14. Carpet Tiles
15. Hardware & Other Accessories

POP/GYPSUM PLASTER & ONE COAT POP

High-quality plaster materials used for creating smooth, durable interior surfaces and decorative finishes. Suitable for false ceilings, wall finishing, mouldings and other interior applications.

WALL PUTTY –

A smooth finishing material used to prepare and level interior wall surfaces before painting. It helps create a uniform, smooth surface while improving the overall finish and appearance of painted walls.

JOINTING COMPOUND-

A specialized compound used for filling and finishing joints between gypsum boards, plasterboards and Wall Panels. It provides a smooth, seamless surface, ready for sanding and final decoration.

Bond-

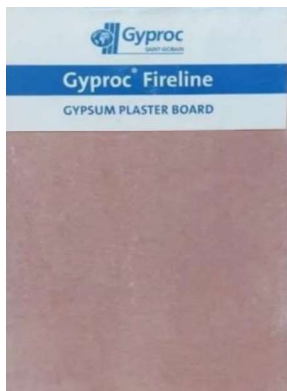

Bonding agents used to improve the adhesion of POP, gypsum plaster and other finishing materials to various surfaces. They help provide better grip, bonding strength and durability during application.

GYPSUM BOARDS

A versatile range of gypsum boards designed for modern interior construction, including **standard**, **moisture-resistant**, **fire-resistant** and other specialized boards. Suitable for false ceilings, partitions, wall systems and applications requiring specific performance and durability.

Brands: Gyproc • Knauf • Sakarni • India Gypsum

Cement Sheets & Wall Panels

A versatile range of durable cement sheets and decorative wall panels designed for modern construction and interior applications. Suitable for partitions, wall cladding, ceilings, facades and other finishing requirements.

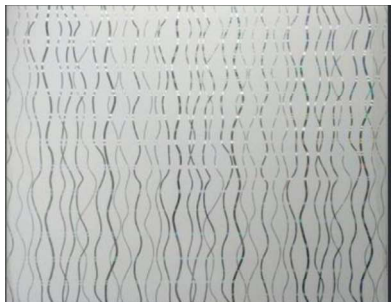

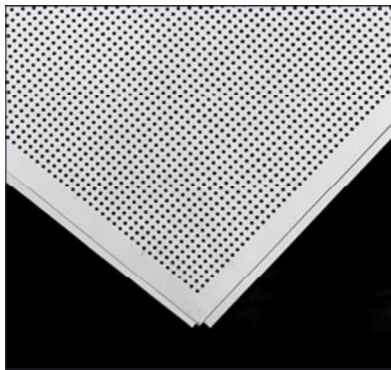

Brands: Everest • Visaka • Birla

Ceiling Tiles

Metal, gypsum and cement ceiling tiles offering practical and durable solutions for suspended ceiling systems, combining functional performance with a clean and finished interior appearance.

Brands: Everest • Arm-Strong • India Gypsum & Other

Baffle Ceiling

A modern suspended ceiling system featuring vertically arranged baffles that create a distinctive architectural look. Ideal for enhancing aesthetics while providing acoustic control and easy access to ceiling services.

NYLON MATS

Durable and versatile nylon mats designed for practical flooring and surface protection applications. Available in a range of patterns and finishes, offering easy maintenance, comfort and long-lasting performance.

Carpet Tiles

Modular flooring solutions designed for modern interiors, offering durability, comfort and easy maintenance. Ideal for offices, commercial spaces, hotels and other high-traffic areas, with a wide range of patterns and finishes.

Gypsum & POP GI Chenal

High-quality GI channels designed to form strong and stable frameworks for gypsum and POP ceiling and partition systems. Lightweight, durable and precision-shaped for efficient installation and long-lasting performance.

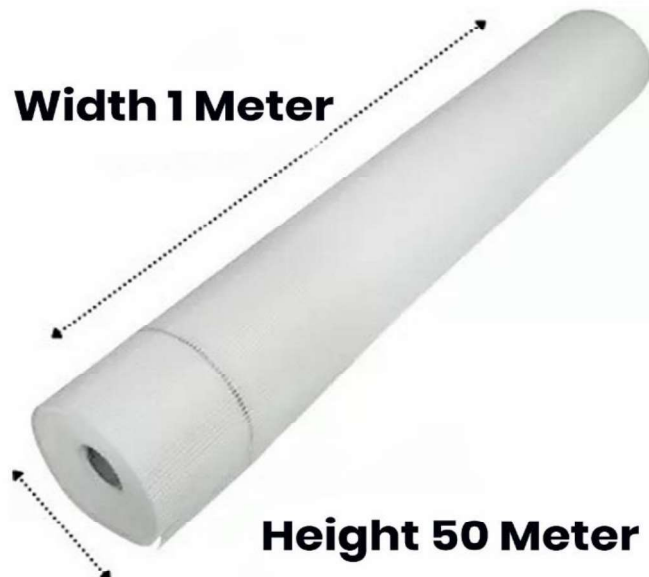

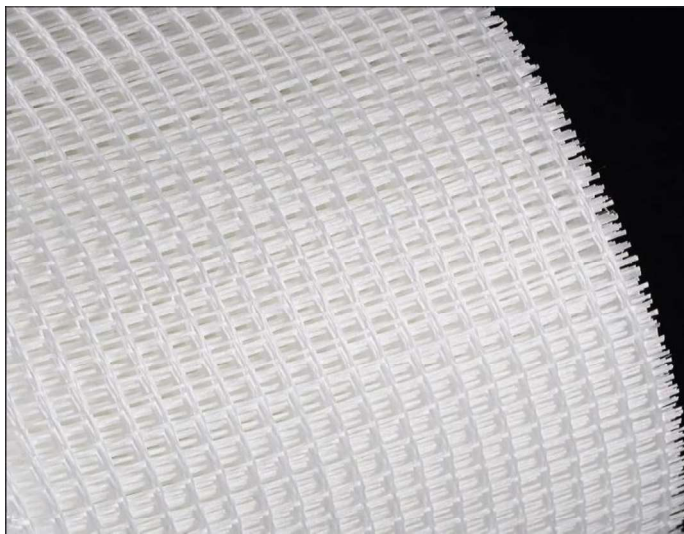

Grid Chennal

A precision-engineered GI channel system designed to create a strong, level and stable framework for suspended grid ceiling systems. Easy to install and suitable for durable, clean and accessible ceiling solutions.

GI WIRE MESH & FIBRE MESH

Durable reinforcement meshes designed to strengthen plaster and finishing systems, helping control cracks and improve surface stability. Suitable for joints, corners, transitions and other areas requiring additional reinforcement.

HARDWARE & OTHER ACCESSORIES

A comprehensive range of essential hardware and accessories for gypsum, POP, ceiling and partition installations. Includes fasteners, screws, plugs, tapes, channels and other supporting materials required for efficient and reliable installation.
