# THE SHARK STORY..

Shark Certification Private Limited is a professionally managed company engaged in providing various Global Certifications, Consultancy & Trainings. We have a well-established track record and our services have always met with great customer satisfaction. We offer excellent client services at a very competent price and have never been known to compromise on the quality of our services. We have a strong team of skilled Consultants, Auditors, Assessors, Trainers, Industry Experts & Client Servicing Staff to deliver better & on time services and they are prepared & eager to take new challenges every time.

Founded in 1997, SCPL has completed 500 full-fledged Certification & Consulting projects assisting system implementation as per the standard requirements. We have the presence in 5 states across India with a network of 10000+ SMEs. Our team of 45+ professionals serve clients from various diversified industries e.g. Textiles, Machine Tools, Apparel, Agriculture, Engineering, Chemicals, Food Processing, Healthcare & Pharmaceuticals, Telecom, Education, Govt. Institutions, Automobile, Construction, Warehousing & Infrastructure, and FMCG.

We also train and educate clients' employees to make them more productive and work as per organizations framed system and evolve them to be better professionals, who contribute to the growth of the organization. Further, we create networking opportunities for our group of clients where they generate and exchange resources with each other. Lastly, we train our clients on various aspects of business thereby enhancing their knowledge, time to time updating them with changes and amendments in laws, statutory legal requirements, notifications and any other information important to their business perspective.

WE ASSIST ORGANIZATIONS  
TO ACHIEVE **NEW STANDARDS**  
IN BUSINESS.

To **build & sustain** a Position  
of **LEADERSHIP** by providing  
quality oriented services  
across India in the field of  
certification, consultancy and  
other potential areas.

- Excellence in all pursuit.
- Innovation and Creativity.
- Professional Development of our team.
- Honest and Result oriented culture.
- Respect Paperwork  
(Everything in business will be on record / documented).
- Respect for people  
(Our clients, associates and employees).
- Build trust and confidence.

# MANAGEMENT SYSTEM

- ISO 9001: 2015
- IATF 16949 (AUTOMOBILE)
- ISO 29990:2010

The International Standards specify requirements for quality management systems where an organization needs to demonstrate its ability to consistently provide a product that meets customer and applicable regulatory requirements and aim to enhance customer satisfaction through the effective application of the system, including processes for continual improvement of the system and the assurance of conformity to customer and applicable regulatory requirements. The ISO 9001 certification defines good management practices and aims at providing a global standard that spells out quality and trust. A quality management system can be used by a company in any industry. Since the standard is neither industry- nor product-specific, it may be used by any organization that provides a product or service. The ISO 9001 standard enables the company to develop a Quality Management System (QMS) to meet customer quality requirements while progressively improving operational processes. It provides the company with a set of principles that ensure a common-sense approach to the management of your business activities to consistently achieve customer satisfaction.

# ENVIRONMENT, HEALTH & SAFETY MANAGEMENT

- ISO 14001: 2015 ems
- ISO 45001:2018
- ISO 29000 PETROLEUM & GAS

The ISO 14000 family addresses various aspects of environmental management The following are the composition of the standards:

- Environmental Management Systems (EMS)
- Environmental Auditing and Related Environmental Investigations (EA)
- Environmental Labeling (EL)
- Environmental Performance Evaluation (EPE)
- Life Cycle Assessment (LCA)
- Terms and Definitions (T&D)

The ISO 14001:2015 certification provides a framework for a strategic approach to a company's environmental policy, plans and actions. This provides the generic requirements for an environmental management system. Following are some of the essentials of our service.

## Requirement of ISO 14001 organizations

- Establish an appropriate environmental policy Identify the environmental aspects arising
- from the organization's past, existing or planned activities, products, and services, in order to determine the environmental impact of significance. Identify applicable legal and other requirements, to which the organization subscribes Identify priorities and set appropriate
- environmental objectives and targets Establish a structure and programs to implement the
- policy and achieve objectives and meet targets Facilitate planning, control, monitoring,
- preventive and corrective actions, auditing, and review activities to ensure both that the
- policy is complied with and that the environmental management system remains
- appropriate Be capable of adapting to changing circumstances
-

# MEDICAL, PHARMA & TESTING

ISO 13485:2016

AYUSH PREMIUM/STANDARD PRODUCT

The Ayush products are regulated under the Drugs and Cosmetics Act, 1940 by the Drugs Controller General of India through the State Governments. The Department of AYUSH has been exploring the possibility of introducing a voluntary product certification scheme for selected AYUSH products to enhance consumer confidence. The matter was discussed in a series of meetings taken by the Secretary (AYUSH) beginning 24 Dec 2008 and the Quality Council of India (QCI) offered to develop a concept paper on the subject.

**The Scheme is based on criteria for certification. It has two levels:**

- Ayush Standard Mark which is based on compliance with the domestic regulatory requirements
- Ayush Premium Mark is based on GMP requirements based on whom Guidelines and product requirements with the flexibility to certify against any overseas regulation provided these are stricter than the former criteria.

Under this scheme, each manufacturing unit would obtain a certification from a approved certification body (CB) which is accredited to appropriate international standards by the National Accreditation Board For Certification Bodies (NABCB) and will be under regular surveillance of the certification body.

# SCPL FLAGSHIP PRODUCTS

- SFP+ (FOOD CONSULTANCY & COMPLIANCE UNDER AMC AMC)
- CSAP (COMPLIANCE SAFETY AUDIT PROGRAM)

Safety audits are the quintessential step toward recording, evaluating, registering, and reporting operational and management data to ensure the overall health and safety management system. This post highlights the types of safety audits and why there is a critical need for it.

**There are three significant categories of safety audits, segregated based on the information they contain. Following are the three types:**

- Compliance Audit
- Program Audit
- Management System Audit

Safety audits are the quintessential step toward recording, evaluating, registering, and reporting operational and management data to ensure the overall health and safety management system. This post highlights the types of safety audits and why there is a critical need for it.

## **Need for a Safety Audit:**

1. Routine Inspections to ensure compliance with norms:
2. Identifying, drafting, and communicating safety violations:
3. Dealing with the management and safety adherence by staff:
4. Periodic examination of the machinery
5. Ensuring compliance with the OSHA Safety Audits and other regulations:
6. Recommendations for improving company safety:

# PRODUCT CERTIFICATION

- BIS (ISI) MARKING
- CE MARKING NOTIFIED
- UL MARKING
- ROHS

‘Agmark’ is a Quality Certification Mark of the Government of India given to products confirming to scientifically laid down quality standards.

## **Products commonly certified under AGMARK**

1. Honey
2. Ghee, Butter
3. Chilies, Turmeric, Curry powder, Garam Masalas, Cardamom, Cumin, Coriander, and other curry powders.
4. Vegetable Oils
5. Spices
6. Wheat, Atta, Maida, Suji, Besan, Pulses, and many more items are required by customers.

## **Certificate of Authorization**

It is given to the packers authorizing them to grade their Commodity under AGMARK. The period of Validity will be 5 years. For granting a new certificate of authorization separate application for each commodity should be produced.

# ORGANIC CERTIFICATION

- GOTS (TEXTILE)
- NPOP, MOP (USDA)
- EU ORGANIC
- BIOSUISSE (SWITZERLAND)
- KOREAN ORGANIC
- JAS (JAPANESE ORGANIC COSMOS)

The Global Organic Textile Standard (GOTS) is recognized as the world's leading processing standard for textiles made from organic fibers. It defines high-level environmental criteria along the entire organic textiles supply chain and requires compliance with social criteria as well.

The new version of GOTS is a result of a comprehensive stakeholder input process in which various organizations with expertise in organic production, textile processing and social criteria participated. It follows the overall approach of GOTS to define high level verifiable environmental criteria throughout the entire processing chain of apparel and home textiles (including spinning, knitting, weaving, wet processing, manufacturing, and trading) made from a minimum of 70% certified organic fibers and requiring social criteria while still providing for a practical set of requirements that is technically achievable even in large scale industrial textile production and for mass market brands and retailers in order to achieve a considerable environmental and social impact in the textile industry.

# SOCIAL ACCOUNTABILITY & SUSTAINABILITY

- SEDEX (2 & 4 PILLAR ASSESSMENT)
- SA 8000
- FAIRTRADE
- GREEN BUILDING
- CARBON CREDITS
- RTRS
- FSC
- BONSUCRO
- SUGARCANE
- EFSIC GTP

Green building takes sustainable development concepts which can then be applied to a vast array of practices tied to construction. There are many different approaches to take when maximizing the sustainability of a building's design. Green doesn't have to be about achieving the best green rating possible; every little green bit helps! Dovetail has put together a list of eight basic green building concepts to take into consideration.

## **Important Areas to Consider When Building Green:**

- Climate and Locale
- People Matter
- Think Small
- Cool Naturally and Heat Efficiently
- Go Native
- Old Before New
- Insulate and Ventilate

# FEED SAFETY ASSURANCE PROGRAM

- FAMI QS
- GMP+
- ORGANIC PET FOOD
- GTP

Feed Safety and Quality are key issues for all companies handling feedstuffs and can have serious consequences when control is lost. A systematic approach is imperative for reducing risk and improving quality. Companies seeking to internationalize their business in Europe must be certified to a standard recognized by the GMP+ International (former PDV) organization. The GMP+ certification is also recognized by other feed certification schemes.

**B1** is mandatory for the production of compound feed, but can also be used for the production of feed materials and transport.

**B2** can be used for the production of feed materials and additives, while **B3** is intended for trade and transshipment. Each of

these standards is intended for different means of feed transport (e.g. B4.1 is intended for truck transport). All steps in the supply chain are thus covered by the given requirements.

# FOOD SAFETY CERTIFICATIONS

- ISO 22000:2018 FSMS
- FSSC 22000
- HACCP CERTIFICATION
- FAMIQS
- GMP, CGMP
- CHQ7
- CODEX GMP
- WHO GMP
- EU GMP
- INDIAN GMP
- BRC
- IFC
- FSSAI
- KOSHER
- HALAL
- USFDA
- NON GMO
- INDIAN HACCP
- 

ISO 22000: 2005 stands for food safety management system. It is a prevention-based food safety system that identifies and prevents microbial, chemical, and other hazards in the food-based industry. It is applicable to all organizations, regardless of size, which is involved in any aspect of the food chain and wants to implement systems that consistently provide safe products. The means of meeting any requirements of this International Standard can be accomplished through the use of internal and/or external resources. This International Standard ISO 22000 certification specifies requirements to enable an organization to plan, implement, operate, maintain and update a food safety management system aimed at providing products that, according to their intended use, are safe for the consumer.

# GFSI CERTIFICATION

- FSSC 22000
- BRC
- BEST AQUA CULTURE PRACTICE
- GLOBAL G.A.P.
- IFS
- SAFE QUALITY FOOD

The BRC Global Standard is for Food Safety. This certification many times becomes necessary for doing business with UK and many European retailers and other global retailers. This food quality standard focuses on HACCP (Hazard analysis critical control point), food safety management system, competence of personnel performing various processes that has effect on food quality and various controls on processes, raw materials, infrastructure and work environment. This standard is most applicable to manufacturers of food contact packaging for retailers labeled products and branded products as well. Manufacturers have an obligation to put appropriate systems and controls in place to ensure the suitability of their packaging for safe food use.

## Benefits Of BRC Registration

- Customers, employees, stockholders, and competitors develop sustainable trust in the organization's commitment to food safety and/or packaging regulations
- Operating costs, efficiencies increase and non-compliance penalties reduce
- Improved credentials to supply retailers
- An enhanced food safety and food safety management system
- A demonstrable commitment to producing safe food. Increased customer confidence in your product's safety and quality.

# I.T & I.T.E.S CERTIFICATION

- ISO 27000 ISMS
- ISO 20000 ITMS
- CMMI LEVEL

The ISO 27001 standard adopts a process approach for establishing, implementing, operating, monitoring, reviewing, maintaining, and improving an organization's information security management system. ISO 27001 is the only auditable international standard that defines the requirements for an Information Security Management System (ISMS). The standard is designed to ensure the selection of adequate and proportionate security controls.

This helps you to protect your information assets and give confidence to any interested parties, especially your customers. The standard adopts a process approach for establishing, implementing, operating, monitoring, reviewing, maintaining, and improving ISMS.

## **Benefits Of Implementing ISO 27001:2005 Certification**

- A valuable framework for resolving security issues
- Enhancement of the credibility of any company
- Risk management in security implementation
- Enhancement of security awareness in an organization
- Assists in the development of best practices
- Reduces the possibility of fraud or any other risk
- Getting new business opportunities

We are a single source solution provider company offering consultancy and implementation services for all ISO standards and other International & Indian standards. As a leading ISO consultant in India, our portfolio includes a wide range of certification services mentioned earlier. We provide consulting, system awareness training and implementation services related to those standards to various organizations of different nature and size. We always deliver our best to exceed the expectations of our valuable clients with our value-added services.

## Our Consultancy and implementation services also includes following:

- ▶ ALL DOCUMENTATION  
(POLICIES, PROCEDURE, MANUAL, FORMATS ETC.)
- ▶ GAP AUDIT, IMPLEMENTATION ROAD MAP
- ▶ INTERNAL AUDITS
- ▶ QUALITY INSPECTIONS
- ▶ MOCK & RECALL MECHANISM.
- ▶ CERTIFICATION & OTHER AUDIT ASSISTANCE.
- ▶ INTER DEPARTMENTAL AUDIT MECHANISM.
- ▶ SAFETY, LEGAL & STATUARY COMPLIANCE.
- ▶ BUYER SPECIFIC CHECK LIST COMPLIANCE.
- ▶ TRAINING'S & AWARENESS.
- ▶ TESTING, CALIBRATION & QUALITY CONTROL
- ▶ WAREHOUSING & TRANSPORTATION MECHANISM.
- ▶ SUPPLY CHAIN INSPECTIONS.
- ▶ VENDER CONTROL.
- ▶ PRODUCT LABELLING VERIFICATION  
(SPECIALLY IN FOOD INDUSTRY)
- ▶ APPLICABLE REGULATORY COMPLIANCE  
(LIKE FSSAI COMPLIANCE FOR FBO'S.)
- ▶ PROJECT CONSULTANCY FOR ESTABLISHMENT  
OF PLANT, LABORATORIES, WAREHOUSING ETC.
- ▶ DISCUSSION ON CASE STUDIES.
- ▶ REGULAR UPDATES & TIME TO TIME AWARENESS  
TO CLIENTS.

### SPECIFIC CONSULTANCY FOR FOLLOWING STANDARDS

## Our Flagship Annual Consultancy Programs

Getting your ISO standards and other related quality standards is easy, but maintaining the certificate with the requirements is a challenge. In SCPL Consulting, we realize this being a real issue with small and medium organizations due to limited resources and skills.

SCPL team has designed few AMC Programs for the Industries, we also customise the AMC programs which are cost effective & suits your company's individual needs with a regular monitoring and implementation throughout the year on a monthly basis.

# Training's

We organize various short term training courses/programs for various ISO standards, other certifications and for Quality & business excellence in various kind of industries. Few training's are Industry or products specific but maximum are the requirement of almost all industries. Regular Training programs are organized at either client's place, in our offices or at any other venue suitable to our clients. Specific and value added Training's we conduct in some good Hotels like mostly we prefer Marriott or Radisson group Hotels.

Our trainers are having rich experience & exposure of conducting awareness, safety, internal auditor and other training, have so far we conducted more than 400 public and private training programs where in we train more than 5000 people. We combine effective teaching methods including exercises, workshops, lectures and interaction. We will ensure that the attendees of our sessions are fully equipped in order to confidently implement the material they've been provided with.

Reasons to opt our Training services :

## **Experience and knowledge**

Our trainers are not just any other trainers. They have vast industrial and assessment experience. They have not only worked in different industries but they are also excellent assessors. They therefore know what it means to implement a successful management system and they will provide you with the training that will ensure this.

## **Innovation**

We believe in providing innovative solutions for everything including training. We will look for the best way to transfer knowledge and skills to your staff. Our aim is to ensure that your employees develop the practical skills needed for effective implementation of the management system.

## **WE ORGANISE TRAINING COURSES FOR THE TOPICS LISTED BELOW.**

### **TRAINING'S ON BUSINESS & PROCESS EXCELLENCE**

- Risk Assessment & Mitigation
- Food Safety & Hygiene Training's
- Standards Awareness Training
- Competency Mapping Program
- Work Place & Safety Trainings
- Incident Mgmt. & Accident Investigating skills
- On Site Mock Drill (As per Legal Compliance)
- Customised Training based on assessments
- Global labour law (ILO) based Trainings.

### **CERTIFIED TRAINING'S**

- Certified LEAD AUDITOR (for All ISO Standards)
- LEAD AUDITOR - FSSC
- Certified Internal Quality Auditor
- PCQI (Preventive Control Qualified Individuals)
- FoSTaC (Basic, Advance, Special)
- C-SAP Approved Training's
- Six Sigma Green Belt, Black Belt
- Lean Six Sigma, 5S
- Kaizen
- IATF Internal Auditor
