 Product Brochure
Product Details:

Range	6 meter
Brand	Parth Technologies
Usage/Application	Metal Detector
Capacity	500 Kg
Detecting Height	14 inch
Machine Type	Automatic
Voltage	240V

Specifications of our Tablet Metal Detector:

1. Detection Method: Advanced electromagnetic wave technology
2. Detection Sensitivity: Adjustable sensitivity settings for precise detection of metal contaminants
3. Compatibility: Accommodates tablets of various shapes, sizes, and packaging materials, including blister packs, bottles, and bulk containers
4. Construction: Durable metal housing for robustness and longevity
5. Display: Vibrant LCD display for easy operation and visual feedback
6. Alarms: Audible and visual alarms for instant detection alerts
7. Integration: Seamless integration with conveyor systems and other production equipment
8. Data Logging: Advanced data logging capabilities for comprehensive monitoring and record-keeping
9. Power Supply: Standard electrical power supply
10. Dimensions: Compact design for easy installation and integration
11. Compliance: Meets industry standards for product safety and quality control
12. Maintenance: Minimal maintenance requirements for enhanced productivity
13. Operating Environment: Suitable for demanding industrial environments
14. Certifications: Compliance with relevant regulatory standards

Note: The above specifications are provided as a general overview. For detailed technical specifications and customization options, please refer to the product manual or contact our sales team.

Alarm Mode Sound, Led Lights
Model Name/Number IMDPT

1. Detection Method: Highly sensitive electromagnetic wave technology combined with advanced digital signal processing.
2. Detection Sensitivity: Adjustable sensitivity settings to detect various sizes and types of metal contaminants.
3. Conveyor Belt Size: Customizable conveyor belt size to accommodate different FIBC bag dimensions and weights.
4. Belt Speed: Adjustable belt speed control to match the production line requirements.
5. Construction: Sturdy and durable stainless steel construction for reliability and longevity.
6. Detection Zone: Wide and efficient detection zone covering the entire width and height of the conveyor belt.
7. Display and Controls: User-friendly interface with a clear LCD display for easy operation and monitoring. Intuitive controls allow for quick adjustments and settings.
8. Alarms and Reject Mechanism: Audible and visual alarms signal the presence of metal contaminants, and an automatic reject mechanism can be integrated to remove contaminated bags from the production line.
9. Integration: Easy integration with existing conveyor systems and production equipment.
10. Data Logging and Reporting: Advanced data logging and reporting capabilities for comprehensive quality control and traceability.

Approx. Rs 1.5 Lakh / PieceGet Latest Price

	Product Brochure
Product Details:	
Minimum Order Quantity 1 Piece	
Brand	Parth Technologies
Usage/Application	Below FFS Line
Alarm Mode	Sound, Led Lights
Model Name/Number	GFMDPT- Head
Material	SS304
Sensitivity	Fe 0.8mm non Fe 1.0mm SS1.2mm
Suitable For	Food/ Pharma Industry
Country of Origin	Made in India

Key Features:

- 1. Free-Flowing Detection: Our Gravity Feed Metal Detector is specifically designed to handle the detection of metal contaminants in free-flowing bulk materials. It is well-suited for applications where materials flow through chutes, pipes, or other gravity-fed systems.
- 2. Advanced Metal Detection Technology: Utilizing advanced electromagnetic wave technology, our metal detector offers exceptional sensitivity to detect even the smallest metal particles. It ensures reliable and accurate detection, minimizing the risk of metal contamination in your products.
- 3. Seamless Integration: The Gravity Feed Metal Detector is designed for easy integration into your existing gravity-fed production line. It can be installed in-line with your material flow, providing continuous and uninterrupted metal detection without interrupting the production process.
- 4. Adjustable Sensitivity: Our metal detector offers adjustable sensitivity settings, allowing you to customize the detection levels based on the specific requirements of your materials. This flexibility ensures precise detection while minimizing false alarms and optimizing operational efficiency.
- 5. User-Friendly Controls: The metal detector features a user-friendly interface with intuitive controls. Operators can easily adjust settings, monitor detection results, and perform necessary operations, ensuring a smooth and efficient metal detection process.
- 6. Audible and Visual Alarms: When a metal contaminant is detected, the Gravity Feed Metal Detector activates both audible and visual alarms, alerting operators to take immediate action. This prompt notification ensures quick intervention and helps prevent further contamination.
- 7. Robust Construction: Constructed with durable materials, including stainless steel, the Gravity Feed Metal Detector is built to withstand the demands of industrial environments. It offers reliable performance, longevity, and minimal maintenance requirements.
- 8. Compliance and Reporting: Our Gravity Feed Metal Detector meets industry standards and regulations for metal detection. It also provides data logging and reporting capabilities, allowing for comprehensive traceability, quality control, and compliance with regulatory requirements.

Product Brochure

Product Details:

Minimum Order Quantity	1 Piece
Capacity	5000 tablets/hr
Material	Stainless Steel
Alarm Mode	Sound, Led Lights
Brand	Parth Technologies
Model Name/Number	MDPT-TC 100*30
Automation Grade	Analogue Version
Power Supply	Single Phase 230V 50Hz
Rejection Type	Quick Flap Rejection System With Bin
Sensitivity	Fe:0.3mm, non-Fe: 0.4mm, SS: 0.5mm

STANDARD FEATURES:

- Detection Theory: Auto Balancing with Product Effect Adjustment
- According to CGMPs Compliance
- Very High Throughput: Check Up to 5000 to 7000 Tablets / Capsules Per Minute
- Designed to Detect: ALL FERROUS, ALL NON-FERROUS & SS PARTICLES
- Aperture/Tunnel Size: 100mm (W) x 30mm (H)
- **Validated Test Calibration Kits (3 nos test pieces) Included**
- **NABL Certificate for Calibration Kits (3 nos) Included**
- Reject Mechanism De-attachable Type for Easy Cleaning & Washing
- Buzzer & Indicator Lamp Alarming
- DSP Technology with Digital Signal Filter
- Dual Channel Operation
- Easy Height Adjustment to Match the De-Duster Machine or Tableting Machine
- System can be Rotate 360° at place
- Auto PA and Auto Balance
- Product Effect Compensation
- Automatic Adjustment for Temperature Variation and Static Metal
- Imported Sensors and Coils
- High IP Standards to give Maintenance Free Resistance against Moisture, Dust & Water

Additional Information:

- **Production Capacity:** Capable to Serve with Bulk Orders
 - **Delivery Time:** 3 Weeks
 - **Packaging Details:** Standard Packaging Included
