

# VILSUN AUTOMATION INDIA LLP

POWERING INDUSTRY WITH PRECISION & PERFORMANCE.

## OUR PRODUCT RANGE

BURNERS & BURNER SPARE PARTS | BOILERS & BOILER SERVICES | PRESSURE PIPELINES  
SPRAY PAINTING PLANTS | POWDER COATING PLANTS | CED COATING PLANTS | PRETREATMENT SYSTEMS  
SURFACE CLEANING & COATING SYSTEMS | CUSTOMIZED FURNACES | GAS LINES & FIRE LINES  
ELECTRICAL CONTROL PANELS | CUSTOMIZED MACHINERY & AUTOMATION SOLUTIONS

## ABOUT US

### Welcome to VILSUN AUTOMATION INDIA LLP

Vilsun Automation India is the expanded, globally-focused iteration of the esteemed Vilsun Engineering, which was established in 2014. Founded by our main partner, Dhananjay Vedpathak, our organization has evolved from a proprietary firm into a Limited Liability Partnership (LLP) and is on a path to becoming a Private Limited Company. This expansion is driven by a commitment to world-class manufacturing excellence and technological advancement.

We specialize in end-to-end industrial heating, surface coating, and automation solutions, with a deep-rooted expertise in high-efficiency burners, specialized ovens, and comprehensive plant design.

Led by Mr. Vedpathak's technical vision and supported by partner Komalakshee Vedpathak (who oversees Finance and Accounts Department), we are poised to serve international markets with the same dedication to quality and client satisfaction that defined our first decade.

#### Our Mission

To empower partners by delivering innovative, gas-saving burners, efficient ovens, and integrated coating plants with superior quality and performance.

#### Our Vision

To be a global leader in engineering and technology for industrial heating and coating automation, promoting sustainable, energy-efficient solutions.

#### Our Values

- Innovation & Automation
- Global Quality
- Client Partnership
- Integrity & Growth

## WHY CHOOSE US?

- 🔧 **Energy-Saving Pioneers:** We engineer solutions focussed on power saving and gas saving technology, helping our clients reduce operating costs and meet global environmental standards for a better future.
- 🔧 **Global Expertise, Proven Reliability:** Backed by technical excellence since 2014, we blend deep domain knowledge with an expanding global perspective.
- 🔧 **Complete Life cycle Support:** We offer full-service support, including the crucial reconditioning and expert maintenance of your industrial burners and ovens to maximize their lifespan and efficiency.
- 🔧 **End-to-End Solution Provider:** We are a single-source manufacturer for all your industrial heating and surface finishing needs, from a single component to a complete plant setup.
- 🔧 **Commitment to Quality & Service:** Our three-pillar approach guarantees your success: Tailored Consultation & Customization; Manufacturing Excellence using state-of-the-art production; and reliable After-Sales Service ensuring continuous operation.

## Our Products

### Burners & Burner Spare Parts

We offers a complete range of industrial burners and genuine burner spare parts designed for superior performance and energy efficiency. Our burners are engineered for precision combustion, low gas consumption, and reliable operation across diverse industrial applications. We provide customized solutions compatible with various fuels and heating systems. Backed by advanced technology and quality materials, our products ensure durability, safety, and optimal thermal efficiency.

### Boilers & Boiler Services

We provides high-performance industrial boilers and comprehensive boiler services designed for efficiency, safety, and reliability. Our boilers are engineered for optimal heat transfer, fuel economy, and low emissions across various industrial applications. We offer installation, maintenance, retrofitting, and automation solutions to ensure uninterrupted operation and extended equipment life. With a focus on innovation and sustainability, we deliver complete boiler solutions that meet global quality and energy standards.

### Pressure Pipelines

Our designs and installs high-quality pressure pipelines for industrial heating, coating, and process systems. Built to handle high pressure and temperature conditions, our pipelines ensure safe, efficient, and leak-proof fluid or gas transfer. We use premium materials and precision engineering to meet international safety and performance standards. Our turnkey solutions include design, fabrication, testing, and commissioning for reliable and long-lasting operation.

### Spray Painting Plants

We offers advanced Spray Painting Plants designed for high-quality, uniform, and efficient coating applications. Our systems feature automated spraying, controlled air handling, and optimized curing for superior surface finish and minimal wastage. Built with safety, precision, and energy efficiency in mind, they cater to automotive, furniture, and industrial sectors. We provide complete turnkey solutions from design to installation, ensuring consistent performance and long-term reliability.

## Our Products

### Powder Coating Plants

Our designs and manufactures advanced Powder Coating Plants engineered for superior finish quality, efficiency, and durability. Our systems include pre-treatment, powder application booths, and curing ovens with precise temperature and airflow control. Designed for high throughput and minimal waste, they ensure uniform coating and long-lasting performance. Ideal for automotive, appliance, and industrial applications, our plants deliver consistent, eco-friendly results with low operating costs.

### CED Coating Plants

We offers state-of-the-art CED (Cathodic Electro Deposition) Coating Plants designed for high corrosion resistance and superior surface finish. Our systems feature advanced automation, precise voltage control, and efficient paint recovery for minimal waste. Engineered for durability and consistency, they ensure uniform coating even on complex geometries. Ideal for automotive, appliance, and industrial applications, our CED plants deliver eco-friendly, long-lasting, and cost-effective coating solutions.

### Pretreatment Systems

Vilsun Automation India designs and manufactures advanced Pretreatment Systems that ensure optimal surface preparation for painting and coating applications. Our systems efficiently remove oil, rust, and contaminants, enhancing coating adhesion and durability. Available in spray or dip configurations, they are customized for various metals and production scales. Engineered for efficiency and sustainability, our pretreatment plants ensure consistent quality, reduced chemical use, and eco-friendly operation.

### Surface Cleaning & Coating Systems

We offers advanced Surface Cleaning & Coating Systems designed for precision, durability, and efficiency. Our solutions integrate cleaning, pre-treatment, and coating processes to deliver superior surface finish and corrosion protection. Suitable for metal, plastic, and composite components, these systems ensure consistent quality and long-term performance. Built with automation and energy-efficient technology, they reduce operational costs while meeting global industry standards.

## Our Products

### Customized Furnaces

Our designs and manufactures Customized Furnaces tailored to meet diverse industrial heating needs with precision and efficiency. Our furnaces are engineered for consistent temperature control, energy optimization, and superior material performance. Suitable for applications like heat treatment, forging, and melting, they are built with advanced insulation and automation features. We deliver end-to-end solutions—from design and fabrication to installation and commissioning—ensuring reliability, durability, and long-term operational excellence.

### Gas Lines & Fire Lines

We provides complete Gas Lines and Fire Lines solutions designed for safe, efficient, and reliable fuel distribution in industrial environments. Our services include system design, fabrication, installation, and testing in compliance with international safety standards. We ensure precise flow control, leak prevention, and optimal pressure management through advanced materials and automation. Each project is executed with a focus on safety, performance, and long-term durability to support seamless plant operations.

### Electrical Control Panels

Our designs and manufactures advanced Electrical Control Panels that ensure precise, reliable, and automated control of industrial processes. Built with high-quality components and robust safety features, our panels support applications in heating, coating, and automation systems. We offer custom-built solutions including PLC, MCC, and VFD panels for efficient power management and process optimization. Each panel is engineered for durability, ease of maintenance, and seamless system integration.

### Customized Machinery & Automation Solutions

we provides Customized Machinery & Automation Solutions tailored to meet specific industrial requirements. We design and build fully integrated systems that enhance productivity, precision, and energy efficiency across diverse applications. Our expertise covers automated handling systems, process control, and smart manufacturing solutions. Every project is engineered with innovation, reliability, and performance to optimize operations and reduce downtime.
