WORKFLOW EFFICIENCY

- An intuitive user interface with a large, responsive colour touchscreen makes carrying out tasks easy.
- Scalable support for mobile and flexible work styles can increase efficiency by allowing workers to capture or print documents and access certain cloud applications on the go.
- Advanced Personalisation enables a unique, personal experience across a fleet, creating a customized user experience tailored to meet each user's workflow needs.
- Scan and convert documents to Searchable PDF, Microsoft® Word, and Microsoft® PowerPoint files through a single-pass duplexing document feeder that holds up to 300 originals.
- Create professional-looking reports, booklets, newsletters, manuals, proposals, and contracts with flexible finishing options such as professional punching, folding, document insertion, and booklet-making.
- The optional imagePASS print controller, an ideal choice for busy operations, provides robust processing capabilities, variable data printing (VDP), and a print production workflow.

COST MANAGEMENT

- The ability to apply print policies, monitor output, and restrict usage by user helps reduce unnecessary printing, encourages cost recovery, and can help save money on paper and toner.
- Tight integration with output management solutions, such as uniFLOW, provides the ability to carry out detailed tracking, reporting, and cost analysis.
- Quality and reliability, combined with remote diagnostics and assistance, can help reduce costs by minimizing downtime and time spent by IT resolving issues.
- Consistent user operation combined with remote and centralized fleet management can help simplify IT management of devices and entire fleets.

SECURITY

- Control who has access to the device with authentication by using the standard Universal Login Manager application.
- Help prevent unauthorized distribution of sensitive information with an array of standard and optional document security features.
- Help ensure information privacy and security across your entire network with IPsec, port filtering capabilities, and SSL technology.

DEVICE AND FLEET MANAGEMENT EFFICIENCY

- The ability to pre-configure devices makes installation easy and fleet management is simplified with the capability to synchronize settings across multiple devices.
- Canon's device management tools give you a centralized point of control across your entire fleet, including the ability to check device status and consumables, turn off devices remotely, capture meter readings, as well as manage address books and printer drivers.
- Standard Genuine Adobe PostScript and PCL support integration with enterprise applications and legacy systems to help streamline business processes.

RELIABILITY

- Canon's signature reliability and engine technologies provide reliable high quality output to meet the needs of busy departments and Central Reprographics Departments (CRDs)/In-plant Printers.
- State-of-the-art imaging technologies and toner allow for consistently striking images in rich black-and-white tones and 1,200 dpi print resolution.
- Designed to achieve maximum uptime with status notifications to help keep supplies replenished, intuitive user maintenance videos, the ability to replace toner on the fly, and automatic job re-routing (with optional solutions).

SUSTAINABILITY

- Fusing technologies, pO toner, and innovative sleep mode features help lower overall energy consumption.
- Help minimize waste with default 2-sided printing, secure printing, and the ability to hold print jobs, preview them and change print settings at the device, helping to achieve the results you want the first time.
- Incorporates sustainable design, with the use of recycled materials and bio-based plastic, and a focus on minimizing environmental impact.
- ENERGY STAR qualified and rated EPEAT Silver.
