

ENERPRONE PVT LTD

GET A SOLUTION FOR ALL INDUSTRIES

INTRODUCTION

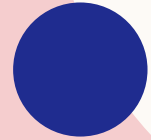

Enerprone Pvt. Ltd. presents a comprehensive range of Low Tension (LT) Control Panels designed to ensure safe, efficient, and dependable power distribution across industrial and commercial environments. Engineered with precision and built using high-quality components, our panels deliver superior performance, operational reliability, and long service life.

Our LT Control Panels are manufactured in compliance with recognized quality and safety standards, providing effective control, monitoring, and protection of electrical systems. With a modular and user-friendly design, they allow easy installation, simplified maintenance, and flexible system expansion to meet evolving operational needs.

Driven by a commitment to innovation, safety, and energy efficiency, Enerprone Pvt. Ltd. delivers solutions that support uninterrupted operations and enhance overall system productivity.

WHY CHOOSE US

Reputation: If "ENERPRONE PRIVATE LIMITED" has a strong reputation in its industry for reliability, quality, and customer satisfaction, it can be a significant factor in attracting clients. Positive word-of-mouth and online reviews can enhance this reputation.

Expertise: If your company has specialized knowledge or expertise in a particular area, such as energy solutions or related services, clients may be drawn to you for your proficiency and ability to address their needs effectively.

Innovation Companies that innovate and stay ahead of the curve in terms of technology, methodologies, or solutions tend to attract clients who are looking for cutting-edge services. Highlighting your innovative approaches can make you stand out in a competitive market.

Customer Service Exceptional customer service can be a significant differentiator.

WHAT WE DO?

At Enerprone Pvt. Ltd., we design and manufacture a complete range of **Low Tension (LT) Control Panels** for reliable power distribution, control, and energy optimization across industrial and commercial facilities.

Our product range includes:

- **PCC (Power Control Centre) Panels** – Centralized power distribution and protection
- **MCC (Motor Control Centre) Panels** – Efficient motor operation, control, and safety
- **APFC (Automatic Power Factor Correction) Panels** – Improved power factor and reduced energy losses
- **Energy Saver Panels** – Optimized energy usage and cost efficiency
- **Distribution Boards & Custom LT Panels** – Tailored solutions for specific project needs
- From design and engineering to testing and commissioning, we deliver solutions focused on safety, durability, and performance to support uninterrupted operations.

PRODUCTS

- **PCC (Power Control Centre) Panels**
Designed for centralized power distribution in industrial and commercial facilities. PCC panels ensure safe handling of high-capacity power with advanced protection, monitoring, and system reliability.
- **MCC (Motor Control Centre) Panels**
Built to control and protect multiple motors from a single system. MCC panels provide efficient motor operation, reduced downtime, and enhanced safety through integrated control and protection features.

- **APFC (Automatic Power Factor Correction) Panels**

Engineered to improve power factor automatically by regulating reactive power. APFC panels help reduce electricity penalties, improve system efficiency, and optimize energy consumption.

- **Energy Saver Panels**

Designed to minimize power wastage and enhance operational efficiency. These panels support energy optimization, lower operating costs, and promote sustainable electrical management.

- **Fire Fighting Control Panel**

Reliable control system for automatic and manual operation of fire protection pumps. Enerprone Pvt. Ltd. fire fighting panels ensure quick response, system protection, and continuous readiness for emergency situations.

- **Custom LT Panels & Distribution Boards**

Tailor-made solutions developed to meet specific project requirements, ensuring flexibility, safety, and seamless system integration.

PROJECTS UNDERTAKEN

Enerprone Pvt. Ltd. has successfully delivered LT Control Panel and cable work projects across diverse industrial and commercial sectors:

- **Steel Manufacturing Plant** — Complete LT panel supply (PCC, MCC, APFC) with power and control cable installation
- **Industrial Production Unit** — Motor Control Centres and distribution systems with testing and commissioning
- **Commercial Facility** — LT panels with energy optimization and distribution boards
- **Infrastructure Project** — Power distribution panels with full cable routing and termination
- **Utility & Process Industry** — Custom LT panels with system integration and performance testing

STRENGTHS

- **Team** - Strong team of expert experienced engineers and partners with relevant experience across industries and functions of plastic industries.
- **Customized & Optimized Solutions** - We design innovative solutions for every Project to deliver the best value after a thorough technical understanding of the requirement.
- **Quality** - Superior and Reliable products from the best manufacturers in their respective categories. Thorough project checks to ensure the best in class solutions.
- **Pedigree & Experience** - Strong backing in the field of industrial automation, high profile clientele and several success stories, all with the objective to provide the best engineering.
- **Solutions Service** – On-Time and Best-in-Class Service Support to ensure maximum Productivity.

VISION & MISSION

Vision - To be respected by customers for providing the most innovative and optimized solutions, by partners for the inclusive growth, by employees for exponential learning, engagement and development, by suppliers for being fair and honest in all transactions and by stakeholders for creating value.

Mission – Grow exponentially fast by innovating and diversifying in business segments and sectors.
