01.5065 Series

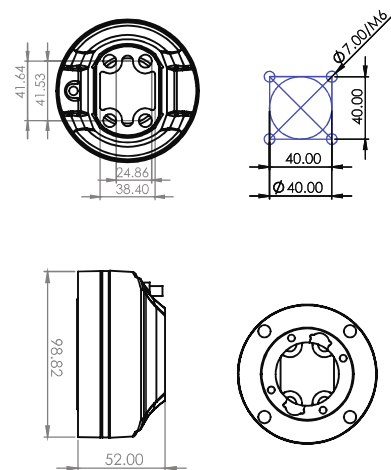

Product Code

01.050652090

Product Name

Enclosure Box Connector - Rotatable

This rotatable panel adaptor connects the operator panel to the support arm system, making it ideal for mounting on the vertical section of the support arm. By rotating on its own axis, it allows the operator to easily adjust the panel direction for optimal viewing and control.

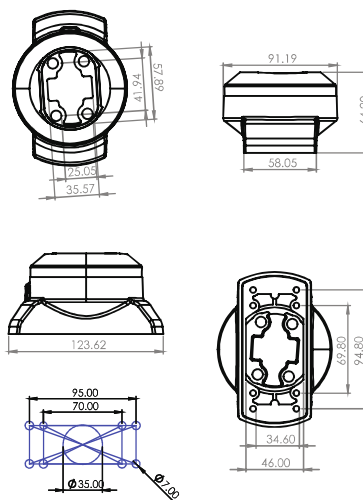

Product Code

01.050652091

Product Name

Slim Enclosure Box Connector - Rotatable

This adapter connects the operator enclosure to the support arm system, making it perfect for mounting on the vertical section of the arm. It rotates on its own axis, allowing the operator to easily adjust the enclosure for the best viewing and control angle. Typically used with sleek design enclosures, it adds flexibility and ease of use to your setup

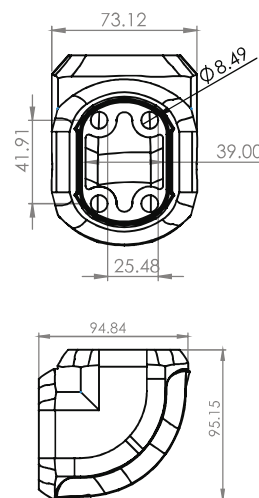

Product Code

01.05065210

Product Name

Right Angle Connector/Angle/Elbow

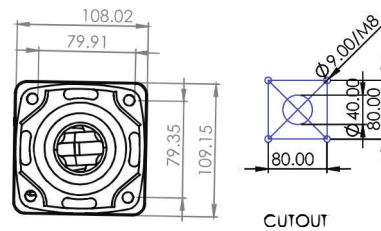

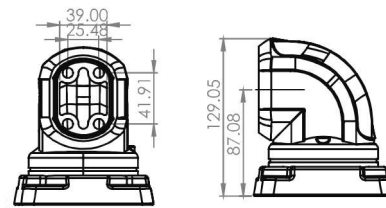

The 90° Angle Connector joins horizontal and vertical arms securely.

Product Code

01.05065220

Product Name

Top Mount Horizontal - Rotatable

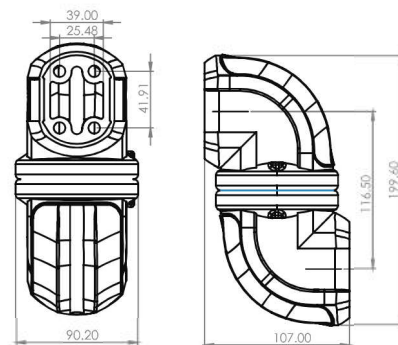

CUTOUT

This part is perfect for attaching support arms to high surfaces, like the top of a machine or even a ceiling and provides a 90° outlet. It lets you position the arm horizontally and can rotate for easy side-to-side movement.

Product Code

01.05065230

Product Name

Intermediate Connector / Hinge Connector

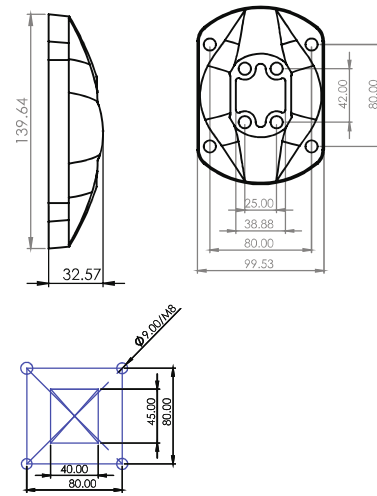

This is a hinge connector which helps to join two operator arms on the same horizontal line, allowing them to move partially independently of each other.

Product Code

01.05065240

Product Name

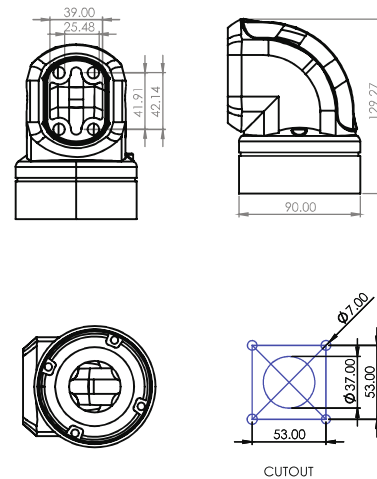

Fixed Base

This sturdy bracket provides a secure connection to both vertical and horizontal surfaces. Perfect for those looking for a strong and simple solution for mounting support arms starting from any flat surface.

Product Code

01.05065250

Product Name

90 deg Angle HMI Enclosure Connector - Rotatable

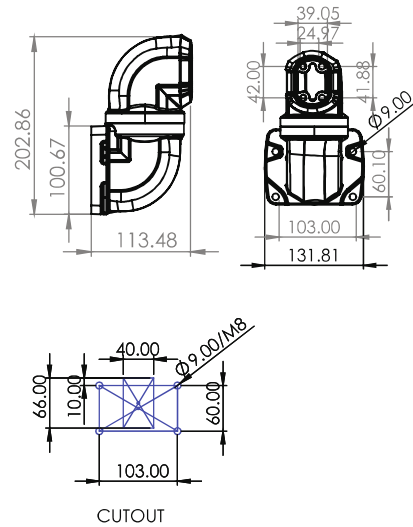

This coupling is designed for operator enclosures that need positioning after a 90° corner turn. It offers a rotation, allowing the operator to easily adjust the enclosure to the perfect position. It's especially suitable for enclosures with greater depth, providing both flexibility and convenience.

Product Code

01.05065260

Product Name

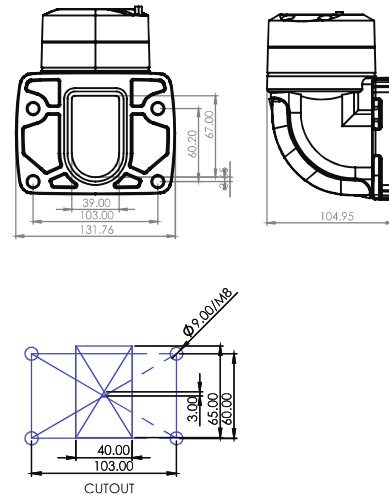

Horizontal Wall Mount Hinge Connector - Rotatable

This is a wall-mounted hinge connector and is designed for attaching support arms to vertical surface of the machine.

Product Code

01.05065270

Product Name

Vertical/Parallel Wall Mount Connector - Rotatable

This component is mounted on the machine's vertical wall and serves as a parallel outlet, providing smooth and rotatable movement for the connected arms and enclosures.

M50 Series

Product Code

01.05065280

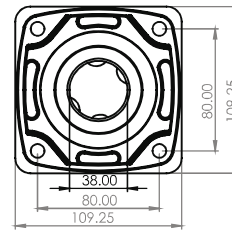

Product Name

Base Mount Swivelling - Rotatable

CUTOUT

This component allows the support arm to be positioned vertically and can also be used as a floor-mounted kiosk. It can be used for mounting on horizontal surfaces and can also be suspended from the ceiling, offering flexible installation options.

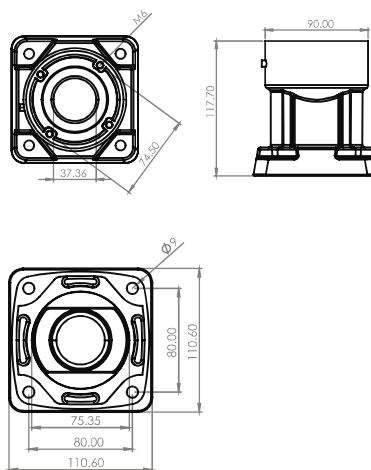

Product Code

01.050654900

Product Name

Base Mounted Enclosure Connector - Rotatable

This connector serves as a sturdy base mount, allowing enclosures to be directly attached without the need for additional connecting pipes. It is suitable for a compact setup.

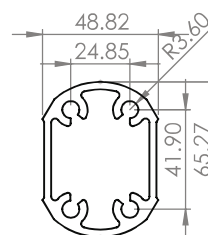

Product Code

5065 Conneting Pipe - Maximum Length 2 Mtr

Product Name

Supply in 0.5/1/2 Mtr

Perfect for short-length applications and light-load enclosures, the 5065 series features 3-meter aluminum pipes that can be easily cut to the desired length, offering flexibility for custom setups.

02.6095 Series

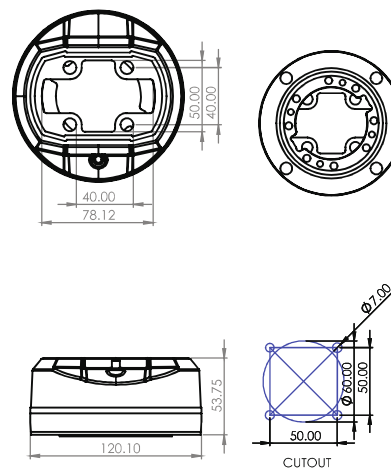

Product Code

02.060953090

Product Name

Enclosure Box Connector – Rotatable

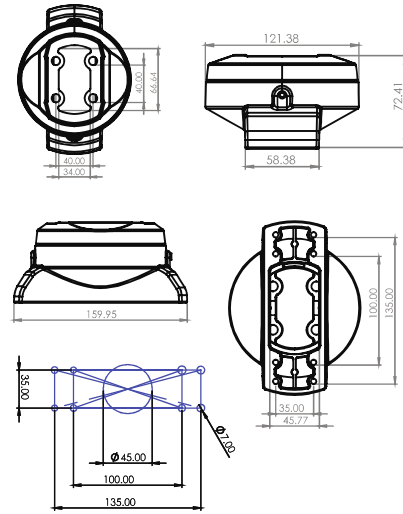

This rotatable panel adaptor connects the operator panel to the support arm system, making it ideal for mounting on the vertical section of the support arm. By rotating on its own axis, it allows the operator to easily adjust the panel direction for optimal viewing and control.
