## STUCTURAL GLAZING AND CURTAIN WALLS

Structural glazing: It is a system of binding glass to a building's structural farming members utilizing a high strength , high performances silicone sealant specifically designed and tested for structural glazing . In structural glazing applications, dynamic wind loads are transferred from the glass by the structural silicone sealant to the perimeter structural support

## ALUMINIUM COMPOSITE PANEL

The aluminium sheets can be coated with Polyvinyldene fluoride (PVDF) or polyester paint. aluminium can be painted in any kind of color, and ACPs are produced in a wide range of metallic and non-metallic colors as well as patterns that imitate other materials, such as wood or marble. The core is commonly low-density polyethylene (PE), or a mix of low-density polyethylene and mineral material to exhibit fire retardant properties.

## SUSPENDED GLASS GLAZING OR SPIDER GLAZING SYSTEM

Suspended Glazing. Point-Fixed Glazing is also referred to as Suspended Glazing or Spider Glazing. The same can be achieved using different systems such as Glass Fin- System, Pre-Fabricated Compression Truss System, Steel-Post System, Tension Rod-Truss System or Cable-Net System

## GLASS CANOPY

A glass canopy provides an attractive and practical feature to a building. Usually placed outside entrance doors a canopy protects people entering the building, keeps the weather away from the doors and allows natural light through to the entrance area.

# ALUMINIUM SLIDING DOOR/WIDNOWS & FOLDING DOOR/WINDOWS

Aluminium doors and windows are available in several varieties of shades, patterns and styles. Powder coating is the process using which manufacturers can color aluminium frames in virtually every hue you desire. It is also possible to spray aluminium frames with different colors making them all the more diverse
