KSL-H

Top Down Illumination

KSL-H3

Traditional Slit Lamp

Tower Illumination

3 Step Drum (10x, 16x, 25x)

Part Number 3020-P-2090

KSL-H5

Traditional Slit Lamp

Tower Illumination

5 Step Drum (6x, 10x, 16x, 25x, 40x)

Part Numbers 3020-P-2000

3020-P-2007

KSL-H3-DR

Digital Ready Slit Lamp

Available Add-Ons:

- TTI Beam Splitter w/ Canon SLR Camera
- 3 Megapixel digital camera
- Slit Diagnostic Software
- Konnect Software

Tower Illumination

3 Step Drum (10x, 16x, 25x)

Part Number 3020-P-2096

KSL-H5-DR

Digital Ready Slit Lamp

Available Add-Ons:

- TTI Beam Splitter w/ Canon SLR Camera
- 3 Megapixel digital camera
- Slit Diagnostic Software
- Konnect Software

Tower Illumination

5 Step Drum (6x, 10x, 16x, 25x, 40x)

Part Number 3020-P-2010

KSL-H3-DR

Digital Slit Lamp

3 Megapixel :

2048 x 1536 Camera

Portable Retinal Camera

PICTOR⁺ PLUS

The Pictor Plus portable ophthalmic camera can take your practice places. From the exam room to on-location screenings, nursing home calls and everywhere in between.

Two easily interchangeable modules provide high resolution retinal (non-mydriatic) or external eye imaging. Two additional modules are available for otoscopic and dermoscopic examination.

- **Retinal Module** - Pictor Plus retinal imaging enables non-mydriatic fundus examination with a 40° field of view. With digital still and video images, the appearance of optic disc, macula and retinal vasculature can be screened and documented for ocular lesions and anomalies.
- **Anterior Module** - Pictor Plus anterior imaging provides high-resolution digital image data of the surface of the eye and areas directly surrounding the eye. The cobalt blue LED light allows fluorescent imaging to detect a dry eye or any cuts or rashes on the surface of the eye.

Volk's Gonio Lenses are the industry standard for performing static, dynamic, and indentation gonioscopy. Our no flange G-Series lenses (G-1, G-2, G-3, G-4, and G-6) have a small contact area which maximizes patient comfort and minimizes corneal wrinkling during dynamic exams.

Volk's flanged G-Series and coated 3-Mirror gonio lenses can be used to perform laser trabeculoplasty for patients with primary open angle glaucoma. The standard flange on our G-Series gonio lenses and the advanced no fluid (ANF+) flange of our coated 3-Mirror lens provide optimal stability on the cornea during laser procedures. It is important to note that while the ANF+ flange does not require coupling fluid for routine examination, Volk does recommend using a coupling fluid for laser procedures.

Every glaucoma specialist should have at least one of Volk's gonio lenses in their portfolio.

G-1 Gonio

1-Mirror, All-Glass Design

- High magnification (1.50x) enables detailed viewing of the trabecular meshwork
- All-glass design provides superior clarity and durability
- Available in two formats : flanged (recommended for laser trabeculoplasty) and no flanged (recommended for routine gonioscopy)

Product code :

Flange : VG1 (as shown)
 No Flange : VG1NF

2D View

G-2 Gonio

2-Mirror, All-Glass Design

- High magnification (1.50x) combined with dual mirror angles (60°/64°) allows for both a detailed and a broad view of the anterior chamber
- All-glass design provides superior clarity and durability
- Available in two formats : flanged (recommended for laser trabeculoplasty) and no flanged (recommended for routine gonioscopy)

Product code :

Flange: VG2 (as shown)
 No Flange: VG2NF

2D View

Available in mini version for pediatric and patients with small orbits

G-3 Gonio

3-Mirror, All-Glass Design

- 60° mirror provides a view of the iridocorneal angle
- 66 mirror provides a retinal image from the equator to the ora serrata
- 76 mirror provides a view of the mid-peripheral/peripheral retina
- Available in two formats : flanged (recommended for laser trabeculoplasty) and no flanged (recommended for routine gonioscopy)

Product code :

Flange : Vg3
 No Flange : VG3NF (as shown)
 Gonio Mini, No Flange : VG3MININF (as shown)

DIAGNOSTIC IMAGING

DIAGNOSTIC IMAGING DEVICES

VISTAVIEW® | PICTOR PRESTIGE™ | PICTOR PLUS®

VISTA
V I E W®

Everyone SHOULD HAVE ONE

The VistaView was designed with the vision of addressing the overwhelming need that every eye doctor should have their own reliable, affordable, connected retinal camera without having to compromise on quality.

The VistaView integrates the power of Volk optics with the simplicity, portability, and affordability of smartphone technology, allowing everyone access and ownership of a quality portable, mydriatic retinal camera.

TAKE THE
VIEW WITH
YOU

VOLK

Do More. Pay Less.

Powered by Volk optics, **capture sharp, 55°** retina images with ease. The Vista View streamlines your patient data workflow, saving you time! Whether you are opening your first practice or adding portability to your existing imaging services, bypass the burden of heavy financing and rental agreements. Expand your reach by **owning your very own personal camera.**

Be Untethered. Stay Connected.

Take your VistaView anywhere! With its extremely light and ergonomic design that easily fits in your bag, you can take **exam room quality images anywhere** from waiting rooms to patient rounds to nursing homes and screening campaigns. Instantly generate reports with patient images and your notes on the spot. **Easily share reports and export DICOM** images for billing, consultations, and referrals on the go.

So Simple. Anyone Can Image.

We worked with you to make this device so obvious to use, you'll be up and imaging right out of the box. Anyone on your team can take high quality images in no time, without needing hours of demos, training, and learning - ideal for high staff turnover situations. The Vista View is also **perfect for busy residents, who are always on the go.**
