ABOUT US

We have been involved in the specialist production of technically advanced blown polyethylene films. Today we are one of the leading manufacturer of flexible polyethylene based packaging.

We put our strength and our steadfast growth down to the way we embrace and apply pioneering technologies, the way we inspire advances in our processes and the investment we continue to make in our people. We're committed to innovation and delivering outstanding products that make a winning difference to our customers' operations and we're determined to remain at the forefront of this dynamic industry.

Our company specializes in manufacturing LDPE, HM HDPE, Stretch film, Garbage bags and mainly Reprocessed Sheets and bags.

We are currently in the field of packaging catering to the needs of Industrial houses like Automotive, Engineering, Electronics, Garments and textile Industries all over Tamil Nadu, Kerala, Karnataka, Andhra Pradesh and Telangana.

MANUFACTURERS OF

- ◎ **LD Polyethylene Sheet and Bags**
- ◎ **HM HD Polyethylene Sheet and Bags**
- ◎ **Reprocessed Sheet and Bags**
- ◎ **Stretch film**
- ◎ **Air Bubble Sheet**
- ◎ **Garbage Bags**
- ◎ **Polythene Sheet for Construction**
- ◎ **Shrink Film**
- ◎ **Grow Bags – UV Treated**
- ◎ **Nursery Bags**
- ◎ **Mulching Sheet – UV Treated**
- ◎ **VCI Polythene Sheet and Bags**
- ◎ **PE Foam Sheet**
- ◎ **Poly Propylene rolls and Bags**

LD POLYETHYLENE SHEET AND BAGS

LDPE SHEETS stands for Low Density Polyethylene sheets, which are tough, flexible, chemical and impact resistant, sheets that have thousands of applications. These sheets are lightweight and come in different size, quality and colors

HM HD POLYETHYLENE SHEET AND BAGS

High-density polyethylene (HDPE) is a polyethylene thermoplastic made from petroleum. HDPE is known for its large strength to density ratio. Our HDPE Sheet Rolls are available in various colors, sizes and designs to suit the requirement of the clients.

REPROCESSED SHEET AND BAGS

Owing to the presence of our expert team, Reprocessed (RP) Sheets, Bags and Rolls are durable with a high water-resistant capacity and is easy to use. We are offering a wide range of Recycled (RP) Polyethylene Sheets, Recycled Polyethylene Bags and Recycled Polyethylene Rolls, customized as per client requirements.

STRETCH FILM

Stretch film is a stretchable plastic film that is wrapped around items and pallets. Our stretch wrap features superior break strength, clarity, tear resistance not found in other stretch film. Extruded or cast polyethylene stretch film and stretch wrap is available depending on your stretch film need.

AIR BUBBLE SHEET

Bubble wrap is made from polyethylene and is commonly used for packing delicate things. The bubbles in the material are evenly spaced, thus providing firm cushioning on precious and fragile items. These are available in different sizes and are great for wrapping glassware, picture frames, mirrors, electronics, and collectibles.

GARBAGE BAGS

Our garbage bags are uniquely designed in various colors, sizes and according to the customer requirements. We provide all kinds of weight needs. Available in a variety of sizes with a width ranging from 5" to 36". Easily compostable in nature, your waste management also gets the advantage of a sustainable solution to protect your environment.

POLYTHENE SHEET FOR CONSTRUCTION

Polythene sheet is ideal as vapor barrier or drop cloth, our clear Construction film. Provides great protection from weather and debris. Sheets are wound and folded in half. From wall construction, pit covers, vapor and moisture barriers to concrete curing, mulching, weather protection on buildings and flashing, our clear poly sheeting film is on the job.

SHRINK FILM

Our shrink film solutions are designed to make the products they protect stand out. From the performance they offer to the branding that's projected with such impact on the shelf, these are truly high performance films. They're all meeting the manufacturing demands of a range of products from various chemical applications to a host of industrial applications.

GROW BAGS – UV TREATED

We are Manufacturing and supplying UV treated plastic grow bags used for green house farming, home planting, nurseries, modern planting and natural creation. Grow Bag is bundled in high thickness and are made two-fold layered. Our Grow bags consists of white exterior to reflect light and a black interior to prevent algae growth and have pre-made holes in the bottom for drainage.

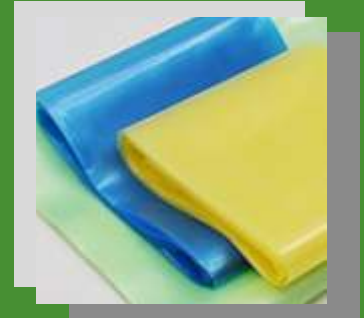

NURSERY BAGS

We are known for promoting healthy growth of plants owing to their moisture and retaining the property. Plastic Nursery Bags, offered by us are used for agriculture and nursery products.

MULCHING SHEET – UV TREATED

Mulching Sheet is a protection cover over the soil, primarily to modify the effect of the local climate. The most powerful feature of plastic mulch is the impact it has on light. Light is responsible for creating both, heat and colour. Plastic mulch can impact the development of heat increasing or decreasing it, depend on color.

VCI POLYTHENE SHEET AND BAGS

VCI Poly, flexible plastic wrappers are manufactured by extrusion process using low density polyethylene plastics granules (LDPE) and VCI master batch to achieve corrosion resistance and anti-rusting properties.

PE FOAM SHEET

PE foam is a durable, lightweight, resilient, closed-cell material. It is often used for packaging industrial and agricultural goods due to its excellent vibration dampening and insulation properties. It also offers high resistance to chemicals and moisture. Our industrial foam packaging consists of PE foam pouches, sheets, bundles, die cuts, and tubing. We customize our protective foam packaging for all of our customers.

POLY PROPYLENE ROLLS AND BAGS

We are experts in the manufacturing of quality Polypropylene (PP) Sheets and Rolls. Offered in various widths, thickness and specifications, these polypropylene sheets are quality tested on well-defined parameters before being supplied to our clients. The large number of end use applications for PP are often possible because of the ability to tailor grades with specific molecular properties and additives during its manufacture.

OUR SUSTAINABLE SOLUTIONS

With this ever-increasing focus on recycling, we are able to offer a range of sustainable packaging solutions that are tailored specifically to your requirements and pack formats.
