MONITOR AND CONTROL WITH PRECISION

ULTRASONIC TANK LEVEL SENSOR

Enhance efficiency with real-time data.

The ultrasonic sensor calculates distance by measuring time between sending and receiving pulses. This high-performance module has a small blind zone and wide sensing angle.

Specifications

Waterproof IP67
Ultrasonic Sensor

Blind Zone Distance:
3cm

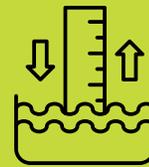

Detecting Range(Flat
object): 3-450cm

Operating Temperature:
-15~60°C

Reference Angle: 60°

- ▶ Cloud based data monitoring & reporting
- ▶ Mobile Application for ease of usage
- ▶ Controls Pump/Motors/Valves

Features

- Level Display in Meter, Volume, Percentage
- Can control Pump or control valve
- Alerts of Tank Full & Empty
- Cloud Connectivity through GPRS, LoRa, Wifi

Our mission

Save water by using eco-friendly technology to prevent tank overflow.

Technology of ECoo
