ABOUT US

Ceasefire is the most trusted fire safety brand in India and a fast emerging global conglomerate. With its globally certified, holistically integrated range of fire fighting solutions, the company is amongst the rarest in the world to have such a diverse product portfolio as part of one eco-system. The company is a leading manufacturer of a 360 degree unified product range that includes a complete line of Fire Extinguishers

with the widest Variety of extinguishing agents, **Special Application Extinguishers**, Highly advanced **In-Panel Suppression Systems**, **Total Flooding Systems**, Greenest technologies including **Inert Gas Based Suppression Systems**, Revolutionary **Watermist Based Suppression Systems**, Extensive range of Watermist and Wet chemical Based **Kitchen Fire Suppression Systems**, **Hydrant Systems**, **Fire Alarm Systems** and other highly specialised fire fighting technologies.

This extensive product portfolio is built at the very forefront of technology and conforms to the highest global standards and carry a host of international certifications by world's top-notch quality agencies including - **BIS, BS EN3, BS EN1866, LPCB, BSI, MED, PED, VDS, ISO 9001 and UL** . Manufactured at the company's state-of the art production facility

in India, Ceasefire's fire fighting solutions are setting global benchmarks in quality. Best names across industry segments in India and other parts of the world have counted on us for their safety, including global giants, MNCs, Government Agencies, Railways, Airports, Military & Strategic Establishments. Totalling 500,000 customers. We've never let anyone down, ever.

HOME & CAR FIRE EXTINGUISHERS

[CLASSIC RANGE]

Few minutes. That’s all the time you have before a fire gets out of control. And the time you have to detect it, rush your family to safety and fight the fire. Packed with modern utilities, homes today have become extremely prone to fire. That’s where Ceasefire’s Home and Car fire extinguishers come in.

FEATURES:

- Most potent against Home & Car fires.
- Simplicity in design.
- Portable and easy to use.
- Colors to suit your home decor.
- State-of-the-art pressure gauge.
- Easy snap safety seal.
- World-class quality.

WATER PORTABLE & WHEELED
EXTINGUISHERS [JET MODEL]

Water has always been fire’s deadliest foe. Ceasefire’s Water extinguisher uses proprietary Stored Pressure Technology to deliver a high power throw of water. This ensures it fights fires effectively and enables the firefighter to maintain a safe distance from the flames.

FEATURES:

- > Fights Class A fires.
- > EPDM / Braided Rubber Hosepipe.
- > Easy Snap Safety Pin.
- > State-of-the-art Pressure Gauge in portable range.
- > Powder Coated cylinder liner.
- > Deep Drawn Body in the portable range.
- > Extinguishant dispersed via specially designed Jet Nozzle.
- > Equipped with Schraeder Valve and Pressure Relief Valve [available only in portable range].

FOAM PORTABLE & WHEELED EXTINGUISHERS

[ASPIRATING MODEL]

Fire needs oxygen to grow. Without it, even the largest fires die out in minutes. Ceasefire’s Foam extinguisher exploits this weakness by discharging a mechanical foam that blankets the flames and cuts off the oxygen supply. It’s what we like to call simple and effective firefighting.

FEATURES:

- > Fights Class A and B fires.
- > State-of-the-art Pressure Gauge in portable range.
- > Deep Drawn Body in the portable range.
- > Stored Pressure technology for more effective firefighting.
- > Squeeze Grip mechanism for quick and easy use.
- > Epoxy polyester powder coated internal container lining.
- > Equipped with Schraeder Valve and Pressure Relief Valve [available only in portable range].

FOAM (FLUORINE FREE) PORTABLE EXTINGUISHERS

Ceasefire’s Fluorine-Free Foam Extinguishers are first of its kind that are poised to redefine the standards of fire safety.

The Fluorine-Free technology not only ensures uncompromised fire extinguishing capability but also aligns with global environmental sustainability goals. Engineered to provide a safer and eco-friendly alternative, Ceasefire’s Fluorine-Free Foam Fire Extinguishers mark a significant leap towards a greener and more responsible future in fire safety. As the world shifts towards more environmentally conscious solutions, our Fluorine-Free Foam Extinguishers stand as a testament to Ceasefire’s commitment to both effective firefighting and ecological responsibility.

FEATURES:

- 100% Biodegradable fluorine-free formulation.
- No PFAS/PFOA; Green screen silver certified agent.
- Effective on Class A and B fires.
- Unique aspirating nozzle design.
- ISO 9001 & CE certified and conforms to ISI standards.
- EN 1568-1/2/3/4 Compliant agent.

WATER PORTABLE EXTINGUISHERS

[SPRAY MODEL]

Water is a natural firefighting agent that helps bring down the temperature of the fire and the area around it. Ceasefire’s Water Spray model extinguishers can be used on Class A, F, and Electrically started fires, making them more effective against the fire.

FEATURES:

- Fights class A, F & Electrically Started Fires.
- EPDM/Braided Rubber Hosepipe.
- Easy Snap Safety Pin.
- State-of-the-art Pressure Gauge.
- Epoxy polyester powder coated internal container lining.
- Deep Drawn cylinder construction.

CARTRIDGE RANGE OF
FIRE EXTINGUISHERS
FIREPOWER, ON THE SPOT

ABC POWDER CARTRIDGE TYPE PORTABLE & WHEELED FIRE EXTINGUISHERS

Ceasefire's ABC Powder Cartridge kicks into action when you need them, where you need them. Being one of the most versatile extinguishing agents, Mono Ammonium Phosphate expands and forms a thin layer on top of the surface, controlling the fire and stopping re-ignition. The spot pressure technology makes the extinguishers highly safe for all types of spaces as the pressure is created only at the time of fire fighting.

FEATURES:

- Fights Class A, B, C and electrically started fires.
- Requires no prior training.
- Works quickly without wasting any extinguishing agent.
- Spot pressure technology makes extinguishers safe and reliable.
- Easy-to-use with quick activation.

WATER CARTRIDGE TYPE PORTABLE & WHEELED FIRE EXTINGUISHERS

These cartridge-type extinguishers employ the most efficient firefighting solution known to man, water. With its massive cooling power of 2.6 MW per litre per second, water kills even the largest of fires in minutes.

In the Ceasefire Water-based Cartridge, water is mixed with CO2 from the cartridge. When it comes in contact with a fire, the water turns into steam, cooling the area, cutting off the oxygen supply and killing the flames.

FEATURES:

- > Fights Class A, B, C and electrically started fires.
- > Requires no prior training.
- > Works quickly without wasting any extinguishing agent.
- > Spot pressure technology makes extinguishers safe and reliable.
- > Easy-to-use with quick activation.

FOAM CARTRIDGE TYPE PORTABLE & WHEELED FIRE EXTINGUISHERS

These cartridge-type extinguishers use foam to take on Class A and B fires. The Ceasefire Foam Cartridge is also equipped with a specialised nozzle or aerator that produces a thick foam that coats the surface of the fire and cuts off the oxygen supply. This makes them the perfect choice for chemical industries that use flammable liquids.

FEATURES:

- > Fights Class A, B, C and electrically started fires.
- > Requires no prior training.
- > Works quickly without wasting any extinguishing agent.

WATERMIST CARTRIDGE TYPE PORTABLE FIRE EXTINGUISHERS

Ceasefire’s Watermist Cartridge is powered by revolutionary Watermist technology, which harnesses the massive cooling power of water and multiplies it by 400. The Ceasefire Watermist Cartridge is the first of its kind extinguisher to offer Watermist technology or Foammist technology in an ultra-safe cartridge extinguisher.

The CO2 from the cartridge combines with the water in the container, breaking down into a fine mist of 54 microns in the mist generator nozzle. After coming into contact with fire, this fine watermist turns into steam, cooling down the area and killing the fire without causing any collateral damage to machinery.

FEATURES:

- Fights Class A, B, C and electrically started fires.
- Requires no prior training.
- Works quickly without wasting any extinguishing agent.
- Spot pressure technology makes extinguishers safe and reliable.
- Easy-to-use with quick activation.

FOAMMIST CARTRIDGE TYPE PORTABLE FIRE EXTINGUISHERS

This cartridge extinguisher uses the powerful Foammist extinguishing agent to take on the biggest of fires. Foammist is a revolutionary technology wherein the power of foam is multiplied hundreds of times over.

In Ceasefire’s Foammist-based Cartridge the foam in the container combines with CO2 in the cartridge, and is released through the mist generator nozzle as Foam-mist. Under 80 microns in size, this mist envelopes over the fire, cutting off the oxygen supply and putting out the fire.

FEATURES:

- > Fights Class A, B, C and electrically started fires.
- > Requires no prior training.
- > Works quickly without wasting any extinguishing agent.
- > Spot pressure technology makes extinguishers safe and reliable.

SPECIAL APPLICATION EXTINGUISHERS

TO PROTECT HIGH RISK SPACES.

WATERMIST PORTABLE EXTINGUISHERS

The cleanest extinguishing agent known to man - Water. These extinguishers use stored pressure technology, advanced rotors and specially designed nozzles to generate an ultra fine spray of water called Watermist. Blocking the entry of oxygen in the fire zone and bringing down the temperature to below combustion levels. Enter the Ceasefire watermist fire fighting systems that increase the power of water 400 times over.

FEATURES:

- Fights class A, F and Electrically started fires.
- Green extinguishing technology.
- Low water usage.
- Stainless steel containers.
- Environment friendly.
- Suitable for use on live electrical equipment upto 1000 V from a distance of 1 meter.

CAFS (WATERMIST COMPRESSED AIR FOAM SYSTEM - LOW PRESSURE)

Ceasefire's Compressed Air Foam System uses a specially designed discharge gun that expels approximately 100-micron sized droplets with a kinetic force strong enough to overcome the fire's convection currents. The watermist turns into steam, evaporates, and stops the fire from spreading. The foam component has a blanketing effect on the fire. The system is safe to use on Class B fires like petrol, diesel, and electrically started fires—two areas where traditional water applications would either spread the fire or cause an electrical shock.

FEATURES:

- Fights class A, B and Electrically started fires.
- Dual phase extinguishing gun with an adjustable nozzle.
- Pure water based green extinguishing technology.
- Thermal shock proof.
- No collateral damage.

CAFS (WATERMIST COMPRESSED AIR FOAM SYSTEM - HIGH PRESSURE)

Ceasefire Compressed Air Foam System features a high-technology gun that breaks foam into minuscule droplets. These droplets are then delivered through micro-nozzles with a high degree of dispersion onto the flames, allowing you to fight even very large fires successfully. This key process stops the fire from spreading and eliminates post-fire collateral damage such as flooding. The foam also acts as a perfect barrier against thermal radiation, giving increased protection to the firefighter.

FEATURES:

- Fights class A, B and Electrically started fires.
- Dual phase extinguishing gun with an adjustable nozzle.
- Pure water based green extinguishing technology.
- Thermal shock proof.
- No collateral damage.

QUAD (WATERMIST & FOAMMIST WHEELED EXTINGUISHERS)

Ceasefire Quad brings together the efficiency of a fire extinguisher with the power of a hydrant system. It breaks water down into a fine mist of under 80 microns and covers a large surface area, reducing the temperature to below combustion levels. Meant for areas where fire risk is huge, or where large amounts of combustible materials are stored, the trolley-mounted Quad can be taken anywhere with ease.

FEATURES:

- Fights class A, B, C, F and Electrically started fires.
- Green extinguishing technology.
- Low water usage.
- Highly safe and effective.
- Environment-friendly.
- Suitable for use on live electrical equipment upto 1000V from a distance of 1 meter.

TETRAQUAD

Ceasefire TetraQuad is a mini tender on wheels. A power-packed Watermist + Foam system that quadruples the firefighting power by four. TetraQuad’s firefighting might come from its four state-of-the-art multi-rotors working in sync with each of the four 62.5 ltr containers [totaling 250 ltrs in capacity].

FEATURES:

- > Works on class A and B fires.
- > Low pressure, safe technology.
- > 4 Cylinders, Massive Firefighting.
- > Easy-to-use with quick activation.
- > Environment-friendly.
- > Two modes of firefighting - Jet & Spray Mode.

WET CHEMICAL PORTABLE EXTINGUISHERS

[ASPIRATING MODEL]

In commercial kitchens, the liberal use of fire and the presence of combustible substances make it easy for a fire to flare up. Designed to fight kitchen oil and fat fires, Ceasefire's Wet Chemical fire extinguisher uses an environmental friendly foaming agent that blankets the flames, cuts off the supply of oxygen and cools the oil to below the self-ignition point.

FEATURES:

- Fights class A, F and Electrically started fires.
- Bio-degradable extinguishing agent.
- Reduces risk of re-ignition.
- Suitable for use on live electrical equipment upto 1000 V from a distance of 1 meter.
- Epoxy polyester powder coated internal container lining.
- Equipped with Schraeder Valve and Pressure Relief Valve.

CLEAN AGENT PORTABLE EXTINGUISHERS

Short circuits in the electrical mains or in sensitive electronic equipment are the most common causes of home and office fires. Powder extinguishers can extinguish these, but they also cause serious collateral damage. Ceasefire's Clean Agent extinguisher is armed with a cutting-edge clean agents which ensures the fire is put-out and expensive equipment is rendered damage-free.

FEATURES:

- Available in HFC236fa, HFC227ea, HCFC 123, FE-36, and Fluoroketone [FK].
- Fights class A, B, C and Electrically started fires.
- Zero collateral damage and residue-free.
- Magnetic Pressure Gauge.
- Safe Low Pressure Technology that does not displace oxygen in the fire zone.
- Zero Ozone Depletion Potential [ODP].

B PLUS SPECIAL APPLICATION (CLASS B) EXTINGUISHERS

Ceasefire's B Plus quadruples the power of a conventional extinguisher! It's the perfect extinguisher for petrol stations and petrochemical plants. The Ceasefire B Plus is ideal for Class B and C fires involving gasoline, alcohol, industrial chemicals, and more. When activated, its unique powder splits into four, covering a large surface area. So when faced with a high risk of class B fires like petrol, diesel, etc. You go for B Plus.

FEATURES:

- > Fights Class B, C and Electrically started fires.
- > Unique powder splits into four upon activation.
- > High power agent throw covers a huge surface area.
- > Equipped with Schraeder Valve and Pressure Relief Valve.

METAL FIRE EXTINGUISHERS

Industries that work with metals such as magnesium, potassium, sodium, titanium, uranium and calcium are at a high risk of fire. Using the wrong extinguishing agent in this case may cause more damage. The Ceasefire SPM-TEC and SPM-PYRO are ideal combatants against fires involving heavy metals, alkali metals and their alloys. They are powerful enough to stop metal fires of up to 5000°C. Dead in their tracks. Within minutes.

FEATURES:

- Fights class D fire.
- Deep drawn mild steel container.
- Powder Coated cylinder liner.
- Special Cascade Nozzle to aid effective agent dispersal over fire.
- Equipped with Schraeder Valve and Pressure Relief Valve.
- SPM-TEC effectively fights light metal fires like Magnesium [Mg], Lithium [Li], Sodium [Na], Potassium [K], etc. which produce heat up to 2000°C.
- SPM-PYRO effectively fights heavy metal fires like Plutonium [Pl], Titanium [Ti], Lead [Pb], Zinc [Zn], Copper [Cu], etc. which produces heat up to 5000°C or above.

LITHIUM BATTERY FIRE EXTINGUISHERS

Ceasefire's lithium battery fire extinguishers are specifically engineered to fight lithium battery fires. The water-based firefighting gel provides versatile fire extinguishing capabilities. This biodegradable agent, with no PFOS/PFAS, is an environmentally conscious choice that minimizes damage to the surrounding environment.

Ceasefire's lithium battery fire extinguishers reduce damage by rapidly cooling and encapsulating the flames. Their user-friendly design makes them well-suited for both residential and commercial use.

FEATURES:

- > Specialised encapsulating agent.
- > 100% Biodegradable & non-toxic.
- > No PFAS/PFOS.
- > Reduces toxicity.
- > Highly potent on lithium battery fires.
- > Also effective on Class A and B fires.

Automatic Extinguishers

24X7 Automated Fire Protection

AUTOMATIC FIRE EXTINGUISHERS

[WALL MOUNTED]

Ceasefire's Wall Mounted Automatic Fire Extinguisher addresses two simple problems; first of fire safety and second of space crunch. Being an automatic extinguisher it is ideal for spaces like boats and engine compartments that are not just prone to fire but also have limited space, where installing an extinguisher can be a challenge.

FEATURES:

- Comes in option of Fluoroketone and Powder.
- Clean agent Fluoroketone based extinguishers do not fall under the ambit of F-gas regulations.
- Works on all classes of fire.
- Automatic detection and suppression.
- Comes with a secure mounting bracket for direct installation on the wall.
- Optional flexible mounting bracket that enables optimal positioning of the extinguisher in the risk zone.

AUTOMATIC FIRE EXTINGUISHERS

[CEILING MOUNTED]

There are areas in a workplace that contain highly flammable materials with little or no human traffic. Here, the chances of fire going undetected are high. Ceasefire’s Ceiling mounted extinguisher detects the rising temperature of the area and activates automatically, even when there’s no one around, ensuring that the fire is brought under control early and efficiently.

The image shows the interior of a fire alarm control panel. On the left, a red fire alarm bell is mounted on a black bracket with the 'CEASE FIRE' logo. To the right of the bell are four vertical terminal blocks with red, yellow, blue, and red wiring. Below these are four white terminal blocks with multiple terminals, each with a label. The background is a bright orange panel.

CEASEFIRE MINI

THE BIGGEST, SMALLEST
FIREFIGHTER.

CEASEFIRE MINI

The Mini is Ceasefire's state-of-the-art micro-environment suppression system. Palm-sized, it sits snugly inside small enclosed spaces that are vulnerable to fire. When the temperature of the micro-environment exceeds a preset limit, the Mini swings into action and extinguishes the fire. Servers, fuse boxes; the Mini fits anywhere, and protects everywhere.

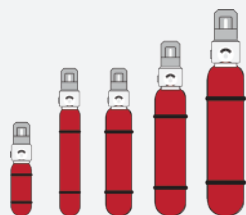

FEATURES:

- Fights all classes of fire.
- Self-activated and easy to install.
- No power supply required.
- Heat-sensitive glass bulb acts as a heat sensor and actuator.
- Mini is based on an environment friendly clean agents.

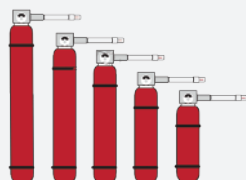

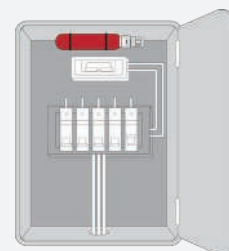

bsi.
Tested

Types of Mini:

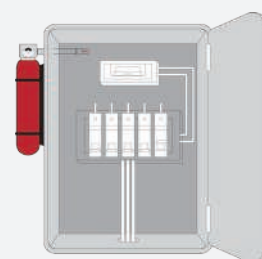

Intuitive System

The Mini Intuitive System is a direct suppression system, which protects the micro-environment from enclosed area inside. Place it inside, or attach it to the inner wall of the micro-environment, and the Mini is ready to protect.

Adaptive System

The Mini Adaptive System is an indirect suppression system designed for those micro-environments which are too small to even accommodate a Mini, let alone other firefighting systems. In this case, the Mini container is installed on the outside, with its heat-sensitive glass bulb inside the micro-environment.

CEASEFIRE LAUNCHER

WORLD'S FIRST EXTINGUISHER
THAT WORKS ON AUTO-PILOT

LAUNCHER (EXTINGUISHER + MODULAR SUPPRESSION SYSTEM)

This one-of-a-kind extinguisher can be used to fight a fire manually, on auto-pilot when it senses a rise in temperature, or be thrown into the flames. This make it a revolutionary extinguisher that ensures no fire ever goes undetected or unaddressed. Its biggest advantage, is that it eliminates the need for a firefighter to go anywhere near the fire. A huge benefit, especially in case of a large blaze.

FEATURES:

- > Fights class A, B, C and Electrically started fires.
- > Unique Discharge Mechanism.
- > Self-Actuation.
- > Quick and effective.
- > Two Heat Sensors.
- > Extinguisher + Modular Suppression System.
- > Equipped with Schraeder Valve and Pressure Relief Valve.

Premium Range Of **EN APPROVED** Fire Extinguishers

HOME & CAR FIRE EXTINGUISHERS

[CLASSIC RANGE]

Ceasefire’s range of Home & Car extinguishers take the guesswork and confusion out of choosing an extinguisher and save valuable time. Mono Ammonium Phosphate being a potent firefighting agent maximises the fire fighting power. These extinguishers are easier to use than others because of their lightweight 'point and shoot' design.

FEATURES:

- > Most potent against Home & Car fires.
- > Simplicity in design.
- > Portable and easy to use.
- > Colors to suit your home decor.
- > State-of-the-art pressure gauge.
- > Easy snap safety seal.
- > World-class quality.

CO2 PORTABLE & WHEELED EXTINGUISHERS

Ceasefire’s sturdy and light CO2 extinguisher is very effective in putting out fires in larger spaces. Packed with tremendous power, it reduces the fire’s oxygen supply, and brings the temperature down drastically, extinguishing the flames in seconds.

FEATURES:

- Fights Class B, C and Electrically started fires.
- Frost-free horn to dispense gas, removes risk of freeze burn.
- State-of-the-art Used/Ready indicator in selected range.

FOAM PORTABLE & WHEELED EXTINGUISHERS

[ASPIRATING MODEL]

Fire needs oxygen to grow. Without it, even the largest fires die out in minutes. Ceasefire's Foam extinguisher exploits this weakness by discharging a mechanical foam that blankets the flames and cuts off the oxygen supply. It's what we like to call simple and effective firefighting.

FEATURES:

- Fights Class A and B fires.
- State-of-the-art Pressure Gauge in portable range.
- Deep Drawn Body in the portable range.
- Stored Pressure technology for more effective firefighting.
- Squeeze Grip mechanism for quick and easy use.
- Equipped with Schraeder Valve and Pressure Relief Valve [available only in portable range].

FLUORINE FREE FOAM FIRE EXTINGUISHERS

Ceasefire’s Fluorine-Free Foam Extinguishers are first of its kind technology that not only ensures uncompromised fire extinguishing capability but also aligns with global environmental sustainability goals. Engineered to provide a safer and eco-friendly alternative, Ceasefire's Fluorine-Free Foam Fire Extinguishers mark a significant leap towards a greener and more responsible future in fire safety. As the world shifts towards more environmentally conscious solutions, our Fluorine-Free Foam Extinguishers stand as a testament to Ceasefire's commitment to both effective firefighting and ecological responsibility.

FEATURES:

- 100% Biodegradable Fluorine-Free Formulation.
- No PFAS/PFOA; Green Screen Silver Certified Agent.
- Effective on Class A and B fires.
- Unique Aspirating nozzle design.
- ISO 9001 & CE Certified and conforms to ISI standards.

FOAM PORTABLE EXTINGUISHERS

(SPRAY MODEL)

The quickest way to kill a fire is by limiting the oxygen supply in the vicinity. Ceasefire’s Foam Spray model extinguishers forms a foam blanket, cutting down on the oxygen supply. It works on Class A, B, F, and Electrically started fires.

FEATURES:

- Fights class A, B, F & Electrically Started Fires.
- Deep Drawn cylinder construction.
- Stored Pressure technology for more effective firefighting.
- Squeeze Grip mechanism for quick and easy use.
- Equipped with Schraeder Valve and Pressure Relief Valve.

CARTRIDGE TYPE PORTABLE FIRE EXTINGUISHERS [ABC POWDER, WATER, FOAM & WATERMIST AS AGENT OPTIONS]

Ceasefire cartridge type, portable fire extinguishers kick into action when you need them, where you need them. In the event of a fire, all you need to do is remove the safety seal and press the trigger firmly to activate the fire extinguisher. This punctures the cartridge and releases the cartridge gas into the container holding the extinguishing agent, creating the pressure required to throw the extinguishing agent over the fire.

The spot pressure technology makes the extinguishers highly safe for all types spaces as the pressure is created only at the time of fire fighting.

FEATURES:

- Spot Pressure technology makes extinguishers safe and reliable.
- Easy-to-use with Quick Activation.
- Wide choice of Agents: ABC powder, Foam, Water and Watermist.
- Tamper proof safety seal.

CLEAN AGENT PORTABLE EXTINGUISHERS

Ceasefire's Clean Agent Portable Extinguishers are one of most powerful extinguishers in our portfolio. It has zero ODP [Ozone Depletion Potential] and is an easy pick for the concerned corporates. While powder-based extinguishers are adept at handling electrically started fires, Clean Agent-based Extinguishers are built to put-out such fires and save sensitive electronic equipment too.

These extinguishers adhere to the most stringent international norms on fire safety and many times surpass them too.

FEATURES:

- Available in HFC236fa and FE36.
- Fights class A, B, C and Electrically started fires.
- Zero collateral damage and residue-free.
- Magnetic Pressure Gauge.
- Zero Ozone Depletion Potential [ODP].
- Safe Low Pressure Technology that does not displace oxygen in the fire zone.

WET CHEMICAL PORTABLE EXTINGUISHERS

In commercial kitchens, the liberal use of fire and the presence of combustible substances make it easy for a fire to flare up. Designed to fight kitchen oil and fat fires, Ceasefire's Wet Chemical fire extinguisher uses an environmental friendly foaming agent that blankets the flames, cuts off the supply of oxygen and cools the oil to below the self-ignition point.

FEATURES:

- Fights class A, F and Electrically started fires.
- Biodegradable extinguishing agent.
- Reduces risk of re-ignition.
- Suitable for use on live electrical equipment upto 1000 V from a distance of 1 meter.
- Equipped with Schraeder Valve and Pressure Relief Valve.

B PLUS SPECIAL APPLICATION (CLASS B)
EXTINGUISHERS

Ceasefire's B Plus quadruples the power of a conventional extinguisher! It's the perfect extinguisher for petrol stations and petrochemical plants. The Ceasefire B Plus is ideal for Class B and C fires involving gasoline, alcohol, industrial chemicals, and more. When activated, its unique powder splits into four, covering a large surface area. So when faced with a high risk of class B fires like petrol, diesel, etc. You go for B Plus.

FEATURES:

- Fights Class B, C and Electrically started fires.
- Unique powder splits into four upon activation.
- High power agent throw covers a huge surface area.
- Equipped with Schraeder Valve and Pressure Relief Valve.

FOAMMIST & GREEN-FOAMMIST
PORTABLE EXTINGUISHERS

Ceasefire Foammist extinguisher range, harnesses the combined power of the revolutionary watermist technology and foam in its range of extinguishers. The foammist fire fighting system forms a foam blanket on top of the fire, thereby eliminating entry of oxygen and killing the fire instantly.

FEATURES:

- > Fights class A, B, F and Electrically started fires.
- > Green extinguishing technology.
- > Low water usage.
- > Highly safe and effective.
- > Environment-friendly.
- > Suitable for use on live electrical equipment upto 1000 V from a distance of 1 meter.

WATERMIST, FOAMMIST & GREENFOAMMIST WHEELED EXTINGUISHERS

Portable water-based extinguishers on the premises can fight the flames if the fire is detected early but have little capacity to fight the fire in a long battle or a big fire. The need of the hour is for a portable system with humongous firefighting power that doesn't cause any further damage. Ceasefire's power-packed Watermist, Foam mist or Green Foam mist-based system takes firefighting up a few notches. Approximately 400 times.

FEATURES:

- Fights class A, B, C, F and Electrically started fires.
- Green extinguishing technology.
- Low water usage.
- Highly safe and effective.
- Environment-friendly.
- Suitable for use on live electrical equipment upto 1000V from a distance of 1 meter.

LITHIUM ION BATTERY PORTABLE EXTINGUISHERS

Ceasefire's lithium battery fire extinguishers are specifically engineered to fight lithium battery fires. The water-based firefighting gel provides versatile fire-extinguishing capabilities. This biodegradable agent, with no PFOS/PFAS, is an environmentally conscious choice that minimises damage to the surrounding environment.

Ceasefire's lithium battery fire extinguishers reduce damage by rapidly cooling and encapsulating the flames. Their user-friendly design makes them well-suited for both residential and commercial use.

FEATURES:

- > Specialised Encapsulating Agent.
- > 100% Biodegradable & Non-Toxic.
- > No PFAS/PFOS.
- > Reduces Toxicity.
- > Highly potent on lithium battery fires.
- > Also effective on Class A and B fires.

LITHIUM BATTERY COMPRESSED AIR FIRE EXTINGUISHERS

Ceasefire's lithium battery fire extinguishers are specifically engineered to fight lithium battery fires. The water-based firefighting gel provides versatile fire-extinguishing capabilities. This biodegradable agent, with no PFOS/PFAS, is an environmentally conscious choice that minimises damage to the surrounding environment. The special 9ltrs and 50 ltrs variants come in unique backpack and trolley-mounted designs and are powered by external compressed air cartridges and specialised guns which can easily shift from a jet discharge mode to a Spray mode with a simple turn of the bezzle.

FEATURES:

- > Specialised Encapsulating Agent.

CEASEFIRE ACCESSORIES

Increasing the Agility & Intelligence Quotient of Fire Extinguishers

FIRE SUITS

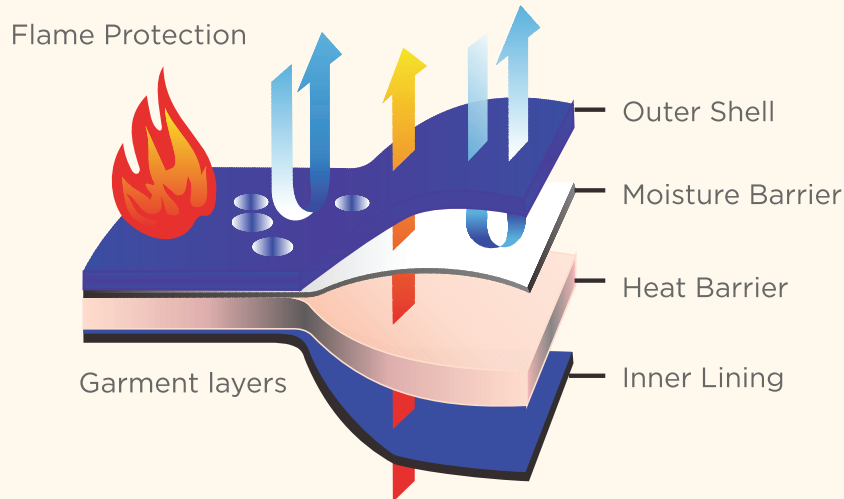

A blazing fire emits massive amounts of heat and smoke, making it dangerous, and at times, impossible to approach. This seriously hampers the ability to extinguish the fire. Which is precisely why, Ceasefire Fire Suits offer the protection required to get close enough to a fire, fight it effectively and avoid injury.

FEATURES:

- High heat resistance; withstands heat at about 100⁰ C in flash fires without any burning or melting and less than 5% shrinkage.
- Limited inflammability.
- 450N tensile strength, seam tensile strength and residual strength.
- 25N tear strength.
- Marked with strategically located fluorescent 3M reflective tapes.

THREE CRITICAL ELEMENTS THAT GIVE CEASEFIRE FIRE SUITS A DEFINITE EDGE:

- Four layer protection
- International quality standards
- Tough heat-resistant fibre, namely Nomex, Kevlar and PBI Gold

POWER

Entry-level fire suits to tackle small and medium-sized fires.

ALUSTAR

Dual-mirror Kevlar fabric for proximity, bulk flammable liquids and flammable gas firefighting.

ARCSTAR

Designed to guard against the intense, destructive heat of electrical arcs.

METALSTAR

DuPont NOMEX MetalPro Plus, the perfect guard against industrial hazards like molten metal splash.

CEASEFIRE INSTALERT

Even though environments are protected with fire extinguishers, what protects the extinguishers from being misused, vandalised or stolen? What you need is a device that can protect the extinguisher 24x7. So that in the case of an emergency, the extinguisher works perfectly, puts out the flames and saves lives

FEATURES:

- > Anti-theft fire alarm.
- > Highly visible, compact design that’s easily mountable.
- > Powerful 98dB warning alarm when activated.
- > Self-contained 9V DC alkaline power source.
- > Tough polycarbonate housing.

STROLLEYS

Fires can happen anywhere and at any time. Which makes it important to install extinguishers in relevant places. But, what happens when a fire breaks out and the equipment is not easy to ferry around? Ceasefire presents the perfect accessory to mobilise your fire fighting equipment. Our range of innovative fire extinguisher strolleys are capable of carrying one or two extinguishers. Think of them as life savers on wheels.

FEATURES:

- > High quality construction for easy mobility.
- > Retractable handles.
- > Photo luminescent signs for visibility through smoke and darkness.
- > Powder-coated, rustproof bodies.
- > Available in Single Type & Double Type

FLAT PACK TUBULAR EXTINGUISHER STANDS

[CHROME]

An aesthetically pleasing design that epitomises functionality, these Fire Extinguisher Stands in Chrome finish are an ideal choice for most spaces. The stands come with a CO2 fixing bracket and a J-bracket for easy and steady installation along with a provision to attach a sign clip for extinguisher identification.

FEATURES:

- > High quality tubular frame in chrome finish.
- > Tubing diameter of 25mm.
- > Black plastic base to protect the stand.
- > Comes in a box packaging for ease of transit and storage.
- > Easy to assemble.
- > Available in Single, Double, and Triple extinguisher stand variants.
- > Available in Chrome & Red Finish.

SIGNAGES

Did you know that the majority of the fires start in electrical mains, or because of an electrical short circuit? And even those fires that start elsewhere may, eventually result in a failure of electricity, because of damage to the mains and wiring. Which means that in a fire situation, you can be sure that at some point, the entire premises will be plunged into darkness.

Noxious black smoke will fill the air, increasing the risk of asphyxiation for all in the area. A frightening scenario when you consider the fact that asphyxiation and smoke poisoning are the highest causes of casualties in any fire. Darkness and poisonous smoke. A sure recipe for panic and utter chaos.

In such a situation, the single most important need of the hour is to evacuate all those on the premises to the nearest point of safety. As efficiently and quickly as possible. And Ceasefire, quite literally, shows you the way

FIRE SAFETY SIGNS

Locator signs, fire extinguisher identification signs and more.

In case of a fire, the firefighting equipment on the premises needs to be located and activated quickly.

Ceasefire Fire Safety Signs help guide people to the nearest extinguishers, hosepipes, emergency alarms and so on.

ESCAPE ROUTE SIGNS

Exit signs, fire exit signs and more.

The fact is, you never know where you may be when fire strikes and results in pitch darkness. You could be far from your cabin, in an unfamiliar part of the premises.

Ceasefire's Escape Route Signs ensure that from any point on the premises, occupants will have clear directions to the closest safe exit in case of an emergency.

MARKING STRIPS

Exit signs, fire exit signs and more.

Marking strips are critical in areas that need special navigation in the dark, such as around pillars, corners, low-lying or protruding objects, heavy machines etc.

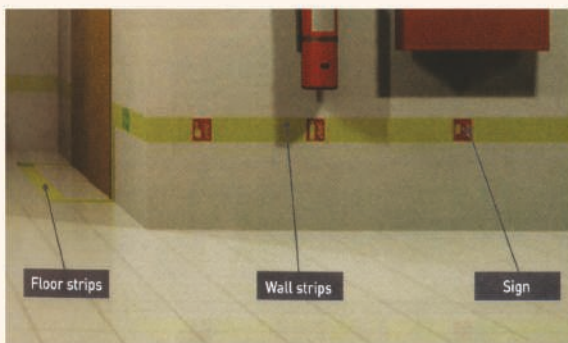

These floor-mounted strips glow brightly, to guide occupants on a safe, obstruction-free path to the nearest exit.

LOW-LEVEL SIGNAGE SYSTEM

Dense, black smoke from fires makes visibility harder than one can imagine. As the smoke rises, it can make even fire escape signs difficult to spot at a distance. This can hamper evacuation and firefighting.

The Low-Level Signage System is a comprehensive solution to this problem.

These durable, high-grade photoluminescent strips run throughout the premises, leading you to fire escapes, fire extinguisher locators, assembly points and evacuation routes. They complement, and can incorporate the entire range of Ceasefire SEE fire safety and escape route signs.

The low-level signage system follows a simple principle: as smoke rises, it becomes easier to see at a lower level. Therefore, installing these strips along the floor, and on walls at a height of 0.4 metres or less, makes them instantly visible. Even if the area is full of smoke.

The Ceasefire design cell helps in This process by surveying the entire location for obstructions, alternative exits and other contingencies, and customising the system for the location. A team of specialised engineers then install the system, without disrupting the normal functioning of the facility. So you don't have downtime or panic. Just a clear path to safety.

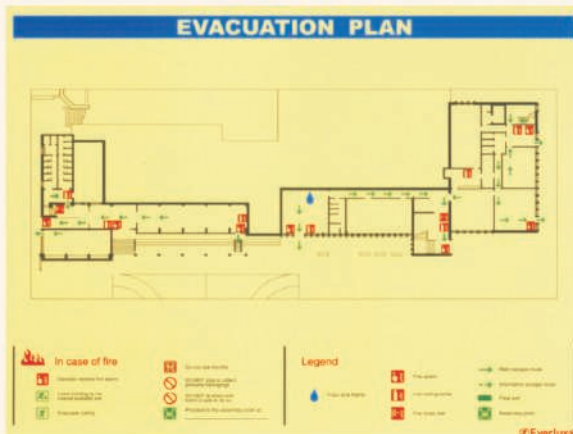

EVACUATION PLAN

In densely populated areas such as schools, factories, hotels, cinemas etc., with cubicles and complex layouts, it is extremely important to have an effective evacuation plan. In case of a fire, this plan could literally be the difference between tragedy and hundreds of lives saved.

And as with any life saving device, an evacuation plan is not something that can be bought across the counter and utilized in any

fashion. It requires careful planning and assessment by experts, to maximise both safety and efficiency of evacuation in an emergency.

The Design team at Ceasefire puts together meticulous evacuation plans only after carefully inspecting the premises, taking into consideration all the disparate factors that come into play if a fire breaks out.
