Fenesta System Aluminium Series – Seamless Luxury

The newest entrant to the vast Fenesta product portfolio is a luxury range of System Aluminium windows and doors.

This series is a minimalist, ultra-modern, style statement designed to enhance the luxury quotient of living spaces.

Aluminium is extremely light with high strength to density ratio. It is sustainable, enjoys superior longevity and enhances the aesthetics.

Characteristics like these have made it a preferred choice for the real estate sector and has been in use since 1930 to construct several iconic landmarks.

Aluminium – The natural ‘Green’ material

After Silicon, Aluminium is the most abundantly available material in nature, i.e. on Earth's crust. Aluminium can be recycled infinite number of times without losing any of its inherent properties.

In fact, it is 100% recyclable! And what's more? The recycling can be done at just a mere fraction of the energy consumption of the initial input.

Over the years, the production process of Aluminium has been made even more efficient and the carbon footprint has been reduced by nearly 40%!

Usage of Aluminium as a replacement of wood in windows and doors, reduces deforestation and, in turn, global warming.

Fenesta System Aluminium Series – The Informed Choice

The benefits of choosing Fenesta System Aluminium Series are truly diverse

A. Minimalistic Design

Fenesta's design philosophy centres around minimalism, an essence of the modern times. Gone are the days of bulky windows and doors occupying large space. Fenesta System Aluminium windows and doors are seamless, contemporary and effortlessly elevate the aesthetics. The versatile products transform living spaces with new dimension of substance in simple yet elegant style.

B. Versatile Color Range

You can enhance the color of your home or office interiors with Fenesta System Aluminium windows and doors. These are available in 5 colors- White, Walnut, Light Oak, Diamond Grey, Champagne Gold.

C. Design Flexibility

With Aluminium framing options, imagination is limitless. It possesses an inherent strength of flexibility hence making the manufacturing of windows and doors

possible to exact specifications. With an endless array of systems, finishes and glass options, Aluminium offers a vast range of opportunities. From the cost-effective to most elaborate systems, Fenesta Aluminium Series also delivers excellent thermal performance.

D. Durability and Low Maintenance

Aluminium is corrosion-resistant which makes this material low-maintenance. Fenesta's Aluminium windows are resistant to wear and tear caused by the harsh weather. They do not split, crack, swell or lose shape ensuring durability and elongated product life.

E. Recyclability

Aluminium is known to have the highest recycling ability with least amount of energy required. As a result, it is environmentally sustainable and 'green'. This inherent property differentiates it from other framing resources.

Fenesta System Aluminium - Product Portfolio

Ultra Luxury Series (Thermal Break System)

- Slim Line Slider Doors
- Lift & Slide Doors
- Slide & Fold Doors

Super Luxury Series

- Slider Doors
- Slider Windows
- Casement Doors
- Casement Windows
- Tilt and Turn Windows

Ultra Luxury Series

The Ultra Luxury Series is enhanced with the power of Thermal Break. Built to last and offering high aesthetic value, this range provides solutions to modern day problems of durability by being manufactured using innovative technology and is environment friendly.

Thermal Break

Thermal Break, which is better known as 'insulation within the window' is a continuous barrier between the inside and outside window frames that insulate against heat transfer. The interior and exterior metal frames of the window sash are bonded with a layer of Polyamide that keeps the interior space of windows at a more comfortable temperature, impacting the room temperature as well.

Sleek Finish

Thermal Break System

Double Glazing

Slim Line Slider Doors (Thermal Break System)

Fenesta's range of Slimline Sliding Doors offers minimally visible aluminium sight lines, which maximizes the view you get. With a great balance of functionality and style, these System Aluminium doors add exquisiteness to the façades they are used in.

Features

- Thermal Break profile offers high energy efficiency
- Aluminium frame concealed within the walls, maximizing natural light in the room
- Minimal sightlines of 25mm at interlock and semi-submerged threshold
- Special concealed profile section allows for hassle-free water drainage
- Up to 500 Kg weight capacity – offers the possibility of installing large and special glasses
- Options also available in corner slider

Elegant Finish

Thermal Break System

Large Aperture Size

Lift & Slide Doors (Thermal Break System)

Fenesta innovates with the new Ultra Luxury Lift & Slide system. This is a much sought-after choice for covering large spans that link inside with outside. The robust system provides high level of thermal insulation and flexibility in construction because of profile stiffness. These stunning looking doors glide back and forth on feather touch Inox rollers, effortlessly. Incredibly smooth to operate, Lift & Slide allows for seamless integration of living or working environment into the surrounding nature, with almost no barriers, giving you a sense of amazingly wide spaces.

Features

- High level of thermal insulation
- Child safety mechanism with dampener
- Large aperture sizes (up to 4 m height and 350 Kg sash weight)
- Resistance to high speed winds upto 3000 Pa
- Flexible system – 2 track and 3 track

Elegant Finish

Submerged Threshold

Unobstructed View

Slide & Fold Doors (Thermal Break System)

Thermal Break Slide and Fold Aluminium Door by Fenesta can open partially for easy access or wall to wall for an unobstructed view. These doors are energy efficient, built to last, and provide better ventilation along with enhanced heat insulation to keep the temperature cool inside. Seamlessly blending your home's interiors and exteriors, Fenesta's thermal break Slide and Fold Doors will change the way you see doors.

Features

- Efficient heat insulation
- Submerged Threshold: easy accessibility of wheelchair
- 125 Kg Weight Carrying Capacity per sash, allows higher glass weight & size
- Provides for expansive opening

Super Luxury Series

Fenesta introduces Super Luxury System Aluminium Windows that deliver a minimalist and ultra-modern style statement. With styles ranging from casement to tilt and turn to sliding windows, these system Aluminium Windows are premium in design while offering diversity in use. Featuring slimmer frame and widths along with more glass area, this range of system Aluminium Windows by Fenesta helps set the tone to create brilliant spaces.

Graceful Lines

Slim Interlocks

Smooth Sliding Operations

Slider Door

The sliding doors offered by Fenesta are in perfect harmony with modern architectural styles and score high on functionality. With exceptionally graceful lines, an easy gliding operation and a robust design language, System Aluminium Sliding Doors by Fenesta are sleek and practical in the same breath.
