

Multi-Functional Double Head Veg Cutting Machine-EQ603D

Introducing our advanced **Multi-Functional Double Head Vegetable Cutting Machine**, a versatile and powerful solution for large-scale commercial kitchens, food processing units, and catering businesses. This innovative machine is designed to significantly enhance productivity by offering two independent cutting heads, allowing for simultaneous processing of different types of vegetables or achieving different cuts at the same time. Crafted from high-grade stainless steel, it ensures durability, hygiene, and easy maintenance, making it an indispensable asset for efficient vegetable preparation.

✦✦ Key Highlights

- **Dual Cutting Heads:** Features two independent processing sections, one ideal for leafy vegetables (like conveyor belt feeding) and another for root vegetables, offering unmatched versatility and efficiency.
- **Variable Cutting Options:** Capable of producing a wide range of cuts including slices, shreds, dices, juliennes, and strips, adaptable to various culinary needs.
- **Precision and Uniformity:** Delivers consistent and uniform cuts every time, which is crucial for product presentation and even cooking.
- **High-Grade Stainless Steel Construction:** Built with food-grade stainless steel for superior hygiene, rust resistance, and easy cleaning, meeting strict food safety standards.
- **Adjustable Cutting Speed & Thickness:** Equipped with user-friendly controls to adjust cutting speed and desired thickness, providing flexibility for different vegetable types and recipes.
- **Conveyor Belt System:** One head features a conveyor belt for continuous feeding of leafy or long vegetables, ensuring smooth operation and reducing manual effort.
- **Safety Features:** Incorporates safety mechanisms and warning labels to ensure secure operation in a professional environment.
- **Mobility:** Fitted with durable wheels (casters) for easy relocation and movement within the kitchen or processing facility.

Technical Specification

Model No.	EQ - 603D
Made by	Stainless Steel
Size	820*570*920mm
Net Weight	95Kg
Power	0.18*2+2.2KW
Voltage	220v 50hz
Capacity	850kg/hr.
Retail Price	Rs. 395000

🔊 Applications

This Multi-Functional Double Head Vegetable Cutting Machine is ideal for various commercial settings where high-volume and diverse vegetable processing is required:

- **Large Commercial Kitchens:** For restaurants, hotels, and institutional kitchens needing to prep a variety of vegetables quickly.
- **Food Processing Plants:** Perfect for preparing vegetables for ready-to-eat meals, frozen food products, or packaged salads.
- **Catering Services:** Efficiently handles large quantities of vegetables for events, banquets, and mass food production.
- **Salad Bars & Deli Counters:** Rapidly preparing fresh vegetables for salads, coleslaws, and sandwich fillings.
- **Industrial Canteens:** Streamlining vegetable preparation for daily meals served to a large workforce

Perfect for:

- Hotels & Restaurants
- Commercial Kitchens
- Canteens
- Catering Services
- Food Processing Factories
- Vegetable Supply Units
