Introducing **Merino FABWOOD**
 The Future of Furniture

Merino FABWOOD is India's First Health-Friendly Super Strong (HFSS) Chipboard.

<p>Health-friendly</p>	<p>Super strong</p>	<p>Versatile designs</p>	<p>Sustainable</p>
-------------------------------	----------------------------	---------------------------------	---------------------------

Health-friendly: Merino FABWOOD is an E1 grade chipboard, adhering to the most stringent European standards, ensuring a significant reduction in harmful formaldehyde emissions that are carcinogenic and detrimental to health.

Super strong: Superior core construction of Merino FABWOOD attributed to proprietary Chip Weave Technology and 3D bonding resulting in uniform density and exceptional strength across the cross-section of the board.

Versatile designs: FABWOOD'S prowess extends beyond its strength, reshaping the future of designs. With a wide array of exclusive designs and textures, FABWOOD adds a touch of natural elegance and luxury charm to interiors.

Sustainable: More than 1 crore plant afforestation every year becomes the source material for FABWOOD, making it one of the most sustainable products in industry.

<p>Chip Weave Technology core construction interlocks wood chips, optimizing the gap between them, resulting in unmatched mechanical and physical properties.</p>	<p>3D Chip Bonding provides bonding across all dimensions thus ensuring zero chipping while cutting.</p>
