Industrial Quality System

WHO WE ARE

FRIQS AUTOMATION PRIVATE LIMITED, founded in 2021, is a major Service Provider, Manufacturer, and Supplier of a comprehensive range of goods such as AC Drive panels, PLC panels, Servo Drive panels, and many others. We have been working in this industry for 10+ years. In addition, know our customers, seller's requirements and satisfaction with quality and services.

We are accelerating the digitalization in the automation field that is helping global organizations realize and embrace the fast-paced path to tomorrow. We pride ourselves on being an exciting, broadly diverse company with exciting challenges and complex, international projects - generated by diverse technologies, diverse customer groups and develop strategies around the world.

FRIQS AUTOMATION PRIVATE LIMITED is a certified manufacturer and supplier of panels which believes in meeting the vendor/customer requirement using the best available technology coupled with global standards. We have grown, becoming a leading provider of AC Drives Panel, PLC Panel, Servo Panel, Distribution Panel, MCC & PCC Panel, APFC Panel.

Our products are double checked by our technical experts. We strongly believe that expert services can be provided only by a person who specializes in a niche area of service and obtain in-depth knowledge in such given area of service over a period of time and we firmly believe that we fit into the above-mentioned category. Our quality controllers run a series of test to ensure the delivery of defect-free products to our customers.

We believe in saving our clients time and money. We have created a benchmark in offering entire industrial solutions at a single point of contact, including servicing, repair, and project execution, with exact outcomes. We have extensive expertise gathered through significant experience gained from a wide range of industries, the automation world, with in-house service, repairing, support, and the capacity to develop and execute technological solutions for each part of your machines needs.

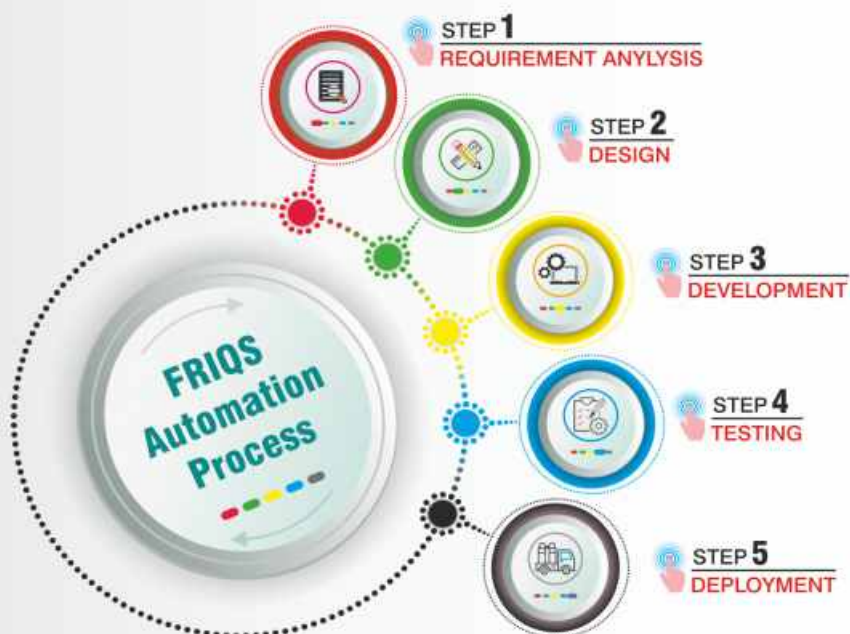

OUR STRENGTH

The company's vision is the continuous development and implementation of modern systems and technologies based on the leading manufacturers.

Our Steps for Your Business

OUR TECHNICAL EXPERTISE

AC DRIVE PANEL :

We manufacture & supply AC Drive Control panels. These drives application in most of the factories and industries where immense electricity or power is used. In addition to this, our range of panels is easy to use and avoids the chances of disturbances or malfunctioning during the operation.

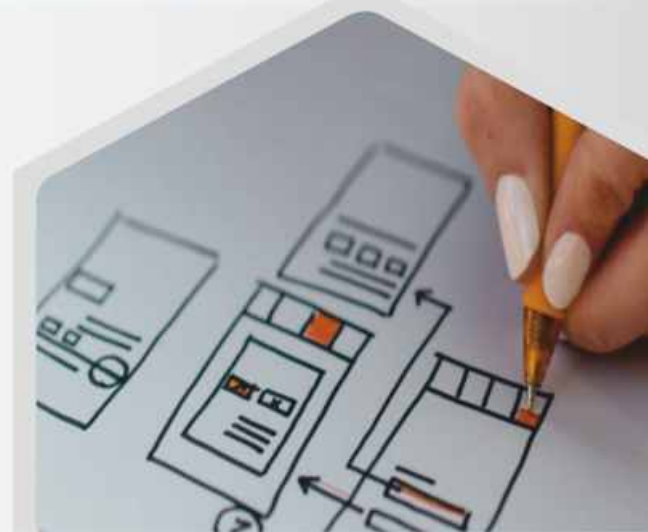

PLC PANEL :

Programmable Logic Controller (PLC) Panels to our esteemed clients. All our products are made with the help of experienced staff using the best quality materials and latest technology. Our products are designed to control the power supply. The product provided is widely used in industrial as well as commercial sectors. We are leading the market in this product and also offer very good prices.

MCC PANEL / PCC PANEL :

We make our MCC and PCC panels enclosed in high-quality powder-coated sheets, designed for effective use with a motor or submersible pump. MCC and PCC panels are widely used in industrial and commercial use in conveyors, crushers, rolling mills, agitators, mixers, strikers and other industrial machinery. In which many motors are used.

OUR TECHNICAL EXPERTISE

SERVO DRIVE PANEL :

We make a vital role in providing the highest quality Servo Drive Panel in the market. We manufacture a range of Servo Drive Panels suitable in various electric fields and in various specifications. With this, customers can avail the range offered from us at very economical prices, as per the detailed demands of our valued customers.

APFC PANEL :

APFC panels are used for power factor improvement. The power factor is the apparent ratio of active power and is a major component in measuring electrical consumption. APFC is an automated power factor control panel that is used to correct the power factor when needed, while the required capacitor bank units are automatically turned on and off.

DISTRIBUTION PANEL :

We offer a specialized range of distribution panels. The presented panels are made using premium quality components and ultra-modern technology. The panel provided is appreciated for its long functional life and easy operation feature. This panel is definitely checked by our quality controllers to ensure its premium quality. Moreover, these panels are available in various specifications and at affordable prices.

We Work With All These Industries

▶ TEXTILE INDUSTRIES

▶ PLASTIC INDUSTRIES

▶ CERAMIC INDUSTRIES

▶ PHARMA INDUSTRIES

▶ MATERIAL HANDLING INDUSTRIES

▶ PACKAGING INDUSTRIES

▶ WATER PLANT INDUSTRIES

▶ METAL INDUSTRIES

▶ UTILITY & MINING

OUR SERVICES

▶ ANNUAL MAINTENANCE CONTRACT SERVICE :

FRIQS Automation Private Limited provides Annual maintenance contract services to our clients for a variety of applications. Our services are provided by highly qualified and efficient industry technicians.

Our annual maintenance contract is tailored to your sector in order to improve business outcomes. As your dedicated success partner, we developed specialised services to meet your specific requirements. We look after all of your assets and keep your machines in good working order.

This assists you in maintaining the automation system through preventive and predictive maintenance chores, ensuring the smooth and trouble-free operation of your system and increasing production. It also ensures the automation system's lifespan, trouble-free operation, and lower downtime.

▶ OFFLINE MACHINE MAINTENANCE SERVICE :

At FRIQS Automation Private Limited, we have presumed as a principle that being a company providing Offline Machine maintenance services requires us to see logistical support as an indispensable part of the service, so that from on-site routine inspections and functioning evaluations, all the way through procurement management establishment, our maintenance services group has the authority to endorse your industrial setup and all the supporting equipment.

Our industrial maintenance service focuses on diagnosing, planning, executing, commissioning, and preventing breakdowns. It is advised if your priority is to cater to the needs of your business operations with a quick reaction at any stage. Our maintenance services enable us to extend the life of your equipment and installations, increasing their performance and, for example, the degree of greatest amortisation.

▶ ONLINE MACHINE MAINTENANCE SERVICE :

FRIQS Automation Private Limited has achieved incredible strides in the provision of Online Machine Maintenance services in Ahmedabad, Gujarat. These services are in high demand due to their adaptability and dependability. Furthermore, we deliver these to our clients after determining their financial needs. Clients can obtain these services at the most reasonable prices.

In our many years as machine maintenance service providers, we have encountered inefficient machine maintenance methods that lead to an exponential increase in system failure incidence by increasing the number of failures in a time line.

A professional industrial maintenance technician must do machine maintenance in close coordination with the personnel who are most knowledgeable about the functioning of the systems and electronic equipment.
