

METRO LASER

An ISO 9001-2015 Company

We Provide the Excellent Laser Cutting

Stop Searching. Start Sourcing.

Company Profile

Metro Laser is setting new standards in high-precision laser cutting and bending.

Located in the industrial hub of Pune, Metro Laser specializes in sheet metal laser cutting and bending services. We also provide custom laser engraving on metal substrates.

We have established a culture of excellence across the organization; the repeat orders at our workshop are a testimony of our dedication to quality. Through our focused solutions, we create competitive advantage and bring real benefit to our clients' business.

Vision

To be a market leader in India, offering the full range of metal profiling services conveniently under a single roof.

Mission

To optimize production cost and improve lead times for our clients through reliable, quality-centric laser cutting and bending services.

Values

Precision

Ensure a high degree of accuracy in every job

Commitment

Meet delivery timelines - first time, every time

Health & Safety

Enforce the best industry standards in health & safety

Integrity

Maintain clarity & transparency in work

- Competitive pricing
- Reliable and rapid-response service
- Customized solutions

Reliability through Quality and Integrity

Our Services

Laser Cutting

Equipped with state-of-the-art Japanese machinery, Metro Laser undertakes complex laser cutting and laser engraving jobs for cross-industry applications. We excel in accurately cutting sheet metals to precise dimensions as per your design. Our company is known for high-speed output at cost-effective prices, while maintaining stellar accuracy in each piece.

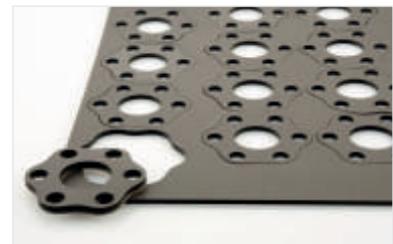

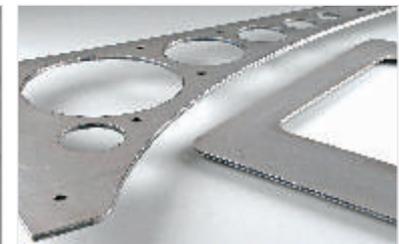

Specifications

Make : **MADA**
Type : Fiber Laser
Bed Size : 1500 x 3000

Cutting Capacity

Mild Steel : 1 - 19 mm
Stainless Steel : 1 - 15 mm
Aluminium : 1 - 12 mm
Brass : 1 - 8 mm
Titanium : 1 - 5 mm
Copper : 1 - 6 mm

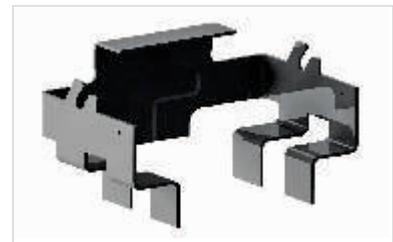

CNC Bending

We meet all your sheet metal bending needs with efficacy, with the ability to fold up to a length of xx meters. Whether it is a single, one-time job or a batch comprising multiple components, we ensure accuracy right from the first to the last bend.

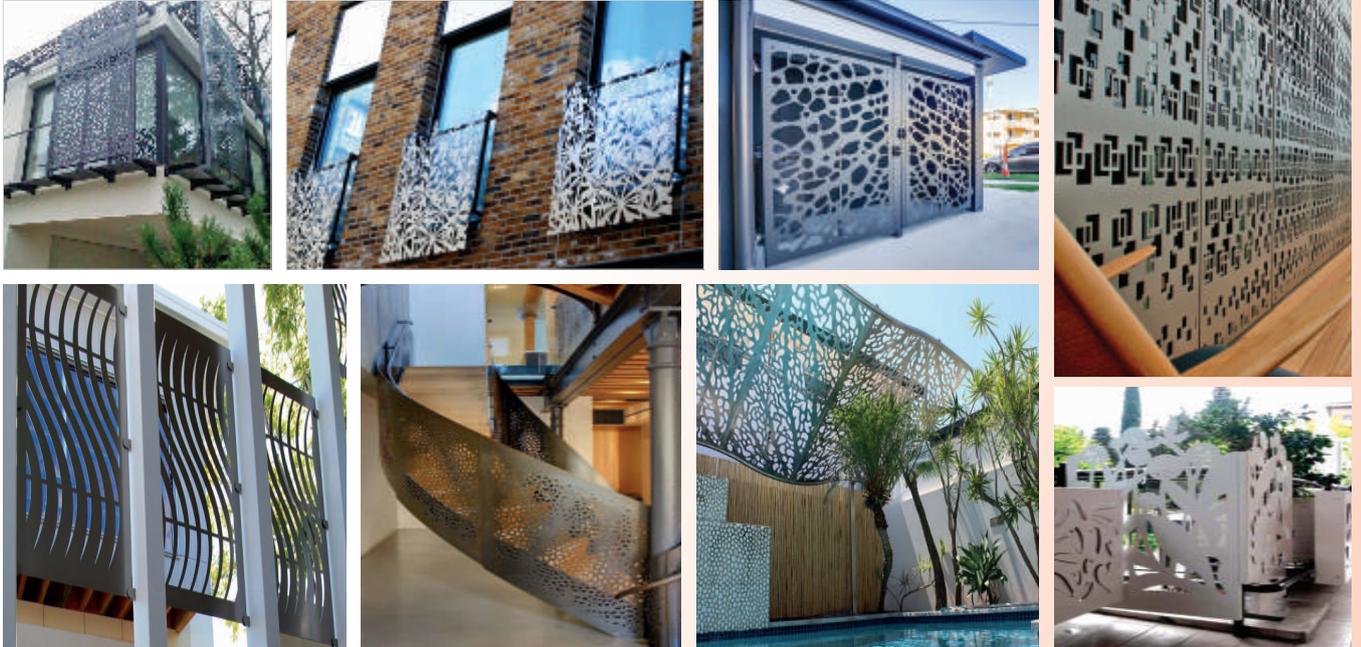

Specifications

Make : **Yawei**
Type : CNC Press Brake
Max Bend Length : up to 3000 mm
Force : 220 Ton
Material Thickness : 1 - 10 mm

Architectural Services

We provide a wide range of innovative metal designs and elements for architects, interior designers as well as household customers. Standing at the intersection of engineering and creativity, we make eye-catching patterns that enhance the décor of the given space.
