GRAB THE SUN POWER

"In Technical Collaboration with Sun"

Sustainable Feed Healthier Livestock Brighter Tomorrows

SUN DRIES TODAY FOR HEALTHIER TOMORROW

SOLAR DRYING OF ANIMAL FEED

For fodder leaves, dry roughage, grain-based feed ingredients and other suitable livestock feed materials

Rudra Solar Energy offers enclosed solar drying solutions for animal feed and fodder applications with hygienic drying conditions, controlled airflow and application-based system selection.

- **Enclosed Drying**
- **Controlled Airflow**
- **Solar Thermal**
- **Application-Based Selection**

Drying green fodder leaves naturally with solar energy

Efficient solar drying for dry roughage and feed materials

Reliable, off-grid solar drying system for animal feed

Easy to use – from fresh fodder to dry, nutritious feed

SUITABLE APPLICATIONS

- Green fodder leaves
- Dry roughage
- Grain-based feed ingredients
- Leaf-based livestock feed
- Selected animal feed materials

KEY CONSIDERATIONS

- Material type
- Initial moisture
- Layer depth
- Airflow uniformity
- Weather conditions

SUITABLE USERS

- Dairy farmers
- Cattle farms
- Goat & sheep units
- FPOs & SHGs
- Rural enterprises
- Feed processors

POWERING A HEALTHY AGRARIAN TOMORROW
