YOUR
MACHINE
BETTER THAN
OTHERS**

Scutes India Pvt. Ltd.

"Protect Everything"

Design & Manufacturing All Types Of Machine Protection Covers

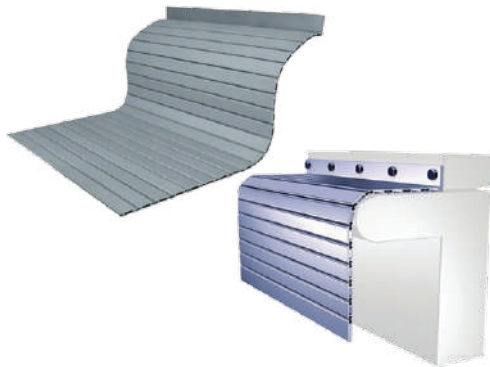

We are certified group engaged in providing complete protection solution for the precised sliding & rotating parts (i.e. Guide ways, ball screw) of the machine tools i.e. CNC Machining Centers, SPMS & Conventional General Purpose Machines.

We are accepting challenges of the Global market for Complex assemblies. We are expertise in batch production & prototyping.

Rollways Cover

Rollway Covers are used when space is limited & other types of guide-way covers are not suitable for the protection of the machine ways & screws against damage from hot chips cutting oils, lubricants & abrasive particles. Construction consists of high tensile synthetic fabric or spring steel shade mounted on spring loaded, roller take up mechanism housed.

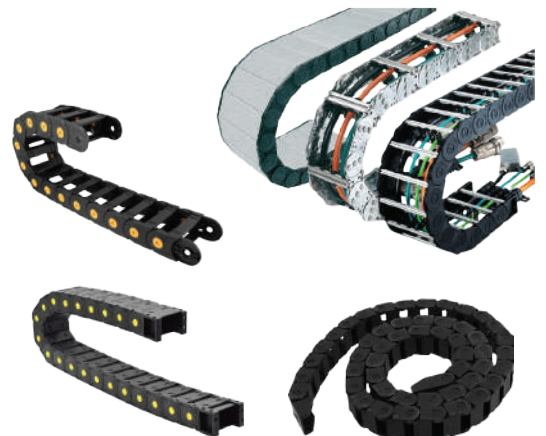

Apron Cover

Effectively engaged in offering a vast collection of outstanding quality products which include Apron Covers. These are made up of aluminium strips with fabric as base. Moreover, they form the simplest type of protective cover. In conjunction with roll-up mechanism, these can become an effective compact protection from hot chips.

Cable Drag Chain

The offered Cable Drag Chain are widely demanded in shipping, packaging and automobile industries for stacking and lifting goods. At our premises, the provided carrier is designed in adherence with predefined quality parameters with the aid of ultra-modern methods under adept supervision. Furthermore, these assortments are widely appreciated for its optimum strength, user-friendly anti-corrosive and easy to fix strong construction. We can customize these Cable Drag Chain for clients in diverse sizes and specifications as per their demands.

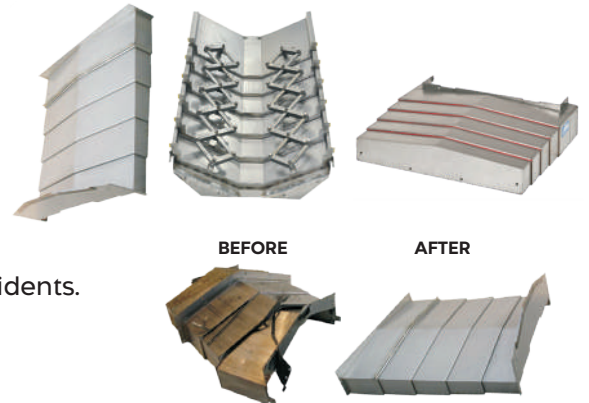

Apron Cover

Conical Spring Covers provide protection under extreme conditions. Conical spring cover protect spindles, columns, shafts, threads & rod guides reliably against contamination, chips & mechanical damage. They provide a installed in a suitable position. High temperature resistance & resistance to chemicals guarantee reliable protection even under extreme operating conditions. Made from 2mm to 5mm thick using SS material & Spring Steel Material.

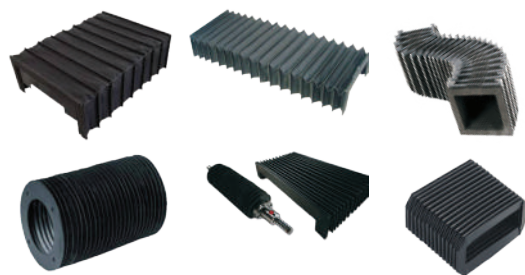

Telescopic Cover

Telescopic Steel Covers are an important part of a machine tool to increase the runtime. The using of it makes possible perfect protection of the Guide- way, Balls screw, etc. against mechanical influences like chips or chemical influences like coolants. Made from 1mm to 5mm thickness sheet of required material like SS, MS. Also provides good protection against accidents.

On sight/In-housed Refurbishing & reconditioning of Telescopic covers

We rebuilds your old damaged cover into new condition at a fraction of the new one.

Bellows Cover

Bellows will be made by Thermal Welded process. Bellow is the great option when a standard way protector is needed. Bellows are easy to fit with minimum closed length and high travel speed. These are fabricated using different grades of steel, rubber, PU coated, Foam leather, Glass fabric cloth depending upon the type & area of protection and work environment.

CNC Machine Enclosure

Owning to our broad domain expertness, we have brought a qualitative range of Sheet Metal CNC Machine Enclosure for our clients. This enclosure is designed in such a way that it can easily cover all kinds of CNC machines for protecting them from workplace debris and accidental impacts.

Conveyors

We are manufacturer and supplier of a wide range Conveyors. The conveyors offered by us find their wide application in modern material handling systems. These conveyors are available up-to 25 meters. These are precision designed and are used in various applications in different industries like machining, testing, sorting, and packing. These conveyors are widely appreciated due to cost effective prices.

Services :

Metal Laser Cutting

Material :
MS : Up to 25 mm.
SS : Up to 12 mm.
Brass : Up to 12 mm.
ALUMINIUM : Up to 12 mm.

Non Metal Laser Cutting

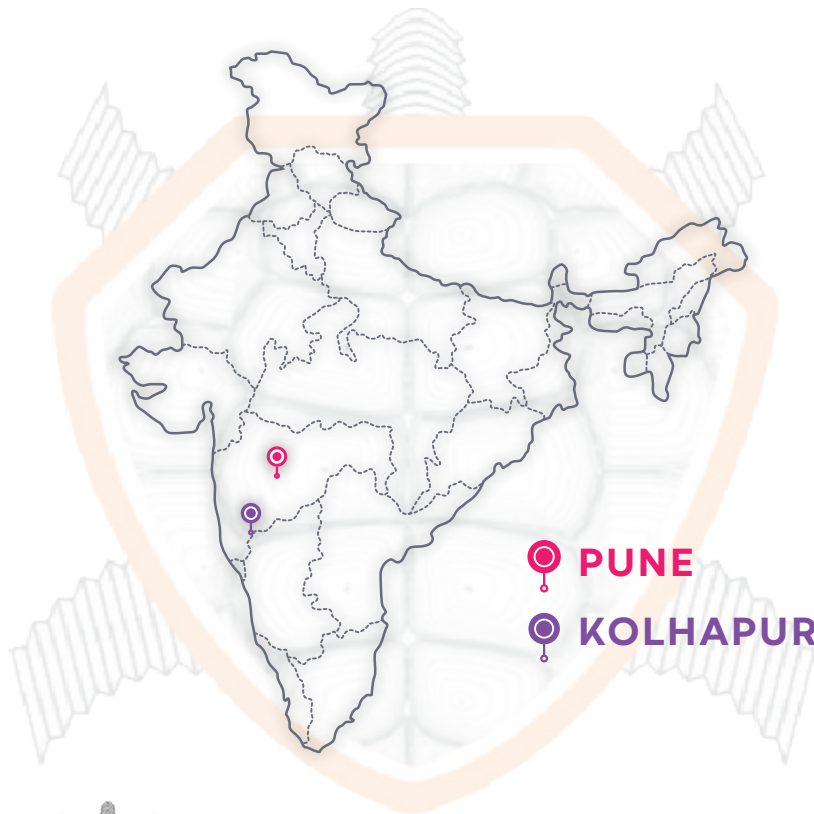

Material :
PVC : Up to 6 mm.
Acrylic : Up to 12 mm.
Nylon : Up to 6 mm.
Leather : Up to 5 mm.

CNC Bending

Capacity : 150 T
Material : Up to 10 mm.
Bed Size : 3000 mm
