Aluminium Foil Bag

We are a unique entity in the market, actively committed towards offering an optimum range of Aluminum Foil Bag. These foil bags are available with us in various sizes and designs which meet the needs of our esteemed clients. Our skilled professionals manufacture these foil bags using optimum quality aluminum with other allied material and the latest machines. The offered foil bags are highly valued by our clients for its high durability and fine finish.

Enriched with years of experience in this field, we are continuously engaged in offering a wide range of Aluminum Foil Bag that is widely used to foil food items to keep it warm and safe from moisture and dust. These bags are designed with utmost precision by our adept professional using quality tested aluminum in tandem with the set industry standard and guidelines. Our quality controllers examine these bags against varied parameters to ensure their flawlessness.

Features:

Tear resistance

Easy usage

Keeps food warm and fresh

Aluminium Foil Bag

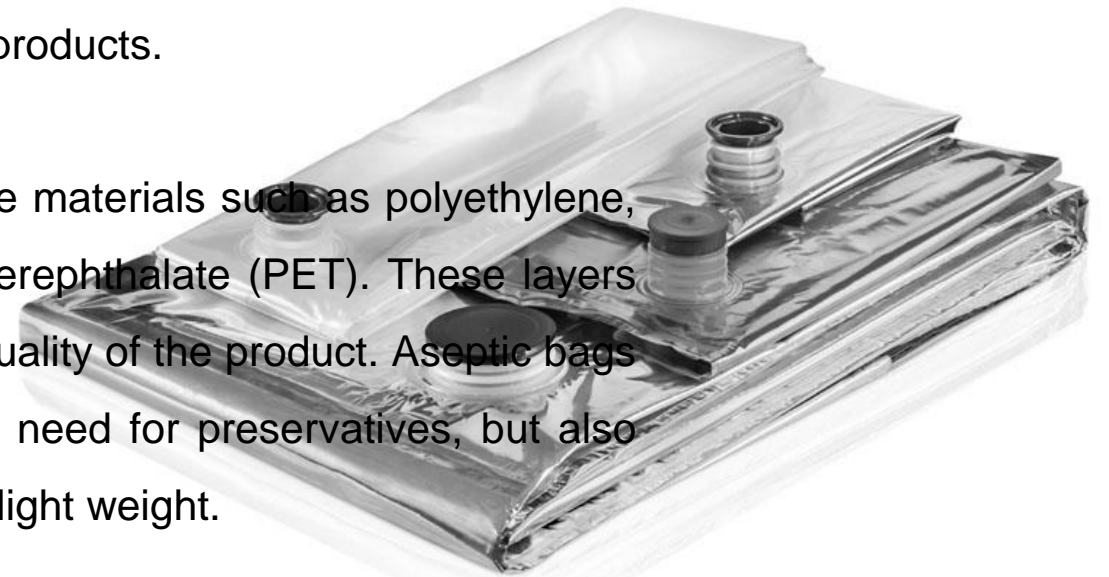

Aseptic Bag

We are manufacturers of aseptic bags which are 100% bacteria-free and can be used in various application like pulp packing etc. We offer a wide range of aseptic bags, including Standard Barrier, High Barrier, and Ultra-High Barrier options, designed to meet various customer requirements. These include oxygen barrier, freshness and color preservation, and aseptic filling capabilities, ensuring product integrity throughout its lifecycle.

Our aseptic bags are widely used for the storage and transportation of fluid products such as fruit and vegetable concentrates, wine, beverages, dairy products, and condiments. With their barrier properties, they ensure the safe and efficient preservation of your products.

Aseptic bags are typically made from multiple layers of food-grade materials such as polyethylene, ethylene vinyl alcohol (EVOH), aluminum foil, and polyethylene terephthalate (PET). These layers block oxygen, light and other external factors that may affect the quality of the product. Aseptic bags offer multiple benefits, not only extending shelf life, reducing the need for preservatives, but also minimizing product waste and lowering shipping costs due to their light weight.

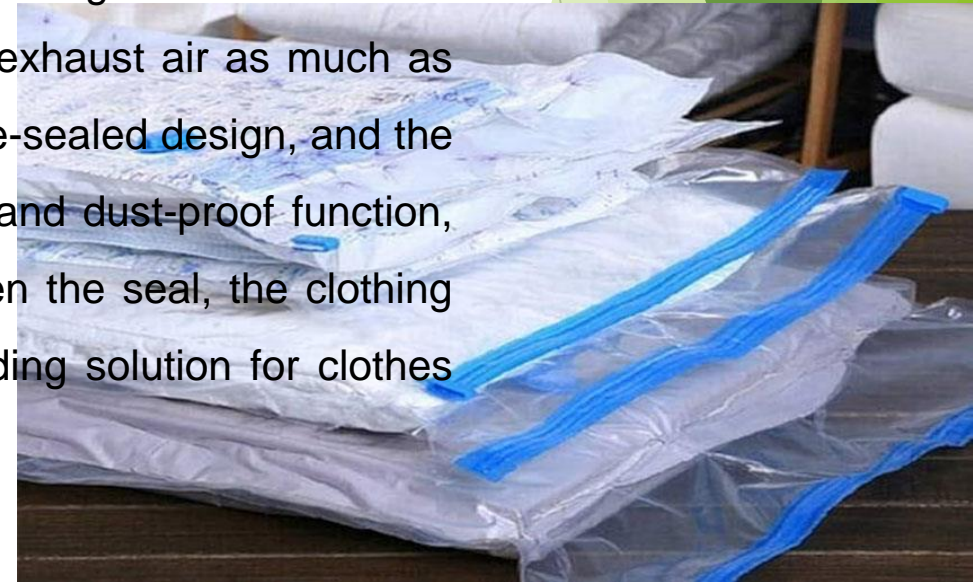

Aseptic Bag

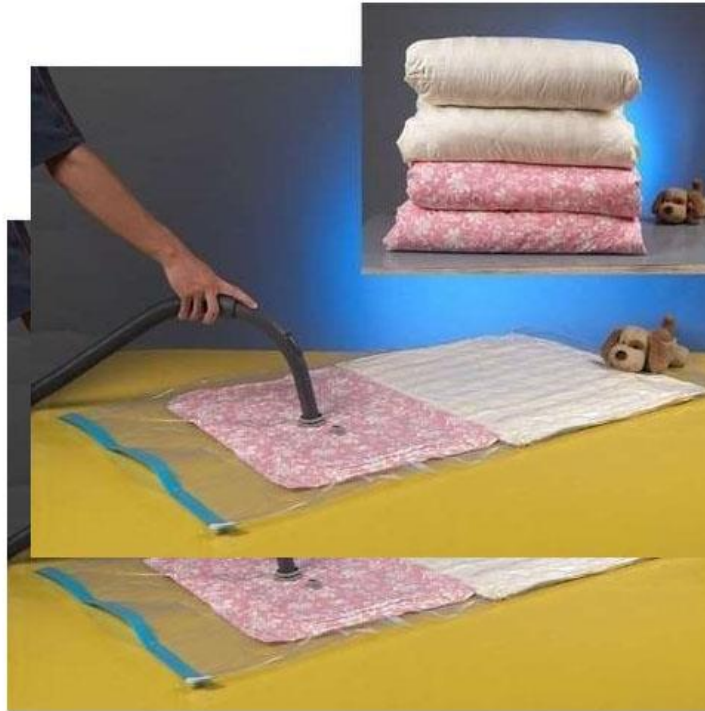

Vacuum Storage Bag

The clothing vacuum storage bags can save 80% space for your closets, you can get closets much tidier by using several space bags. The vacuum seal storage bag has a strong air-tightness, it will be flat when you draw it and reduce occupancy of space as much as possible, which can make your cabinet look organized and comfortable. The vacuum packed storage bags prevent items from water, dust, insects, mildew, odour etc. These bulky and out-of-season items can be protected well in the space saver bags. The compression bag is made of healthy and thick material, it is environmentally friendly, substantial and serviceable, vacuum seal bags can accompany you for a long time.

The compression bags are transparent, which allows your clothes to be clear at a glance and find the items that you want. The double seal and leak-proof collar are conducive to exhaust air as much as possible. The compression bags have perfect sealing is attributed to the double-sealed design, and the vacuum bags are tighter and will not leak air. It has a fantastic antibacterial and dust-proof function, which is beneficial for maintaining long-lasting vacuum status. When you open the seal, the clothing rebounds to its original state quickly. The vacuum seal bags are an outstanding solution for clothes becoming damp and moldy in humid seasons.

Vacuum Storage Bag
