Catia V5

AET CAD Academy is an Authorized Autodesk, Aptech, SolidWorks & Bentley Systems Training Partner in India.

Duration : 02 Months

What is Catia V5?

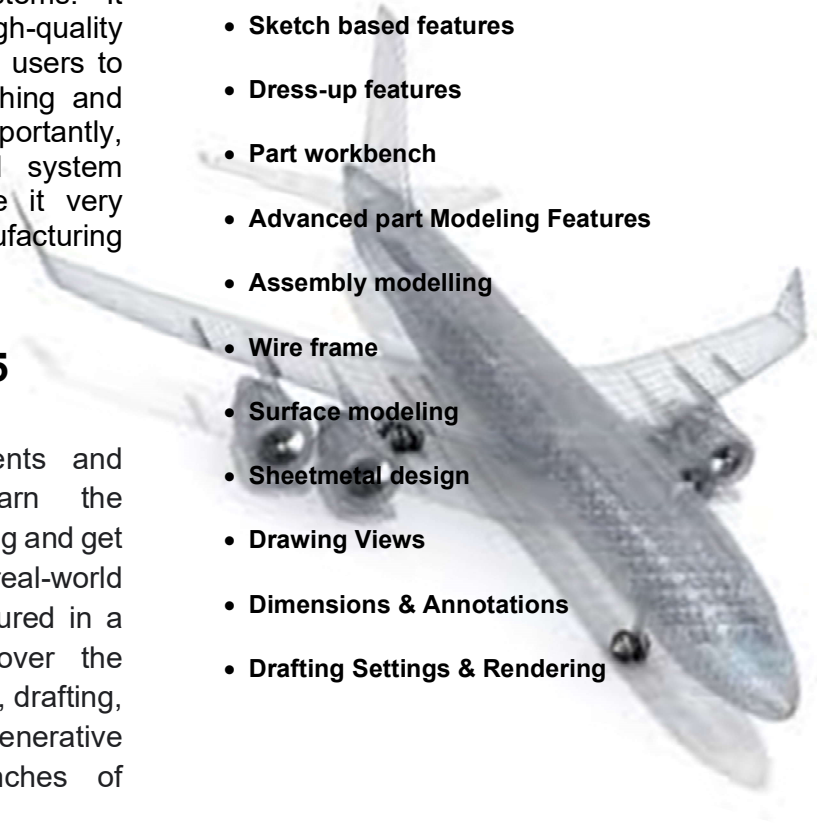

CATIA V5 or Computer Aided Three Dimensional Application is a powerful 3D parametric solid modeling software developed by Dassault Systems. It enables the development of high-quality mechanical products. It allows users to design shapes with 3D sketching and visualization features. Most importantly, its engineering, design, and system engineering capabilities make it very useful for the product manufacturing industry.

Why to Learn Catia V5 Training Course

The course will help students and professionals alike to learn the implementation of solid modeling and get hands-on experience with the real-world projects. This course is structured in a pedagogical sequence to cover the topics of part design, assembly, drafting, wireframe & surface, and Generative Sheetmetal Design workbenches of CATIA V5.

Course Contents

- GUI & Shortcuts
- Sketcher workbench
- Sketch based features
- Dress-up features
- Part workbench
- Advanced part Modeling Features
- Assembly modelling
- Wire frame
- Surface modeling
- Sheetmetal design
- Drawing Views
- Dimensions & Annotations
- Drafting Settings & Rendering
