

HI TECH EQUIPMENTS

Gasketed Plate Heat Exchanger

Hi Tech Equipments' Gasketed Plate Heat Exchanger is a highly efficient heat transfer solution designed to transfer thermal energy between two fluids with minimal energy loss. Constructed with a series of corrugated metal plates sealed by durable gaskets, the GPHE offers excellent thermal performance in a compact footprint. Its modular design allows easy disassembly for inspection, cleaning, and maintenance, making it ideal for applications requiring high efficiency, operational flexibility, and hygienic processing. Suitable for heating, cooling, heat recovery, and condensation duties, the GPHE is widely used across food processing, dairy, pharmaceutical, chemical, HVAC, and industrial sectors. Engineered for reliability and energy savings, it delivers consistent performance while reducing operating and maintenance costs.

Plate Material:

- 304 / 304L
- 316 / 316L
- 254-SMO
- Titanium
- Hastelloy C-276

Gasket Material:

- NBR
- EPDM
- HNBR
- Viton
