SOLAR DRYING OF DRY FRUITS & NUTS

Ideal for cashew, almond, walnut, fig, dates, raisins and similar value-added products

Rudra Solar Energy provides enclosed solar drying solutions for suitable dry fruits and nuts with protected tray-based drying and controlled airflow. The system helps processors handle products more hygienically while supporting moisture reduction for better storage, quality retention and value-added processing.

Enclosed Drying
Protects products from external dust, insects and contamination.

Controlled Airflow
Ensures uniform drying and helps maintain product quality.

Hygienic Processing
Enclosed system helps maintain cleaner and safer drying conditions.

Solar-Based Operation
Uses free solar energy for cost-effective and environment-friendly operation.

Suitable Applications

- Cashew
- Almond
- Walnut
- Fig (Anjeer)
- Dates
- Raisins
- Mixed Dry Fruit Processing

Key Benefits

- Better product hygiene
- Reduced dust exposure
- Improved drying consistency
- Lower spoilage risk
- Value addition support

Suitable Users

- Dry fruit processors
- Nut handlers
- SHGs
- FPOs
- Food businesses

System Highlights

- Food-grade contact surfaces
- Tray-based drying
- Uniform air movement
- Commercial suitability
