trinity make.
- ▶ Digital Multifunction Meter, Power Factor Relay, Energy Meter, Ammeter, Voltmeter, MD Controller etc.
- ▶ THD Analyse, Elster make, Energy Meter, Lug and Gland, cable tie and all Panel accessories etc.

Transformer Installation (ST-LT Work)

We provide complete Transformer Installation (ST-LT Work) services, covering all activities from substation connectivity to low tension power distribution. Our scope includes transformer erection, RCC foundation, HT/LT cabling, panel installation, earthing, and testing & commissioning. We ensure safe, efficient, and reliable electrical systems by following industry standards and delivering quality solutions for industrial and commercial projects.

Engineering Tools & Industrial Equipment

- Engineering & General Tools (Bosch, Stanley, Taparia, etc.)
- Precision Measuring Instruments (Mitutoyo)
- Pressure & Temperature Gauges
- Water Meters, Industrial Valves
- Pipes & Pipe Fittings
- Industrial Pumps & Motors (Siemens, Crompton, Kirloskar, Havells)

Industrial Safety Products

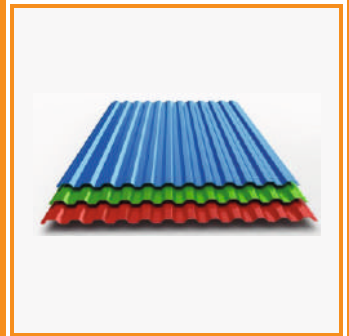

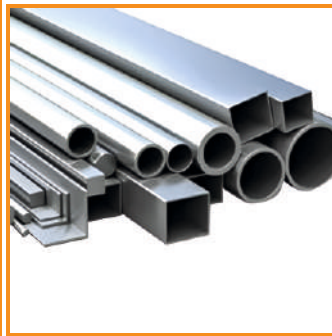

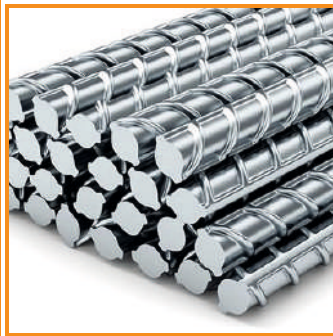

- Safety Shoes & Rain Safety Shoes
- Reflective Jackets & Safety Helmets
- Hand Gloves & Safety Cones
- Complete Industrial PPE Solutions

Belting & Lifting Solutions

- ▶ Polyester & Webbing Slings
- ▶ Wire Rope Slings & Lifting Clamps
- ▶ PP & Nylon Ropes
- ▶ Timing Belts & Flat Belts
- ▶ Ratchet Lashing Straps
- ▶ Eye Bolts & Lifting Rings

Iron, Steel & Structural Materials

- ▶ TMT Bars
- ▶ MS, GI, SS Pipes & Fittings
- ▶ Round & Square Sections
- ▶ Color Coated Profile Sheets
- ▶ Aluminium Sheets

Cable Fault Finding Machine

We offer advanced Cable Fault Finding Machine services to accurately detect and locate faults in underground and overhead electrical cables. Our equipment helps identify issues such as short circuits, open circuits, and insulation failures with high precision, minimizing downtime and repair costs.

Hardware, Flooring & Paint Solutions

- Hardware Items & Accessories
- Welding Rods, Grinding & Cutting Tools
- Adhesives, Cable Ties, Drill Bits, Fasteners
- Industrial Flooring Solutions
- Industrial Paints & Coatings
- Epoxy, Primer, Thinner & Protective Paints

Earthing Installation

- We provide reliable Earthing Installation services to ensure electrical safety and system protection for industrial, commercial, and infrastructure projects. Our scope includes design and installation of effective earthing systems such as plate earthing, pipe earthing, and chemical earthing.
- Our team carries out complete work including excavation, electrode installation, backfilling, earthing strip/wire connections, and testing of earth resistance. We follow industry standards and safety guidelines to ensure proper fault current dissipation and protection against electrical hazards.
- With quality materials and expert execution, we deliver durable and efficient earthing solutions for safe and uninterrupted operation of electrical systems.

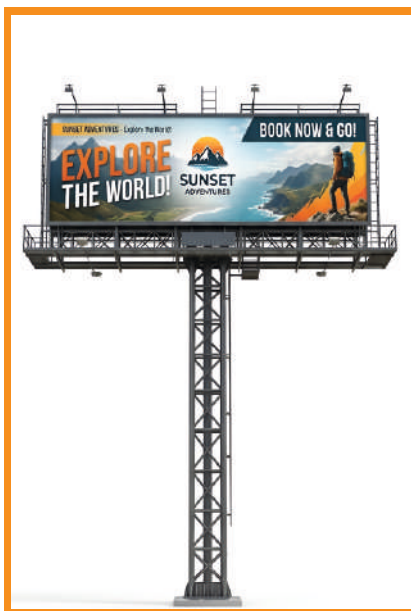

Panel Installation (Electrical & Solar)

- ▶ We provide professional Panel Installation services for both electrical and solar power systems, ensuring safe and efficient power distribution. Our scope includes installation of LT/HT panels, control panels, distribution boards, as well as solar panels and associated systems.
- ▶ Our team handles complete setup including panel mounting, cable termination, busbar connections, inverter integration, earthing, and system synchronization. We follow strict safety standards and quality practices to ensure reliable performance, energy efficiency, and long service life.
- ▶ With skilled execution and modern techniques, we deliver robust and dependable panel installation solutions for industrial, commercial, and solar projects.
- ▶ Our skilled team ensures quick fault detection, reducing power interruptions and enabling efficient maintenance of electrical networks. This service is ideal for industrial, commercial, and infrastructure projects, ensuring reliable and uninterrupted power supply.

Heavy-Duty Steel Frames for High-Impact Outdoor Advertising

- Our outdoor road hoarding steel frames are engineered for durability, strength, and long-term performance in all weather conditions. Fabricated using high-quality mild steel, these structures provide a sturdy base for advertising displays along highways, city roads, and commercial zones.
- Designed with precision, the frames ensure excellent wind resistance and structural stability, making them ideal for large-format hoardings and billboards. The anti-corrosion coating and robust fabrication guarantee minimal maintenance and extended service life.
- Suitable for both fixed and customized sizes, our steel hoarding frames are easy to install and support various media types such as flex, LED panels, and backlit displays—making them a reliable solution for outdoor advertising infrastructure.
