We are accelerating the digitalization in the automation field that is helping global organizations realize and embrace the fast-paced path to tomorrow. We pride ourselves on being an exciting, broadly diverse company with exciting challenges and complex, international projects - generated by diverse technologies, diverse customer groups and develop strategies around the world.

FRIQS Automation Private Limited is a certified manufacturer and supplier of panels which believes in meeting the vendor/customer requirement using the best available technology coupled with global standards. We have grown, becoming a leading provider of **AC & DC Drives Panel, PLC Panel, Servo Panel, Distribution Panel, MCC & PCC Panel, APFC Panel**. Our products are double checked by our technical experts. We strongly believe that expert services can be provided only by a person who specializes in a niche area of service and obtain in-depth knowledge in such given area of service over a period of time and we firmly believe that we fit into the above-mentioned category. Our quality controllers run a series of test to ensure the delivery of defect-free products to our customers.

FR Engimech Group is an organization of three industries (from different industry sectors and countries), joining as a group for a shared purpose of which FRIQS Automation Private Limited is a group. Provides our human resources to undertake a major project that benefits all of our members.

FRIQS Automation Pvt. Ltd. Always apply the latest and most advanced technology. We provide our clients with individual, comprehensive solutions tailored to the needs and specificity of the projects being implemented. The most important areas of company activity are:

- automation of production processes
- programming of industrial (offline and online)
- programming of PLC controllers
- optimization of quality and cycle time
- construction of workstations based on own ready-made solutions

Our aims

- Comprehensive services

Through the strength of the group and our own extensive experience, we want to provide comprehensive and best services in the field of automation and robotization of technological processes.

- Technological development

We provide turnkey solutions for the design, production, programming of tools and technologies associated with the industrial industry.

- Training Center

Our approach to training is unique as we train maintenance techniques in training.

Vision

The company's vision is the continuous development and implementation of modern systems and technologies based on the leading manufacturers.

Our Strength

Solution under One roof: Make Design, Manufacturing, programming, Site Support, Service till client satisfaction, Execute small and big projects.

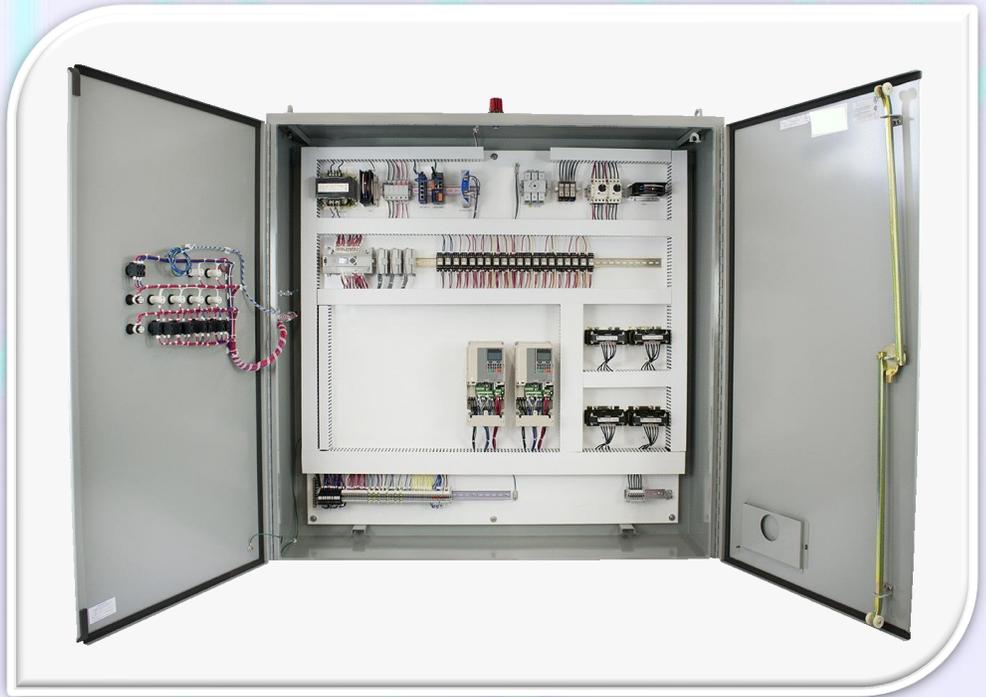

Our Technical Expertise

- Products:**
- AC & DC Drives Panel
 - PLC Panel
 - Servo Panel
 - Distribution Panel
 - MCC and PCC Panel
 - APFC Panels

Our Contribution in Industries

- Chemical Plant - Plastic Industries
- Pharma Plant - Papermill Industries
- Textile Industries - Metal Industries
- Material Handling Industries
- Oil and Refinery - Water Distribution

These drives come in many different sizes and forms, but at the most basic level, they can be AC drives or DC drives. Understanding the difference between them can help you understand what would be best for your application.

AC & DC Drives Panel

Programmable Logic Controller (PLC) Panel

We offer a wide range of Programmable Logic Controller (PLC) Panels to our esteemed clients. All our products are made with the help of experienced staff using the best quality materials and latest technology. Our products are designed to control the power supply. The product provided is widely used in industrial as well as commercial sectors. We are leading the market in this product and also offer very good prices.

Servo Panel

We make a vital role in providing the highest quality Servo Drive Panel in the market. We manufacture a range of Servo Drive Panels suitable in various electric fields and in various specifications. With this, customers can avail the range offered from us at very economical prices, as per the detailed demands of our valued customers.

Distribution Panels

We offer a specialized range of distribution panels. The presented panels are made using premium quality components and ultra-modern technology. The panel provided is appreciated for its long functional life and easy operation feature.

This panel is definitely checked by our quality controllers to ensure its premium quality. Moreover, these panels are available in various specifications and at affordable prices.

MCC & PCC Panels

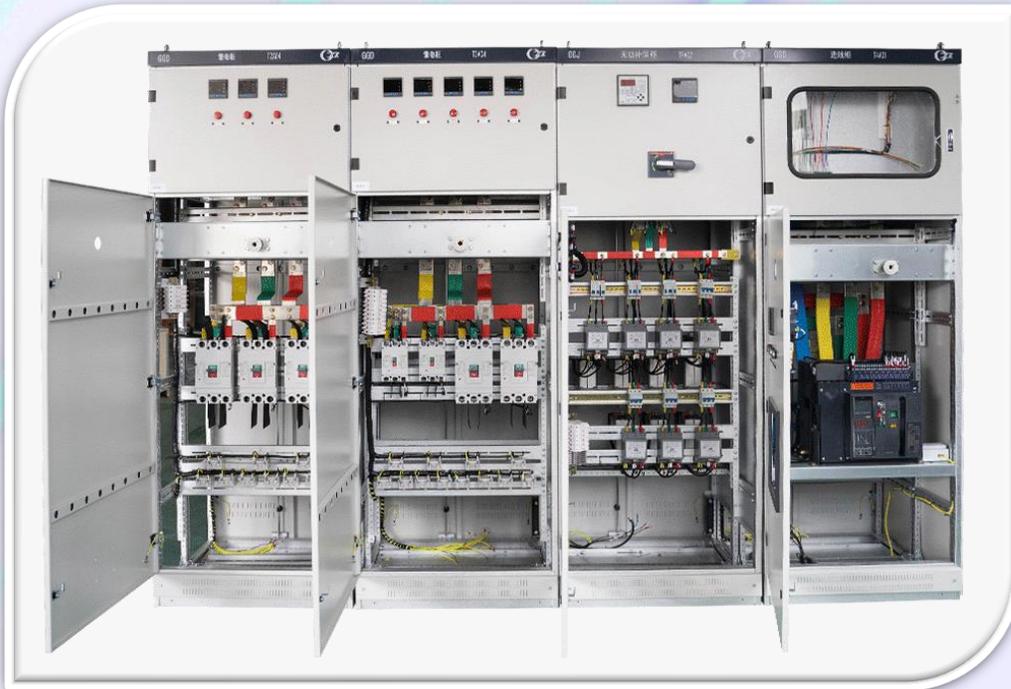

We make our MCC and PCC panels enclosed in high-quality powder-coated sheets, designed for effective use with a motor or submersible pump.

MCC and PCC panels are widely used in industrial and commercial use in conveyors, crushers, rolling mills, agitators, mixers, strikers and other industrial machinery. In which many motors are used.

APFC Panels

APFC panels are used for power factor improvement. The power factor is the apparent ratio of active power and is a major component in measuring electrical consumption.

APFC is an automated power factor control panel that is used to correct the power factor when needed, while the required capacitor bank units are automatically turned on and off.
