TRANSFER • FILTERING • MEASUREMENT • CONTROL • FABRICATION

Fuel Handling Equipment & Automation Solutions

We 'Vivek Enterprise' are engaged in manufacturing, exporting and importing a high-quality array of fuel, lubricants, Ad Blue, non-corrosive liquid handling equipment and machinery with automation options. Since our establishment in **2014** at Ahmedabad, Gujarat, India, we have been able to meet customers' varied needs by providing products widely appreciated for their sturdy design and low maintenance. Under the guidance of **Mr. Vivek (Proprietor)**, we have earned a respected name in the industry and export our products worldwide.

VIVEK ENTERPRISE

Fuel Handling Equipment

Complete Standard Product Catalog

Transfer · Filtering · Measurement · Control

Diesel

Bio-fuel

Aviation Fuel

AdBlue/DEF

Lubricants

Petrol

Ahmedabad, Gujarat, India

Company profile & core capability

Manufacturing, exporting, importing, customizing and supporting fuel handling equipment since 2014.

Who we are

Vivek Enterprise is engaged in fuel, lubricants, AdBlue, non-corrosive liquid handling equipment and automation solutions.

Strength

Sturdy design, lower maintenance, product assembly, customization and after-sales support.

Applications

Fuel transfer, fuel filtration, measurement, level control, RFID/FMS automation, tanks and custom project fabrication.

Design and development as per customer requirements.

Complete fuel-handling chain under one roof

Solutions for pumps, meters, filtration, dispensers, tanks, automation and special projects.

Manufacturing

Fuel handling equipment and dispensers/Filtrations
Fuel polishing units

Stockiest / Distributor

Flow meters, valves, nozzles and accessories

Customization

AC/DC dispensers, skids, tanks, Unloading skids
and site-specific packages

Automation

Fuel Management System, RFID and tank gauge
integration

Fluid Coverage

Diesel • Gasoline • Kerosene • Aviation Fuel • Biofuel • Lubricants • AdBlue/DEF • Non-corrosive liquids

Standard portfolio with engineered customization

Select from standard equipment or build a package based on flowrate, fuel type, power supply, space and data requirement.

Pumps

Self-suction / self-priming electric pumps for diesel, petrol, AdBlue/DEF and lubricants.

Meters & Controllers

Mechanical and electronic meters, pulsers, preset controllers and flow computers.

Filtration Systems

Fuel and oil filtration, polishing kits, water absorbent elements and treatment plants.

Refuelling Equipment

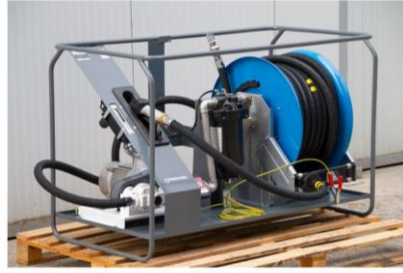

Compact, totem, skid-mounted, mobile and high-flow dispensing systems.

Tanks & GRG

Mobile tanks, trailers, cube tanks, mobi tanks and fabricated storage systems.

Software & FMS

RFID, controller-based dispensing, desktop/cloud fuel management and tank level control.

New generation dispensing system lineup

Compact, vertical and skid-mounted designs for controlled fuel transfer and dispensing.

Industrial 50 To 220 LPM Smart Dispenser

Vertical Smart Dispenser

Compact Cabinet Unit

Skid-Mounted Unit with Hose Reel

Multi-View Lineup

Compact Cabinet Front / Side

Slim-Line Smart Fuel Dispenser

Front View Cabinet

Highlights

Digital display & preset · integrated printer option · secure keypad access · nozzle / hose management · industrial steel cabinet

Transfer pumps for fuel and other compatible fluids

Options for diesel, petrol, AdBlue/DEF, lubricants and other non-corrosive fluids.

Continues Duty 12/24 VDC FUEL Transfer Pump

Barrel Fuel Transfer Pump

Dual Monster Pump 230VAC/24VDC

Oil Transfer Pump 230VAC/12VDC

ATEX EX Fuel Transfer Pump 12/24VDC & 230VAC

High Flow Fuel Transfer Pump
100 To 2000 LPM

High Flow CG Pumps

Adblue/DEF Transfer Pump

Typical selection parameters: flow rate, duty cycle, power supply, fluid type, suction lift, pressure and installation zone.

Transfer skids for fuel and other compatible fluids

Options for diesel, petrol, AdBlue/DEF, lubricants and other non-corrosive fluids.

Decantation Unit

High Flow Fuel Loading-Unloading Skid

Adblue/DEF Transfer Skid

Compact Mobile Fuel Transfer Skid

Light Aircraft Refueling Skid

High Flow Digital Flow Meter

Typical selection parameters: flow rate, duty cycle, power supply, fluid type, suction lift, pressure and installation zone.

Meters, pulsers, controllers and preset systems

Mechanical/electronic metering and controller options for accurate dispensing and data capture.

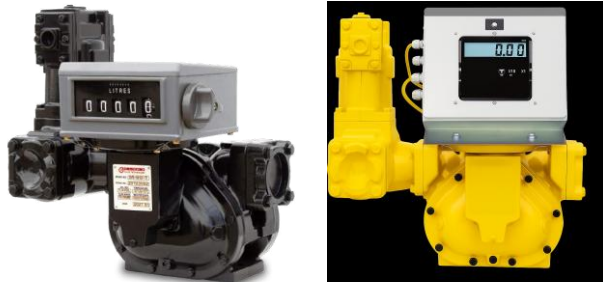

MGE-110

MGE-400

MGI-110 Pulser

M Series Meters

GK-7 Plus Controller

High Flow Skid Install In Bowser

● Preset & totalizer control

● Pulser output for automation

● Mechanical / electronic options

● Integration with FMS and RFID

Particle and water-removal filtration solutions

Filter housings, elements, mobile kits and high-flow filtration units for fuel quality improvement.

Oil Treatment Plant

2000 LPM Fuel Polishing Unit

FG-1000 x 3

Mobile Filtering Kit

Fuel Treatment Plant

Available elements: particle removal, water repellent and water absorbent media in multiple micron ratings.

Dispensers adapted to each operational need

Different options for diesel, petrol, AdBlue/DEF, lubricants and other fluids.

- COMPACT
- TOTEM / SH
- MONSTERJET
- VPLC-25M Alcohol Transfer
- 300 LPM Browser Unit

Custom cabinets can be supplied with metal body, digital display, controller, printer, hose/nozzle and flow meter options.

Storage and mobile fuel systems

Mobile tanks, fuel trailers, cube tanks and mobi tanks with dispensing kits.

Mobiltank

Mobile Cuber Tank

Fuel Station

containerised fuel station with filtration

Mobile Tank With Smart Fuel Dispensing Unit

Mobile Filling Station

Designed for autonomous and mobile diesel transport and on-site refuelling applications.

Storage and mobile fuel systems

Mobile tanks, fuel trailers, cube tanks and mobi tanks with dispensing kits.

Designed for autonomous and mobile diesel transport and on-site refuelling applications.

Fluid stock control and supply management

Tank level monitoring, cloud/desktop software and fleet fuel consumption control.

Tank Level Control

Measurement of fixed and mobile tanks with connection to control software.

DieselPlus

Cloud software for managing supplies, users, vehicles and tank levels.

GKSuite / GK-7

Desktop software and own-consumption fleet controller options.

Mobile refilling systems for aviation support

Battery, engine and AC-operated Sudan pump / aviation refilling skid configurations with mobile trolley.

Battery Operated Skid

Engine Operated Mobile Skid

AC Operated High Flow Skid

Browser Installation

Sudan Pump System

Mobile Trolley Package

Fabricated equipment packages and mobile fuel browsers

Custom metal fabrication, cabinet building, mobile refuelling body integration and dispensing kits.

- Powder-coated MS cabinet / skid fabrication
- Mobile bowser and vehicle-mounted dispensing packages
- Cube tank and mobi tank integration
- Customization as per customer requirement

Customised projects for depot, mining and industrial sites

Automatic filtration at scheduled times, particle counter options and fuel treatment plant configurations.

1000 X 2 Fuel Filtration Unit 1000LPM

Mobile fuel filtration Filkit For (Petrol/Diesel/ATF)

1500 LPM 2 STAGE FIXED FILTRATION UNIT

2000LPM Fixed Fuel Polishing Unit With Particles Counter

Filtration System Installation In Fueling Station

● Fuel decanting with filtration system

● High-flow filtration systems

● Filtration unit install in fuel station

● Site-specific fabricated skid packages

Why filtration matters in fuel handling

Fuel filtration helps maintain quality, reliability, equipment protection and operational safety.

Contaminant removal

Removes dirt, rust, water and debris from tanks and fuel transfer lines.

Protection of components

Protects injectors, pumps and fuel system components from wear and damage.

Optimized performance

Clean fuel supports better efficiency, power output and reliable combustion.

Prevention of system damage

Helps reduce corrosion, seal damage, repairs and operational downtime.

Safety

Clean fuel reduces risk of malfunction, leakage and unsafe operation.

Project installations and high-flow filtration /Unloading Units

Project View

Digital BMS Integrated Fuel Unloading Skid

Mobile Fuel Unloading Unit

500 LPM Fuel Unloading Pump With Mechanical Flow Meter

Customized Diesel Engine Operated Fuel Unloading Skid

Pump + Filter Skid

3-stage Filtration Unit With Particle Counter

Depot / Refinery System

Capabilities: 3-stage filtration, inlet/outlet particle counter, automatic filtration cycles and site-specific filtration And Fuel Loading Unloading skid design.

At Vivek Enterprise, we listen to your needs and propose solutions.

Contact us for fuel transfer, filtration, dispensing, tank fabrication
and automation requirements.
