

SUPERIOR MACHINERIES

FOR YOUR PREMIUM PRODUCTS

- Vertical Granules Mixer Machine
- Vertical Mixer Dryer Machine
- Batch Mixer Machine
- Plastic Pulverizer Machine
- Plastic Grinder Machine
- High Speed Mixer Machine
- Material Storage Equipments
- Roto Moulding Machine & It's Moulds

ABOUT US:

If you are manufacturer of any kind of Plastic products than you must have to follow various process like granules storage, mixing, drying, grinding, pulverizing, recycling etc to make your product premium and to do that you reach to the perfect place at us. Perfect and last destination for your search of any kind of plastic processing equipments. We Hetansh Plast Machineries Pvt. Ltd. provides the superior machineries for your premium products. We've Central Manufacturing unit located in Ahmedabad, Gujarat from where we deliver our prime machineries to PAN India as well as Exports to Kuwait, Nigeria, Tanzania, USA, Saudi Arabia, Nepal, Bhutan, Bangladesh Etc. We don't only sell the machines rather than we focus to fulfil your exact requirement to sustain the healthy professional relationship lifelong. So kindly explore our machineries range and make us your valuable product processing Partner.

Batch Mixer Machine

Useful Application :

- For the Homogeneous mixing of Raw materials.
- For masterbatch or colour mixing when you require 100% cleaning after every batch of mixing.
- For plastic raw material mixing if you have frequent changes in material mixing recipes or various ranges of colour mixing.

Industries Served :

- Injection Moulding Machine / Blow Moulding Machine / Pipe Extrusions / Blown Film Plants / Tape Plants/ Masterbatch compounding Etc

Available capacity : 50 kg / 100 Kg / 200 kg per batch

Vertical Granules Mixer Machine

Useful Application :

- For the homogeneous Mixing of Virgin granules and masterbatch Granules in mass production or in bulk quantity.
- For Virgin Granules and recycled grinding mixing in mass production or in bulk quantity.

Vertical Granules Mixer Dryer Machine

Useful Application :

- For the homogeneous mixing of Plastic Granules with heating at the same time
- For Mixing and Drying of raw material in mass production or in bulk quantity.
- For Mixing and removing the outer surface moisture in mass production or in bulk quantity.

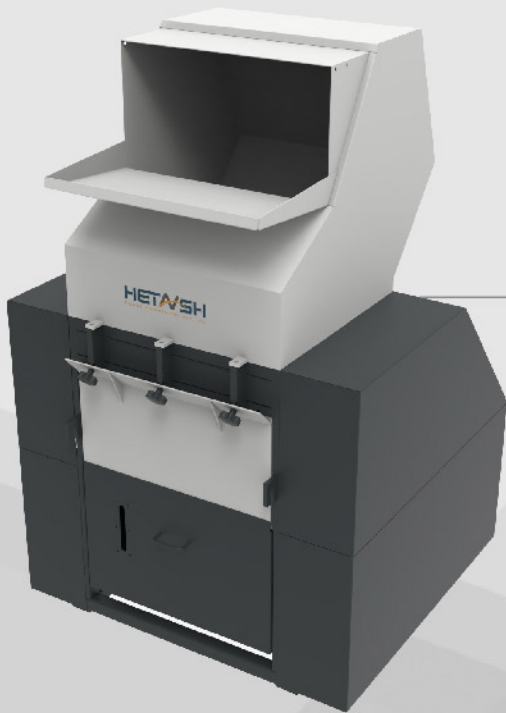

Industries Served :

- Injection Moulding Machine / Blow Moulding Machine / Pipe Extrusions / Blown / Film Plants / Masterbatch compounding Etc

Available capacity :

100 Kg/250 Kg/ 500 Kg/1000 Kg/2000 Kg/5000 Kg per batch

Plastic Grinder Machine

Useful Application :

- For crushing of Plastic Waste or For recycling of Plastic Waste
- For conversion of Big Size Plastic waste into 12 mm small chips.

Industries Served :

- Injection Moulding Machine / Blow Moulding Machine / Pipe Extrusions / Roto moulding / Plastic Recycling Plants / All type of Plastic product manufacturing Etc

Available capacity : 08 Inch / 12 Inch / 16 Inch / 18 Inch / 20 Inch/ 24 Inch/ 28 Inch/ 32 Inch/ 36 Inch/ 40 Inch.

High Speed Mixer Machine

Useful Application :

- To preheat the Plastic Raw materials like granules or Grinding Chips before extrusion
- To remove the outer surface moisture of Raw materials
- For homogeneous mixing and preheating of Granules and Powder resins or Granules and powder pigments.

Industries Served :

- Blow Moulding Machine / HDPE Pipe Manufacturing / Blown Film Plants / Tape Plants/ Plastic Recycling / Roto moulding / PVC Industries Etc.

Available capacity : 75 kg / 100 Kg / 150 Kg / 200 kg per batch

Roto Moulding Machine & It's Moulds

Useful Application :

- For making Plastic water tanks.

• Available capacity of Roto Moulding machine :
2000 Ltr / 5000 Ltr / 10000 Ltr (Rock N Roll
type & Bi-axial type both)

Available capacity of moulds :

200 Ltr to 10000 Ltr Available type of moulds :
Vertical CVT / Horizontal / Loft tank / Articles like
Dust bin, Road barrier, Flower pot Etc.ng Etc

Plastic Pulverizer Machine

Useful Application :

- To make powder from Virgin granules or Plastic grinding chips
- For conversion of Plastic Granules into Powder form.

Industries Served :

- PVC Pipes & Fittings manufacturing / PVC Profile manufacturing / Roto moulding water tank manufacturing / Master batch manufacturing / Pigment manufacturing Etc.

Available capacity : 50 Kg/hr to 500 Kg/hr

Material Storage Equipment

Useful Application :

- To bulk Store the Plastic raw materials like Virgin granules, Resin, Pigment powders etc. – Material Storage Silos
- To Store the small amount of Masterbatches – Material Storage Bins

Available capacity : 100 Kg to 100 Ton

Material Conveying Equipment

Useful Application :

- To convey the raw materials from one place to another place.

Available Models :

- Vacuum Loaders : To convey Plastic Granules from one place to another place
- Flexible Spring Loader : To convey Plastic recycling grinding materials from one place to another place
- Screw Conveyor : To convey any kind of raw material from one place to another place.
