

WAVEULTRA

# Table Top Ultrasonic Cleaners

Ultrasonic cleaning is an efficient and precise method that uses high-frequency sound waves to create microscopic bubbles in a cleaning solution. As these microscopic bubbles collapse, they produce energy, effectively dislodging contaminants from the surface.

## MARVEL SERIES

Waveultra's compact Marvel Series ultrasonic cleaners are built to be sturdy and potent cleaning devices, catering to both heavy-duty and delicate cleaning needs for small components. These ultrasonic cleaners provide the most effective and consistent cleaning results. They can effectively eliminate contaminants such as grease, debris, particles, and dirt when used in conjunction with the appropriate cleaning solution. The Marvel Series is available in 2 variants, Marvel-S(WMS) & Marvel-S/R(WMS/R).

Marvel-S(WMS)

Marvel-S/R(WMS/R)

## FEATURES

- › Tank MOC: **SS304**
- › Outer body MOC: **SS304**
- › Ultrasonic Frequency: **40 kHz (±3kHz)**
- › Ultrasonic Timer: **0-30 minutes**
- › Ideal Cycle Time: **0-10 minutes**
- › Heater Temperature Range: **Ambient to 70°C**
- › Temperature Controller: **Digital**
- › Drain: **1" BSP Valve**
- › Supply Voltage: **230V, 50Hz, Single Phase**
- › Basket: **SS304 General Purpose**
- › Degas: **Available**
- › Semiwave: **Available**
- › Power Regulation: **Analog Type(Only in Marvel-S/R Series)**

## HIGHLIGHTS

- › **Degas:** In degassing mode, the transducers generate high-frequency waves to prompt the release and extraction of trapped gases within the tank. This process is carried out to eliminate dissolved gases in the cleaning solution, as their presence can disrupt the efficiency of ultrasonic cleaning.
- › **Semiwave:** It is a soft cleaning mode based on a single-frequency ultrasonic wave and its wave amplitude is half of the original single frequency. This mode reduces the risk of damage to delicate items.
- › **Power Regulation:** Our ultrasonic cleaners have variable analogue power adjustment controls. This option allows the user to adjust the intensity of the ultrasonic waves based on the specific cleaning requirements and the type of items being cleaned.

## MODEL-SPECIFIC TECHNICAL INFORMATION

SPECIFICATION		INTERNAL DIMENSIONS	MAX/BRIM VOLUME	ULTRASONIC POWER	HEATER POWER	GROSS WEIGHT	EXTERNAL DIMENSIONS	DRAIN
WMS	WMS/R	L x W x H (mm)	Litres	Watt	Watt	kg	L x W x H (mm)	Y/N
WMS-02	-	150 x 135 x 100	2	120	150	2.9	175 x 15 x 225	N
WMS-03	WMS-03R	240 x 135 x 100	3.2	120	150	3.7	265 x 165 x 225	N
WMS-04	WMS-04R	300 x 150 x 100	4.5	180	300	5.3	325 x 175 x 230	N
WMS-06	WMS-06R	300 x 150 x 150	6.5	180	300	6.2	325 x 175 x 270	Y
WMS-10	WMS-10R	300 x 240 x 150	10	240	300	8.3	325 x 265 x 275	Y
WMS-15	WMS-15R	330 x 300 x 150	15	360	450	10.5	355 x 325 x 275	Y
WMS-22	WMS-22R	500 x 300 x 150	22	600	600	13.2	530 x 330 x 280	Y
WMS-30	WMS-30R	500 x 300 x 200	30	720	600	15	530 x 330 x 330	Y

## WHAT CAN BE CLEANED?

Manufacturing Residue

Dust

Grease

Cutting Oil

Stamping Oil

## APPLICATIONS

Precision manufacturing parts

Laboratory Equipment

Electrical & electronic parts

Eyewear and lenses

Optical devices

Jewellery

Wrist Watch case

Medical instruments

Dental instruments and accessories

Hardware & machinery parts

Maintenance and cleaning of tools

## ADVANTAGES

» **Gentle on Items:** Despite the powerful cleaning action, our ultrasonic cleaners are gentle on delicate items, such as jewellery, electronics, and precision instruments, as they do not involve harsh scrubbing or abrasive cleaning, which increases the longevity of the product.

» **Precision Cleaning:** Our ultrasonic cleaners are designed in such a way and work so effectively across a wide range of workpiece shapes, sizes, and materials that even hard-to-reach spots can be cleaned with precision without a hassle.

» **User-Friendly:** Marvel Series ultrasonic cleaners are compact and easy to operate, making them suitable for small businesses, labs, and individuals. They feature digital controls for precise customization of cleaning cycles.

» **Zero human contact:** Since these machines use ultrasonic technology, which is a high-precision type of cleaning,

## ABOUT US

Waveultra was established in 2008, primarily focusing on producing Ultrasonic Cleaning systems for various industries. Our committed engineering team, extensive supplier network, and versatile capabilities position Waveultra as a trusted partner ready to assist you with your precision cleaning needs. Our talented and effective team has over two decades of experience in the component cleaning industry. We work in a massive 20000+ sq.ft manufacturing facility with market-leading tech.
