

Global Finishing Systems

Solutions Beyond Horizon

About Us

GFS is dedicated to superior craftsmanship, affordability and honesty. These three exact principals, which we always strive to uphold, have separated us from other booth manufacturers and elevated us to one of the leading spray booth producers in the country. Our industrial designers and engineers are constantly innovating the way we see the spraying industry everyday. The experienced team will guide you to suggest the optimal production line for your budget. We are committed to provide dedicated local service & support with focus on accountability and quality control. This simply means walking you through every phase of the design and installation process, tailoring our manufacturing and account management support to your specific requirements, and ensuring the ongoing success of your spray booth training, service and operation. Our primary objective, whilst creating quality booths and equipment, is to provide the operator ease of operation and efficiency. This design and production fundamental will help expedite the overall production process saving a great amount time & money. In a few years, our booths will pay for themselves.

Our Solutions

Our New Products

Mobile Air Systems for Automotive Garages

It's suitable for filtering the dust, steam and harmful volatile gas generated during the painting process.

Portable Infrared Paint Curing Lamp

Application: ideal for automotive small area repairs.

Portable Infrared Paint Curing Lamp uses natural gas as its main energy source and adopts advanced infrared technology to produce infrared light of a specific wavelength. It can increase infrared utilization from 30% of the traditional lamp to more than 85%, greatly reduce the time spent on drying paint. Only 30-50s is required to dry putty and primer completely.
