

For an organized work space and Increased productivity

Take away conveyors are an important feature in ensuring a packaging process runs as smoothly as possible. Unless elevated by a platform or other structure, bagging machine often leave product just a short distance up from the floor.

Take away conveyors bring those bags to a working height to move onto a rotary collection table or other end-of-line.

Packaging process –saving manual labor time with every bag and reducing repetitive back strain for employees.

User Benefits:

- ✓ Flexible and fully adjustable.
- ✓ Saves time by enabling operators to have more time packing and less Time moving finished product
- ✓ Improves work environment by conveying the product to bench height, Which reduces the need to pick product from filled bins.
- ✓ Low profile design maximizes existing work areas with limited space
- ✓ Stainless Steel Construction
- ✓ Heavy Duty Food Grade Plastic Belt
