Dear Sir/Madam

Greetings from Hot & Cold Solutions! Thank you for your interest in our product.

Hot & Cold Solution has been providing trusted tea and coffee vending solutions since 2010, renowned for its exceptional service, high-quality products, and outstanding taste experience. With our modern vending machines and premium ingredients, we have earned the trust of numerous offices, hotels, corporate entities, and commercial establishments. Our objective is to deliver excellent taste, convenience, and consistent quality in every single cup.

Our Offering:

Fresh tea leaves are packaged in special packaging to preserve their freshness, and then our modern vending machines brew them to the perfect consistency; they then create a cup of tea that will delight your senses.

Products: There's a wide range of teas and coffees to choose from – cappuccino, espresso, latte, Americano, and over 16 other varieties. We also offer several tea varieties (plain, masala, cardamom, green tea, and flavored green tea) for those who prefer tea over coffee; these teas are brewed using tea bags. The machine also offers options for hot water only and hot milk only.
