3D DESIGN & IDEA

3D VIEW & DESIGN

Interior landscaping

- **Interior landscaping** – with wide experience and exposure we offer indoor plantscaping services in Delhi NCR, we are engaged in providing quality plants and planters. Professional plantscaping is great addition to visual ornamentation as well as a boost to the indoor air quality.

GREEN GIFTING

- **Green Gifting** is relatively a new idea getting immensely popular, gifting flowers or lifeless stuff could be easy to avail and handover, but gifting a gift which is alive, breathes, smiles and helps to clean the air, is something special, it reflects higher level of consciousness.

VERTICAL GARDEN

- **Vertical Garden** is the hottest trend nowadays and we proudly present ourselves a prominent player in the field, we possess skills to make your vertical garden a success. We are known to be specialist for vertical gardening who follows scientific approach to create durable green walls.

Vertical garden

A cluster of autumn leaves in shades of yellow, orange, and red, positioned in the upper left corner of the slide.

Several studies reveal, modern sealed buildings are 10 – 15 times more polluted than the outdoors, there are various chemical agents present in and around living areas, modern construction techniques, use of synthetic materials, poor ventilation, electronics, flooring etc emit life threatening gases, a long exposure leads to catastrophic diseases. Green villa is the best way to neutralize them, wisely chosen plants create exotic paradise in and around the house.

We design and implement incredible green roofs that appeal to visitors, homeowners and businesses. Green roof lasts longer than conventional roofs, reduces energy cost, offers peaceful retreats, it helps improve air quality, contributes to reduce urban heat island effect, supplements vegetation without disrupting structure as it utilizes free space.

- **Frequently Asked Questions**

- **1. What is Landscaping?**

- Landscaping is planning and execution of a set of activities to transform appearance of a space, landscaping has two major branches softscape and hardscape.

- **2. What is difference between softscape and hardscape?**

- Softscape covers soft changes to a space while hardscape deals with structural changes. Installing plants, planters, grass etc are example of softscape while developing pathways, water features are examples of hardscape.

- **3. How to start landscape development work?**

- First step is inspection of the space, Second is defining objectives, Third is creating a base plan, Fourth is developing drawings, Fifth is creating list of materials and Sixth is coordinating & executing the plan.

- **4. How much is the cost of developing landscaping plan?**

- Its completely depends on nature of work and coverage area, landscape architect charges start from 25K INR.

- **5. What is landscape development cost in India?**

- Landscape development cost depends on nature of work and type of resources required.

DAILY

- Observe the plants
- Notice if plants look wilted
e.g. if they have faded leaves
e.g. show rotting bases or browned leaves
- Also notice if they have new buds or have made new roots

FORTNIGHTLY

- When using a manual fertigator system top up your fertiliser.
We recommend (Hortico):
Spring / Summer - 2 tsp every 2 weeks
Autumn / Winter - 2 tsp every 3-4 weeks

MONTHLY

- Observe plant health and adjust water timing if necessary
- Remove dead leaves
- Remove any dead plants and replace
- Clear drain of any debris
- healthyspray of Seasol (or similar) to keep the garden looking healthy and lush.

EVERY 2 MONTHS

- When using an automatic fertigator system

EVERY 3 MONTHS

- Clean the filter
- Use ladder to visually check drip emitters
- Change the timer battery

TIP: Use your ECalendar

Add these events to your electronic calendar and use the repeated events feature with reminders. Copy and paste this info for each frequency listed.

LIABILITY STATEMENT –

R.S Enterprises is not responsible or liable for care and maintenance of plants used in our R.S Enterprises living wall panels wall systems, Root Wrappers or any other products or services. R.S Enterprises is not responsible or liable for water damage to interior or exterior of buildings, homes, or finishes due to misuse or accidental moisture dripping from plants, lack of maintenance of watering systems, or for any reason for moisture damage or loss due to damages of any kind.

It is up to the purchaser to properly protect all surfaces from water exposure or overflow by providing water catchment drain trays and/or vapour barriers to areas of potential damage. We also recommend the hiring of qualified landscape maintenance professionals to assist with plant selection, planting, watering, feeding, pest control, lighting, and general maintenance to assure optimal health for the living wall.
