

Print bigger and 2X faster

Textured and embossed large format photo realistic printing

Direct printing on dark and transparent materials

Optimal for printing on both rigid and flexible substrates

Ideal for printing signage, packaging, decoration (wood printing, ceramics, glass, plastics, aluminum. etc...), posters, promotional items

Upscaled Features

Unique lateral loading architecture

Optimal cost saving with the continuous ink supply system

Feathered printing rendering mode

Automatic error checking on boot with error reporting

Printhead height self adjustment

Simplified operation and maintenance

Extended printhead life time with the flash on ink firing technology

Interlaced curing sytem

Built in liquid cooling control system

Versatile printing with the LED UV power level adjustment

Y axis servo motor for increased printing quality

Applications

Home Decorations

Packaging

Awards and Trophies

Leather Production

Signage

Printer

Ordering Information

artis 5000 U

DTS Direct to Substrate artisink

Printing spec	ification	
Print speed		5 minutes for Full 51 * 70CM @ 720*720 DPI
Printing technology		UV LED (Built in water cooling)
Ink		artisink DTS3 (C,M,Y,K,W), LC, LM, V available
Media	Applications	Signage, packaging, decoration (wood printing, ceramics, glass, plastics, aluminumetc), posters promotional items
	Media Size	510 x 710 mm (20.07 x 27.95 in)
	Thickness	100 mm (3.93 in)
	Rotary Print	Optional
Printing	Printing modes	4 pass 6 pass 8 pass
	Print Resolution	Up to 5760 x 1440 d p i
	Print Head	On demand Epson DX5 piezo electric printhead. Made in Japan
Printer specif	ication	
Connectivity	Nozzles	Variable dot size printing technology,

starting from 1.5 pl and up to 21pl

Ports **USB 2.0** Operating systems

Dimensions **Depth x Width x Height** Printer 790 x 970 x 540 mm (31.10 x 38.18 x 21.25 in)

Shipping 1100 x 1230 x 760 mm (43.30 x 48.42 x 29.92 in)

Weight Printer 180Kg, Shipping 210 Kg Content of the box artis 5000 U, USB cable, Power cable,

User manual book, spare parts package, Driver CD, Ink Chips, Ink tunnels, SCM Cable, Power fuse, RIP Software, Extra back-up Damper

Environmental ranges

Power consumption AC100V~240V±10%, 0.5kVA

and requirements

Certification CEcertified

Warranty (Machine) One year limited warranty Warranty (Head) Six Months limited warranty

 $^{^{}m{k}}$ User has to take calibration print every alternate days & keep the record without that warranty will be Void.

Go green with artislet's DTS3 UV inks. Print toxin free and virtually odorless. DTS3 UV inks are environmentally friendly. UV inks are cured and fixed to the substrate when being activated with UV light. The curing process hardens the ink, without any evaporation. Ideal for general industrial use, restaurants, hotels, hospitals and indoor signage application.

Core technology highlight

artisRIP Software

Specifically designed for artisJet's UV direct to print systems, ARTISRIP offers a simple and user friendly intuitive interface.

ArtisRip main features are:

Layout platform

Layout editing platform, resize, mirror, text, color adjustment

Color gamut check

Raster and vector images support

Built-in customizable print templates for printing pens, phone covers, lighters, wood cases, etc...

Previewing and smart nesting

Print Engine

Vivid color reproduction

Simultaneous printing to multiple print devices

Simultaneous White and CMYK printing

- Color then White print mode
- White then color print mode

Support for jpg, tif, bmp, png, ai and pdf image files

Color management engine base with ICC profiles support

Individual ink channel adjustment

Automatic white ink trapping

Feathering rendering mode (elliminates banding, enhances color transitions) Direct printing from common graphic software.(CorelDraw, Photoshop, Autocad...)

Flash On Ink Firing System Intelligently powered by ArtisPrinters FOIF system, the artis 5000U printer electronically activates the UV LEDs when firing ink only. As a result the life time of the printhead and the UV LEDs is maximized. FOIF also protects the entire ink system including the ink pump, the wiper, the damper, and the cap tops.

Continuous Ink Supply System

Unlike ink cartridges, this system allows for 100% utilization of available ink

Unique lateral loading platform design

Unique design ensuring a better visibility of the output. Ideal for space constraints

Designed for an enhanced flexibility and simplicity, artisJet COD digitally controls the operation of the LED UV system. It automatically adapts to different materials and working environments. COD controls the UV Curing mode(Bi-directional, Uni-directional). This will result in delivering an optimal printing quality and drying time.

Designed for operational extra safety and simplicity, artisJet's SWCC system is built on a digital industrial chilling system. It recycles 300ml of an industrial cooling liquid. The liquid level is visible and refillable on demand to avoid the wearout of the UV LEDs

Self-automated printing height adjustment

Equiped with sensors to automatically adjust head height and reduce the print head strikes.

Gradient ECO UV LED Technology
Equipped with artisJet new UVGC2 UV LED clutter suppression Processor technology. The UV LED light wave varies from 365-395 and deliver the best print color durability by drying the prints in different layers.

Auto Cleaning Module

Extends the printer head life by running scheduled ink system cleaning and maintenance when the printer is idle for a period of time.

Empowered by the wave print technology, the gradient feathering print functionality of artis 5000 U ensures the sharpness of the print output.
