ONE STOP SOLUTION FOR ALL YOUR

PACKAGING NEEDS

ABOUT US

Mehta Industrial Solutions is a leading provider of high quality, customized packaging solutions. Located in Makarpura GIDC Estate, we have all types of materials and machinery to produce and provide the Perfect Packaging products to meet the specific requirements of our customers. From Multinational Corporations to small scale companies, we are committed towards providing high quality, sustainable, unique and pocket friendly packaging solutions to a wide range of companies.

PP BUBBLE GUARD PRODUCTS

PP [Poly Propylene] Bubble Guard Sheets are multi-layered plastic boards featuring a unique circular honeycomb or bubble core sandwiched between flat outer layers. This structural design makes them incredibly lightweight, impact resistant, water proof and reusable.

We use High Quality PP Bubble Guard Sheets to produce PP Bubble Guard Boxes, Bins, Trays etc., according to customer demand, these products are available in various sizes, GSM and colors as per the requirement, also these boxes and bins are eco-friendly as they can be reused multiple times, reducing waste and reducing costs.

PP CORRUGATED PRODUCTS

PP [Poly Propylene] Corrugated Sheets are used across multiple industries for packaging, construction protection and signage because they are Light Weight, Durable and Moisture Resistant.

PP Corrugated Products can be customized in different sizes, shapes according to design and these also provide customizing printing options for different industries. The Biggest advantage of PP Corrugated products is that they are Reusable, Returnable and Collapsible, making them the best choice for Packing and transporting your products both economically and sustainably.

PP BOX with
EPE Foam Fitments

We offer Different types of PP Corrugated Products like:-

- PP Corrugated Boxes, Bins and Trays
- PP Corrugated Boxes with EPE Foam Fitments
- PP Corrugated Boxes with EVA Foam coating
- PP Corrugated Inserts and Separators
- PP Auto-foldable & Locking Boxes with partitions
- PP Export Quality Heavy Duty Boxes

PP auto-foldable box
with partitions

PP Bins

PP Corrugated
Boxes

PP Heavy
Tray

PP BOX
with EVA Foam

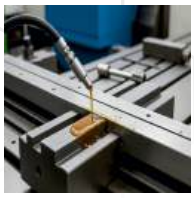
PP Export Quality
Heavy Duty box

INDUSTRIAL OILS

GEAR OILS & GREASES

HYDRAULIC OILS

LUBRICATION OIL



METAL WORKING FLUIDS

Neat Cutting Oils | Water Soluble Cutting Oils

RUST PREVENTIVE OIL

Oil Based | Solvent Based | Water Based

VCI PAPER

VCI PAPER consists of a layer of VCI Molecules on high quality paper, which releases and forms a coating on metal parts when bought in contact by wrapping, interleaving or lining metal parts inside an enclosed space.

VCI Paper is available in forms of Rolls, it basically consists of two kinds: -

1] Non-Laminated VCI Paper: It contains only two layers one of VCI Molecules and other of high quality Paper.

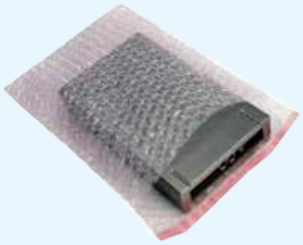
2] Laminated VCI Paper: It contains three layers, consisting the non-laminated VCI paper with a tough plastic layer to enhance its strength and sturdiness.

VCI PRODUCTS

Vapor Corrosion Inhibitor {VCI} Poly Films are specially designed anti corrosion packaging films infused with protective chemical compounds. These films continuously release invisible non- toxic vapors that form a microscopic protective layer on the metal surface blocking it from moisture, oxygen and contaminants triggering oxidation.

VCI Poly films are available in different thickness, sizes and forms like VCI poly film Rolls, Bags and 3D Covers.

AIR BUBBLE PRODUCTS



Air bubble packaging is the most cushioning and pocket friendly material made up with plastic with air pockets covering its surface for shock absorption during transportation.

It is available in different strength, colors and categories like air bubble rolls, bags and covers according to customers requirements.

ALUMINIUM BARRIER FOILS

Aluminum Barrier Foil is a high performance multi layered laminated material used in heavy duty industrial applications and sensitive component protection by Vaccum Packaging.

It is mostly used in applications like steel wire and metal coil protection, chemical and petrochemical liners, defense and aerospace parts, electronics and energy storage etc. Aluminum barrier foil is available in different thickness, sizes and forms like rolls, Bags and covers.

EPE FOAM PRODUCTS

Expanded Polyethylene {EPE} Foam is durable, chemical resistant and water proof material that is often used in cushioning and shock absorbing applications, its unique feature is that it can regain its shape and strength after shock and sudden impact.

EPE Foam is available in forms of Sheets, Rolls, Bags and EPE Fitments are also designed to fit specific products and provide a proper and secure fit.

PET TRAYS

Pet Trays provide part specific secure packing at a very reasonable price, these trays can carry many parts at one time according to design and are considered very less laborious and safe packing option.

These trays are made in different thickness and sizes according to the part dimensions and weight.
