THERMOSOLV

“Tough On Scale, Gentle On metal !”

ThermoSolv is a high-performance descaling chemical formulated to rapidly dissolve calcium, magnesium, and other hard scale deposits. Enriched with advanced corrosion inhibitors, it ensures powerful cleaning while protecting metal surfaces, restoring system efficiency and prolonging equipment life.

Benefits of Thermosolv

Rapid Removal Of Scale And Rust

Thermosolv desolves scales within it and it does not show any reactions on metals

Restores Heat Transfer Efficiency

Once scaling is removed you will find a better heat exchange within system

Reduces Downtime & Maintenance Costs

Energies will be saved, least downtime, fast with results.

Protects Metal Surfaces With Corrosion Inhibitors

Thermosolv is designed in such a way that it does not let metal get corrosion after using it.

Extends Equipment Life

Get scaling out before it gets too much, either your equipment will need to be replaced with new one.
