Turbo Air Ventilator

Industrial
Exhaust Fan

Profile Sheet

Motorized Roof
Ventilator

About Us :

we “Creative Enterprise” are a leading Manufacturer of a wide range of Air Ventilator, Turbo Ventilator, Motorized Roof Ventilator, Industrial Exhaust Fan, Polycarbonate base turbo ventilator, FRP Base turbo ventilator etc. Situated in Ahmedabad (Gujarat, India), we have constructed a wide and well functional infrastructural unit that plays an important role in the growth of our company. We offer these products at reasonable rates and deliver these within the promised time-frame. we have gained a huge clientele across the nation

Wind driven Turbo ventilators are the ventilators that are powered by the wind to create effective ventilation for different industries. Turbine or Turbo ventilators are round metal vents with fins in them. Even the slightest breeze can be enough for the turbo ventilator to rotate. Rotation causes a centrifugal force on the tip of the fins which suck out the stale hot air from inside of the building. The faster the wind, the faster the turbine will rotate and exhaust the heat, smoke, fumes, humidity, etc.

Industrial Exhaust Fan Poultry Exhaust fan

We are leading manufacturer and supplier of Poultry Exhaust fan in Ahmedabad and dealing all over india. Poultry exhaust fans are essential components of poultry housing systems, providing ventilation to maintain optimal air quality, temperature, and humidity levels for poultry health and productivity.

Motorised Roof Turbo Ventilator

A Motorized Roof Turbo Ventilator is a ventilation system designed for buildings to improve airflow and regulate temperature. Unlike the traditional passive turbo ventilator, which relies on wind and natural convection to operate, a motorized version includes a motor that enhances airflow, especially during calm weather or in areas where wind is insufficient. These ventilators are commonly installed on rooftops of industrial buildings, warehouses, and even residential properties.

Thank you!
