

CHAYAPUTHRA SERVICES

Engineering Excellence | Reliable Power | Intelligent Automation

VISION

To architect the future of intelligent infrastructure by bridging robust physical hardware with sophisticated operational intelligence.

MISSION

To deliver world-class, fault-free electrical and automation solutions that ensure sustained reliability, uncompromising safety, and peak system performance across global installations.

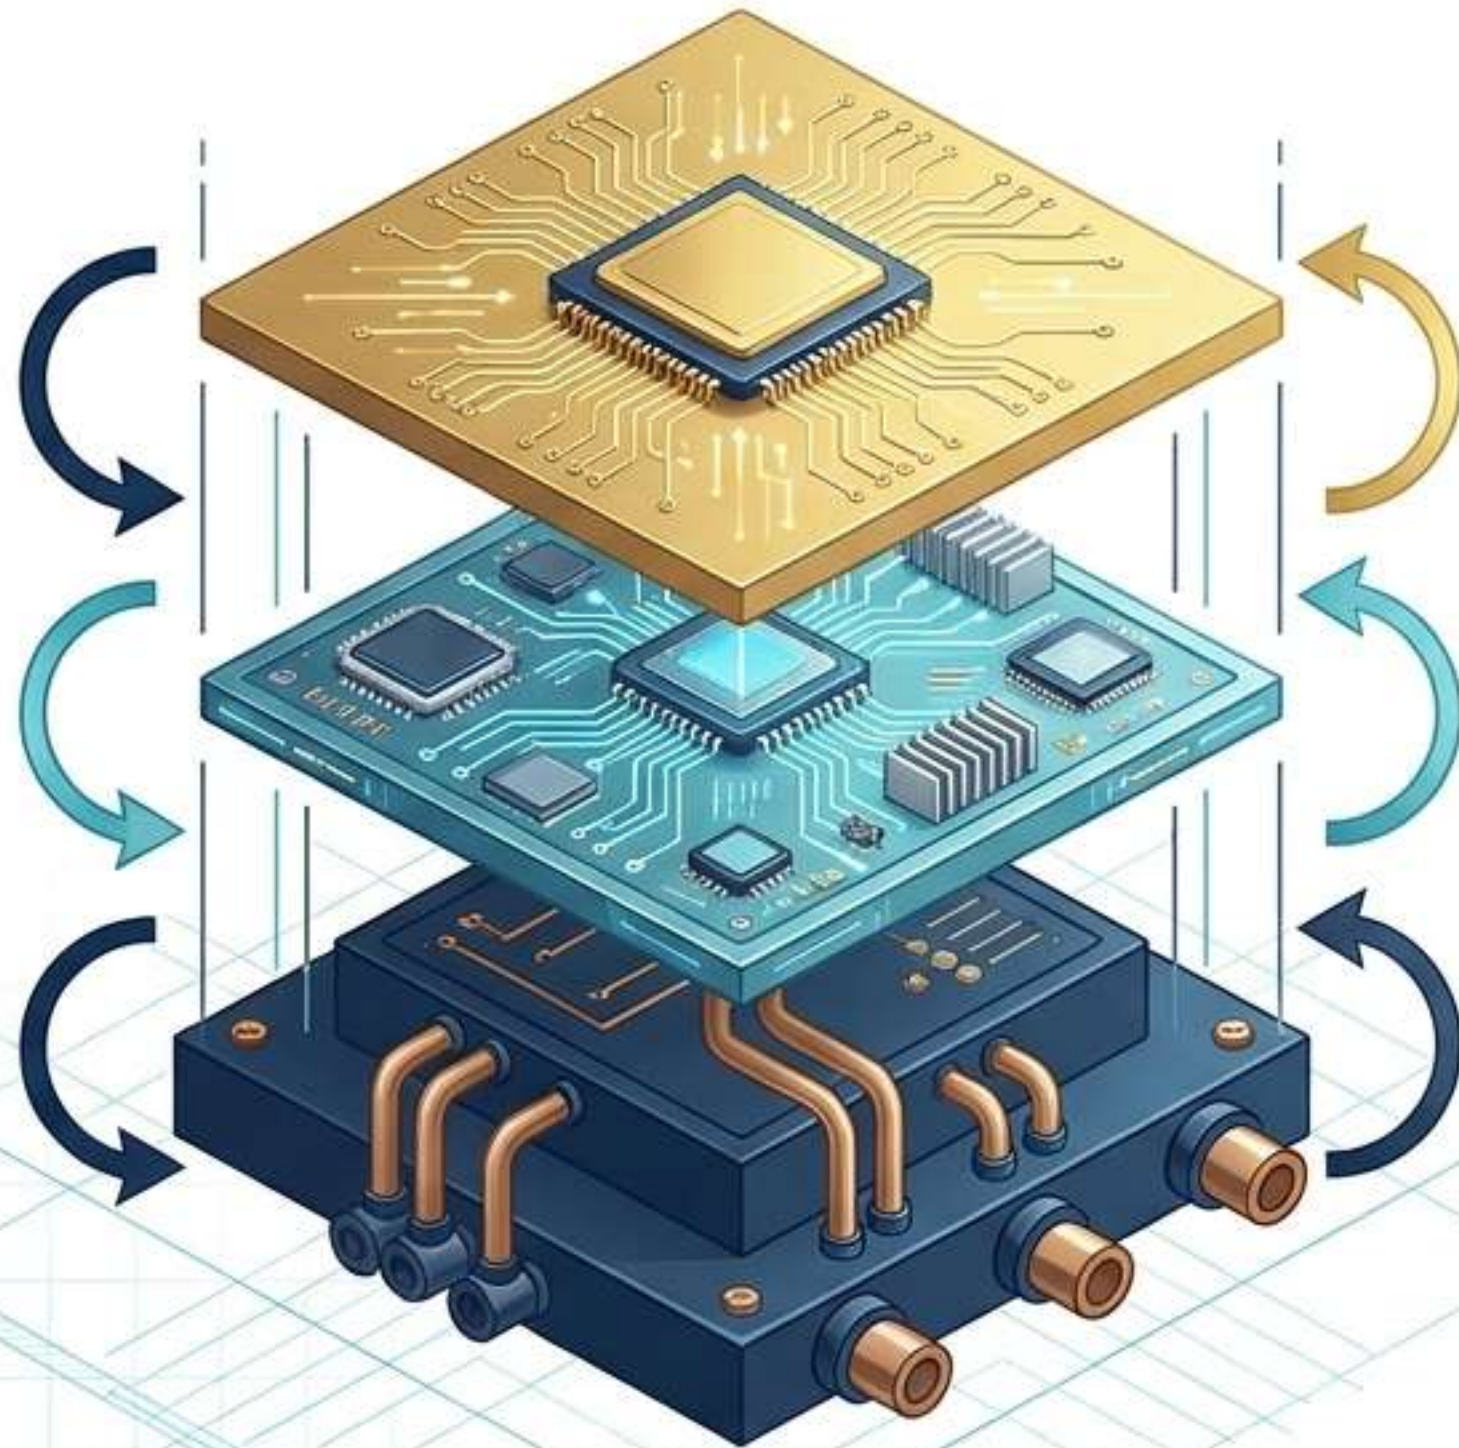

The Pillars of Excellence

The Benchmark Transformation

The Industry Standard		The Chayaputhra Benchmark	
Generic assembly	Quality Standard	ISO 9001:2015 Certified Quality	
Off-the-shelf	Engineering Model	Customised Solutions by Experienced Engineers	
Legacy electrical	Technology Integration	Latest Technology & PLC/SCADA Automation	
Variable timelines	Project Execution	On-time Delivery & Cost Optimisation	
Reactive repairs	Lifecycle Support	Preventive Maintenance & Strong After-sales Support	
Local baselines	Compliance	Strict Compliance with International Standards	

Integrated Services Architecture

Layer 3: The Lifecycle Sustenance (Continuous Care)

Installation & Commissioning, Preventive Maintenance, Annual Maintenance Contracts (AMC), Industrial Electrical Services.

Layer 2: The Intelligence Core (System Automation)

Industrial Automation, PLC Programming, SCADA Systems, Energy Management Solutions.

Layer 1: The Physical Foundation (Power & Distribution)

Electrical Contracting, MCC/PCC/APFC Panels, VFD & DG Synchronisation Panels, LT Power Distribution, Control Panel Manufacturing.

Layer 1: The Physical Foundation (Power & Distribution)

Layer 3: The Lifecycle Sustenance
(Continuous Care)

Layer 2: The Intelligence Core
(System Automation)

Layer 1: The Physical Foundation
(Power & Distribution)

Motor & Power Control:
MCC, PCC, and VFD Panels.

Power Factor & Backup:
APFC, AMF, and DG
Synchronisation Panels.

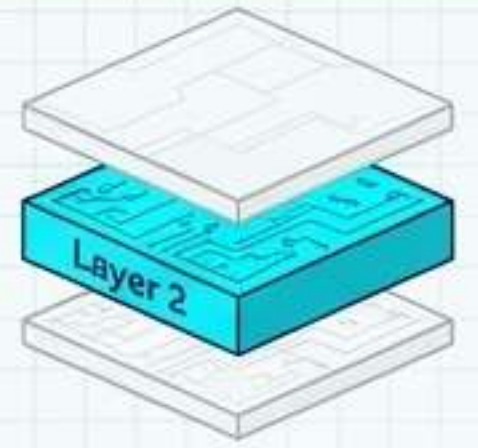

Distribution & Routing:
LT Power Distribution,
Bus Duct Systems.

Operator Interfaces:
Custom Control Desks with
ergonomic layouts.

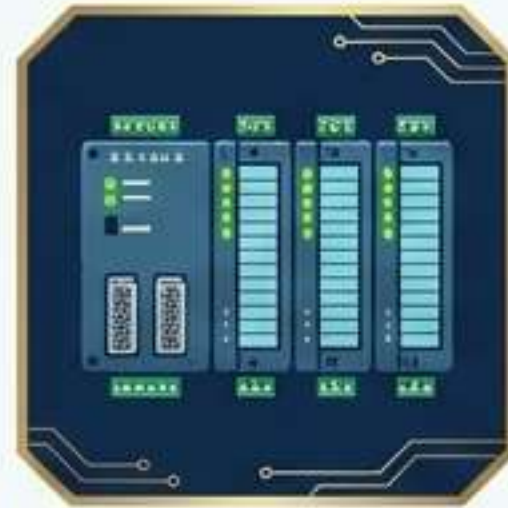

Manufactured to exacting ISO 9001:2015 standards using premium components for fault-free reliability in harsh industrial environments.

Layer 2: The Intelligence Core (Industrial Automation)

1. Automated Data Capture

Interfacing with HVAC, mechanical, and electrical subsystems.

2. Advanced PLC Programming

Tailored logic development using industry-standard platforms for exact process alignment.

3. SCADA Integration

Centralised, real-time visual monitoring and remote diagnostics.

4. Optimised Output

Real-time adjustments yielding reduced operational costs and optimised energy sustainability.

Specialised in Automation Retrofits to modernise legacy infrastructure.

Layer 3: Lifecycle Sustenance & Energy Optimisation

Modernise vs. Maintain

	Electrical Retrofits (Modernise)	AMC Services (Maintain)
Trigger	Aging infrastructure.	Need for risk mitigation.
Process	Transforming legacy setups with modern controls.	Tailored preventive care of electrical apparatus.
ROI	Increased property value and system efficiency.	Prolonged equipment life and zero downtime.

Uncompromising Quality & HSE Protocols

Quality Policy:

Unwavering commitment to process control, meticulous documentation, stringent inspection and testing, customer satisfaction, and continual improvement.

HSE Policy:

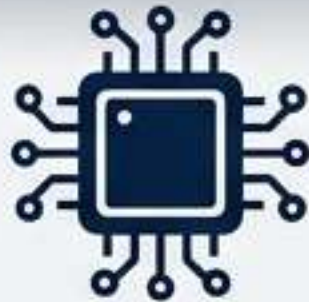

Strict adherence to corporate HSE protocols, ensuring zero-incident operations, environmental compliance, and the absolute safety of personnel and infrastructure.
