

CONNECTIVITY

Data of flow meter is transmitted to cloud server using IoT platform. Helps in data analysis of live flow / totalizer & reporting.

- Telemetry
- Wi-Fi
- LoRa

ELECTRO MAGNETIC FLOW METER

Marketing Brochure

ORCATECH ENTERPIRSES

Flat No. 102, Mayureshwar Heights, S.No.24/4,
Jadhavrao Industrial Estate, Nanded City,
Sinhagad Road, Pune 411041
+91 9325665554, 8329189339
sales@orcatech.co.in www.orcatech.co.in

APPLICATION

- Water treatment
- Pump testing
- Food & dairy processing
- Chemical Process plant
- Paper & pulp industry
- Wastewater & Sewerage system
- Effluent Treatment Plants.
- Pharmaceuticals.

BATCHING

Available for batch flow measurement & control with an add-on controller.

FLOW METER WITH INTEGRAL

PTFE: DN20-DN600, Neoprene/
Hard rubber: DN50-DN 2200,
Sanitary Type: DN10-DN100

Magnetic flow meters, also known as electromagnetic flow meters or mag meters, are often selected because they are obstruction less, cost-effective, bi-directional, and provide highly accurate volumetric flow measurement. A range of liner materials, electrode options and line sizes accommodate a wide variety of process applications. For aggressive high noise applications, look to our Slurry Platform for optimum performance.
